## Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of the joint technical committee is to prepare International Standards. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

ISO/IEC 19796-1 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 36, *Information technology for learning, education and training*.

ISO/IEC 19796 consists of the following parts, under the general title *Information technology — Learning, education and training — Quality management, assurance and metrics*:

— *Part 1: General approach*

Three further parts will be developed:

— *Part 2: Harmonized quality model*

— *Part 3: Reference methods and metrics (RMM)*

— *Part 4: Best practice and implementation guide*

## Introduction

The Reference Framework for the Description of Quality Approaches (RFDQ) is a framework to describe, compare, and analyze quality management and quality assurance approaches. These approaches can be mapped to RFDQ. Therefore, the framework is not a quality management or quality assurance model – it is a framework for the description of quality approaches. It will serve to compare different existing standards and to harmonize these towards a common quality model. For a better understanding of the standard, several annexes show samples of the usage of the standard – the annexes are based on the French “Code of Practice” and German DIN PAS 1032-1. Additionally, an annex on Reference Quality Criteria (RQC) is included. These criteria shall serve as reference criteria for the analysis and evaluation of learning resources and scenarios. These criteria are also not a quality assessment approach itself, but a framework to compare different quality assurance and quality assessment approaches.

The following figure shows the levels of quality approaches and the relation of the RFDQ and RQC to existing approaches.

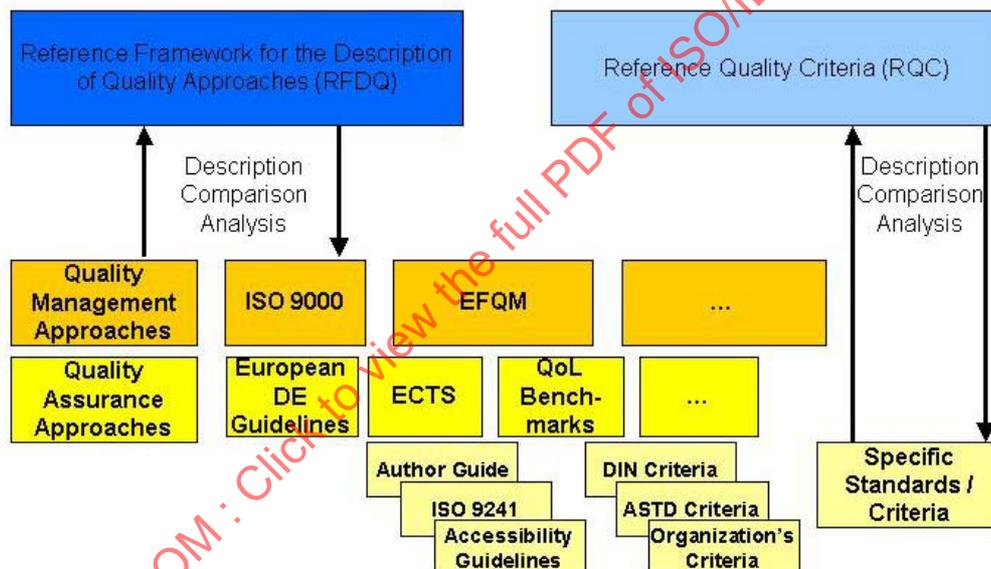

Figure 1: Levels of Quality Approaches

The following figure shows the role of the models within the standardization process.

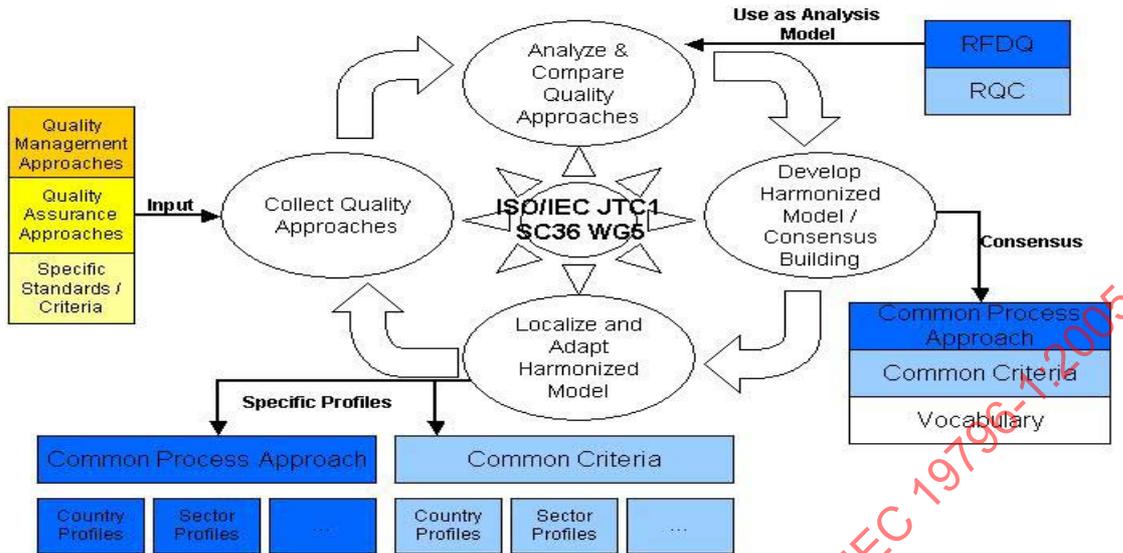

Figure 2: Standardization Process

Chapter 3 describes the process-oriented framework for the description of quality approaches (RFDQ).

Annex A (informative) describes the use of RFDQ and the use of classifications to extend the process model introducing sub-processes.

Annex B (informative) shows the full German process model (DIN PAS 1032-1) as an example how the basic model can be extended.

Annex C (informative) describes the use of the model describing the “French Code of Practice in e-Learning” (AFNOR Z 76-001) as a second sample of the use of the standard.

Annex D (informative) provides a reference list of quality criteria which can be included in RFDQ for assessment and evaluation.

Annex E (informative) describes how other quality approaches can be mapped to RFDQ. Specifically, the Chinese Model CELTSC is used as an example of the mapping procedure.

Annex F (informative) describes the use of the model for specific quality objectives such as metadata quality.

Annex G (informative) lists references to papers used for explanatory purposes.

# Information technology — Learning, education and training — Quality management, assurance and metrics —

## Part 1: General approach

### 1 Scope

This part of ISO/IEC 19796 provides a common framework to describe, specify, and understand critical properties, characteristics, and metrics of quality. The Reference Framework for the Description of Quality Approaches (RFDQ) is an elaborated and extensive process model. This standardization work harmonizes existing concepts, specifications, terms, and definitions for learning, education, and training.

### 2 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

#### 2.1

##### **ASTD**

**American Society for Training and Development**

#### 2.2

##### **CELTSC**

**Chinese E-Learning Technology Standardization Committee**

#### 2.3

##### **CWA**

**CEN Workshop Agreement**

#### 2.4

##### **customer**

individual or organization, such as learner, learner's parents, education institutions and potential employer, who consumes the product (studying and training) directly or indirectly

#### 2.5

##### **data quality**

set of features such as relevance, accuracy, timeliness, punctuality, accessibility, clarity, comparability, coherence, that concern the collection, analysis, persistence, dissemination, and usage of data

#### 2.6

##### **DIN e.V.**

**Deutsches Institut für Normung e.V.**

**2.7**  
**ECTS**  
**European Credit Transfer System**

**2.8**  
**EFQM**  
**European Foundation for Quality Management**

**2.9**  
**interested party**

person or group (such as employee, provider, partner, investor, owner, society) whose interest is affected by performance or achievements of e-learning

**2.10**  
**process**

set of interrelated or interacting activities which transforms inputs into outputs

NOTE 1 Inputs to a process are generally outputs of other processes.

NOTE 2 Processes in an organization are generally planned and carried out under controlled conditions to add value.

NOTE 3 A process where the conformity of the resulting product cannot be readily or economically verified is frequently referred to as "special process". (ISO 9000:2000)

**2.11**  
**product**

result of a process

NOTE 1 There are four generic product categories, as follows:

- services (e. g. transport);
- software (e. g. computer program, dictionary);
- hardware (e. g. engine mechanical part);
- processed materials (e. g. lubricant).

Many products comprise elements belonging to different generic product categories. When the product is then called service, software, hardware or processed material depends on the dominant element. [...]

NOTE 2 Service is the result of at least one activity necessarily performed at the interface between the supplier and customer and is generally intangible. Provision of a service can involve, for example, the following:

- an activity performed on a customer-supplied tangible product (e. g. automobile to be repaired);
- an activity performed on a customer-supplied intangible product (e. g. the income statement needed to prepare a tax return);
- the delivery of an intangible product (e. g. the delivery of information in the context of knowledge transmission);
- the creation of ambience for the customer (e. g. in hotels and restaurants).

Software consists of information and is generally intangible and can be in the form of approaches, transactions or procedures.

Hardware is generally tangible and its amount is a countable characteristic. Processed materials are generally tangible and their amount is a continuous characteristic. Hardware and processed materials often are referred to as goods.

NOTE 3 Quality assurance is mainly focused on intended products.

(ISO 9000:2000)

**2.12****quality**

ability of a set of inherent characteristics of a product, system or process to fulfil requirements of customers and other interested parties. (ISO 9000:2000)

**2.13****quality assessment**

totality of measures carried out consistently and systematically in order to insure that a product conforms with the requirements of a stated specification (EN 180000:1995)

**2.14****quality assurance (QA)**

part of quality management focused on providing confidence that quality requirements will be fulfilled (ISO 9000:2000)

**2.15****quality control**

part of quality management focused on fulfilling quality requirements (ISO 9000:2000)

**2.16****quality improvement**

part of quality management focused on increasing effectiveness and efficiency (ISO 9000:2000)

**2.17****quality management (QM)**

coordinated activities to direct and control an organization with regard to quality (ISO 9000:2000)

NOTE Direction and control with regard to quality generally includes establishment of the quality policy and quality objectives, quality planning, quality control, quality assurance and quality improvement.

(ISO 9000:2000)

**2.18****quality objective**

something sought, or aimed for, related to quality

NOTE Quality objectives should be based on the organization's quality policy. Quality objectives are specified at different levels in the organization.

(ISO 9000:2000)

**2.19****QoL****Quality on the line****2.20****quality planning**

part of quality management, focused on setting quality objectives and specifying necessary operational process and related resources to fulfil the quality objectives

NOTE Establishing quality plans may be part of quality planning.

(ISO 9000:2000)

**2.21****quality policy**

overall intentions and direction of an organization related to quality as formally expressed by top management

NOTE The quality policy should be consistent with the overall policy of the organization and should provide a framework for the setting of quality objectives.

(ISO 9000:2000)

**2.22**

**RFDQ**

**Reference Framework for the Description of Quality Approaches**

**2.23**

**RQC**

**Reference Quality Criteria**

**2.24**

**SCORM**

**Sharable Content Object Reference Model**

**2.25**

**service**

intangible product that is the result of at least one activity performed at the interface between the supplier and customer

EXAMPLE Knowledge is an intangible product to be delivered.

(ISO 9000:2000)

**2.26**

**service quality (SQ)**

overall collection of implicit and explicit characteristics that the service can satisfy the customer

**2.27**

**Total Quality Management (TQM)**

management approach of an organization, centered on quality, based on the participation of all its members and aiming at long-term success through customer satisfaction, and benefits to all members of the organization and to society

**2.28**

**W3C**

**World Wide Web Consortium**

### 3 Process model

In this section, the reference framework is described and elaborated by referring to its process model.

The process model is a framework for the description, comparison, and analysis of process-oriented quality approaches. The framework can be used as a meta-model for quality management and quality assurance approaches. This means that no assumptions and prescriptive requirements of the quality approaches are made.

The use of the framework can be described as followed:

#### Scenario 1: Description of a quality approach

- Select a quality management or quality assurance approach Q1.
- Identify the processes which are covered within Q1.
- Describe Q1 according to the framework using the description categories.

#### Scenario 2: Comparison of quality approaches

- Select quality management or quality assurance approaches [Q1..Qn].
- Identify the processes which are covered within [Q1..Qn].
- Describe [Q1..Qn] according to the framework using the description categories.
- Define a metric to compare [Q1..Qn].
- Perform analysis and comparison.

#### Scenario 3: Harmonization of quality approaches

- Use Scenario 2.
- Combine [Q1..Qn] towards a consensus model.

It is important to mention that the process scheme described in this working paper shall be used as a general, descriptive framework. In a second step, good practice approaches and profiles can be generated – these profiles could contain specific recommendations, guidelines, procedures, or criteria. Secondly, the process scheme can be extended and modified.

### 3.1 Descriptive model

The descriptive model shows the classification and documentation scheme for quality processes. It bases on the CEN/ISSS CWA 14644<sup>1</sup>. Each process will be described by this scheme:

Attribute	Description	Example
ID	Unique Identifier	ID1234
Category	Main Process	Course Development
Process Name	Process name	Method selection
Description	Description of the process	Within this process the didactic concept and methods are evaluated and selected
Relations	Relation to other processes	Before the method selection a target group analysis must be performed; FA.6
Sub-processes / sub-aspects	Sub-processes / sub-aspects / tasks	Method identification, method alternatives, method prioritization
Objective	Objective of a Process	Adequate selection of one or more didactic concepts
Method	Methodology for this process Reference to guideline / documents	Method selection shall be based on the target group. Methods are selected based on the teachers' experience. See Method Guidelines Handbook
Result	Expected result of a process	Method specification Documents
Actors	Responsible / participating actors	Team Didactical Design
Metrics / Criteria	Evaluation and Metrics for this process	Criteria catalogue 3.2.2-3.2.6
Standards	Standards used	DIN EN ISO 9241, IEEE 1484.12.1:2003 Learning Object Metadata
Annotation / Example	Further Information, Examples of usage	

**Table 1: Descriptive model for quality approaches**

<sup>1</sup> CEN/ISSS CWA 14644 Quality Assurance and Guidelines. Brussels, 2003.

### 3.2 Reference Framework for Quality Descriptions (RFDQ): process model

In this section the process framework is described in the format explained in 3.1. The process model includes the relevant processes within the life-cycle of information and communication systems for learning, education, and training. The process model is divided in seven parts. Sub-processes are included referencing to a classification of processes – examples of the use of classifications are shown in Annexes B and C.

ID	Category	Sub-Processes
NA	Needs Analysis	Classification
FA	Framework Analysis	Classification
CD	Conception / Design	Classification
DP	Development / Production	Classification
IM	Implementation	Classification
LP	Learning Process	Classification
EO	Evaluation / Optimization	Classification

**Table 2: RFDQ process model**

In each part, the essential processes are described. For selected processes, examples how the reference model can be used are included; these examples are written in *italics*.

The use of the process model is shown using the classification of processes from DIN PAS 1032-1, listed fully in Annex B.

**3.2.1 Process model description**

In this section, the process model is described, including examples for the use of each category of the description scheme.

**3.2.1.1 Needs analysis**

ID	Category	Process	Description	Relation
NA		Needs Analysis	Identification and description of requirements, demands, and constraints of an educational project	
Sub-processes / Sub-aspects		NA.1 Initiation NA.2 Stakeholder identification NA.3 Definition of objectives NA.4 Demand analysis		
Objective		To describe the needs and demands leading to an educational project		
Method		<i>Quality Function Deployment</i>		
Result		Documentation of goals, objectives, needs, and requirements of an educational project		
Actors		<i>Project manager; specialists, learners, sponsors</i>		
Metrics / Criteria		<i>Indicators</i>		
Standards		ISO 9000:2000		
Annotation / Example				

## 3.2.1.2 Framework analysis

ID	Category	Process	Description	Relation
FA		Framework Analysis	Identification of the framework and the context of an educational process	NA, CD
<b>Sub-processes / Sub-aspects</b>		FA.1 Analysis of the external context FA.2 Analysis of staff resources* FA.3 Analysis of target groups FA.4 Analysis of the institutional and organizational context FA.5 Time and budget planning FA.6 Environment analysis		
<b>Objective</b>		To describe relevant factors for an educational project		
<b>Method</b>		<i>Methods of empirical social research; methods in legal and economic research and analysis</i>		
<b>Result</b>		Documentation and validation of relevant parameters		
<b>Actors</b>		<i>Project manager; specialists</i>		
<b>Metrics / Criteria</b>		<i>Check for plausibility; consultation of additional experts</i>		
<b>Standards</b>				
<b>Annotation / Example</b>				

3.2.1.3 Conception / Design

ID	Category	Process Name	Description	Relations
CD		Conception / Design	Conception and Design of an educational process	
		CD.1 Learning objectives CD.2 Concept for contents CD.3 Didactical concept / methods CD.4 Roles and activities CD.5 Organizational concept CD.6 Technical concept CD.7 Concept for media and interaction design CD.8 Media concept CD.9 Communication concept CD.10 Concept for tests and evaluation CD.11 Concept for maintenance		
<b>Sub-processes / Sub-aspects</b>				
<b>Objective</b>		To plan and design the concepts for an educational process		
<b>Method</b>		<i>Use of Design Guidelines</i>		
<b>Result</b>		To provide a conception and design for educational processes		
<b>Actors</b>		<i>Consultant, Media Designers</i>		
<b>Metrics / Criteria</b>				
<b>Standards</b>				
<b>Annotation / Example</b>				

## 3.2.1.4 Development / Production

ID	Category	Process	Description	Relation
DP		Development / Production	Realization of concepts	CD
<b>Sub-processes / Sub-aspects</b>		DP.1 Content realization DP.2 Design realization DP.3 Media realization DP.4 Technical realization DP.5 Maintenance		
<b>Objective</b>		To realize the conceptions		
<b>Method</b>		<i>Implementation manual</i>		
<b>Result</b>		Educational products and services		
<b>Actor</b>		<i>IT-specialists, authors, developers</i>		
<b>Metrics / Criteria</b>				
<b>Standards</b>				
<b>Annotation / Example</b>				

3.2.1.5 Implementation

ID	Category	Process	Description	Relation
IM		Implementation	Description of the implementation of technological components	
Sub-processes / Sub-aspects		IM.1 Testing of learning resources IM.2 Adaptation of learning resources IM.3 Activation of learning resources IM.4 Organization of use IM.5 Technical infrastructure		
Objective		To implement appropriate technological components being used in the educational process		
Method		<i>Change / configuration / content management</i>		
Result		Learning environment including all learning resources		
Actor		<i>Project manager, IT-manager</i>		
Metrics / Criteria		<i>Testing beta versions and system</i>		
Standards		<i>Software validation, e. g. following IEEE; ISO 9000:2000</i>		
Annotation / Example				

IECNORM.COM - Click to view the full PDF of ISO/IEC 19796-1:2005

## 3.2.1.6 Learning process

ID	Category	Process	Description	Relation
LP		Learning Process	Realization and use of the learning process	
Sub-processes / Sub-aspects		LP.1 Administration LP.2 Activities LP.3 Review of competency levels		
Objective		To perform the learning process		
Method		According to the chosen didactical concepts and methods		
Result		Completed process of learning, education and training.		
Actor		Learners, trainers, tutors		
Metrics / Criteria		User performance, user satisfaction		
Standards				
Annotation / Example				

3.2.1.7 Evaluation / Optimization

ID	Category	Process	Description	Relation
EO		Evaluation / Optimization	Description of the evaluation methods, principles, and procedures	
Sub-processes / Sub-aspects		EO.1 Planning EO.2 Realization EO.3 Analysis EO.4 Optimization / Improvement		
Objective		To describe the evaluation of the educational process		
Method		Evaluation methods (Questionnaires, User tracking, user feedback report)		
Result		To perform an evaluation of the educational process; to optimize and improve the educational process		
Actor		Evaluators, learners, teachers		
Metrics / Criteria				
Standards		ISO 9000:2000		
Annotation / Example				

IECNORM.COM: Click to view the PDF of ISO/IEC 19796-1:2005

## 4 Conformance

A quality description conforms to this standard if each process included in a RFDQ instance corresponds to the appropriate specification in this standard and includes all sub-processes. A conforming description may contain descriptions of processes not included in this standard. The description may contain additional data elements.

IECNORM.COM : Click to view the full PDF of ISO/IEC 19796-1:2005

**Annex A**  
(informative)

**Explanation for the use of the model**

In this section, the use of the model is clarified. Several sample questions are answered in order to provide a clearer understanding of the concept and its use.

**Is RFDQ customer oriented / does it take individualization into account?**

In general, RFDQ is a framework to describe and compare quality approaches. Therefore, it does not take any position of how "good" quality is achieved. However, it is designed that guidelines, procedures, requirements are included and clearly specified.

**Example of quality guidelines and methods for content selection / design:**

ID	Category	Process Name	Description	Relations
CD.2	Conception / Design	Concept of the contents	Concept of learning and teaching contents	NA.4 Demand analysis FA.2 Qualifications
<b>Sub-processes / Sub-aspects</b>	Content selection Content Design			
<b>Objective</b>	1. Learner Demand: The goal is to provide content adapted to the needs and demand of the learner. 2. Adaptation: Each course shall provide different content presentation formats and entry points based on the user experience.			
<b>Method</b>	A prototype of the content shall be provided to a group of learners' representatives. In a consensus process, the contents shall be prioritized and agreed on. For each course, classify groups of learners according to their learning type. Adapt presentation format and methods according to these learning types.			

<b>Result</b>	1. Documentation of planned and agreed contents 2. Periodically, evaluate learning performance of different learners (test groups).
<b>Actors</b>	Curriculum designer, didactic experts, institution accreditation authority, teacher, learners' representatives
<b>Metrics / Criteria</b>	The content are measured based on their relevance, importance, exemplarity, ...
<b>Standards</b>	Higher Education Standards
<b>Annotation / Example</b>	

Therefore, negotiations and adaptation should be included when using RFDQ.

#### How should specific requirements and needs be included.

Specific requirements should be included in the process. Specific issues can be added to the model in specific profiles of the model.

#### Example: Inclusion of French National Body's document concerning negotiation about "Validation of Experiential Learning" [Blan2003]

ID	Category	Process	Description	Relation
FA.2	Framework Analysis	Analysis of staff resources	Description of actors, their qualifications and competencies	
<b>Sub-processes / Sub-aspects</b>	Roles / Functions Competencies / formal qualifications of actors Availability of actors			
<b>Objective</b>	<ol style="list-style-type: none"> <li>1. Description of the roles / functions, competencies / formal qualifications and availability of actors and users</li> <li>2. Evaluate and certify actors' qualifications of prior experiential learning.</li> </ol>			
<b>Method</b>	Analyze learner records and certificates. Analyze learners' qualifications through experimental learning: Presenting a portfolio, or explaining to a jury how professional			

	experience lead to acquire knowledge and skills required by the qualification
<b>Result</b>	<ul style="list-style-type: none"> <li>- Description of roles / functions of staff</li> <li>- Description of competencies / formal qualifications / qualifications through experimental learning</li> <li>- Description of availability of staff</li> </ul>
<b>Actors</b>	Project manager; experts (-> jury), learners
<b>Metrics / Criteria</b>	
<b>Standards</b>	Project management and documentation guidelines; standards for social research; Law : "Loi sur la Validation des Acquis de l'Expérience"
<b>Annotation / Example</b>	

**Note: In order to include the processes of negotiations and individualization, a separate process has been included in the model.**

The model can be adapted (e.g., including a more detailed process model) using classifications of sub-processes. An example for the use of sub-processes is given in Annexes B and D.

**Annex B**  
(informative)  
**DIN process model (DIN PAS 1032-1)**

In this section, we show a sample use of RFDQ. The German DIN process model (DIN PAS 1032-1) including sub-processes is described using RFDQ.

**Needs Analysis (NA)**

ID	Category	Process	Description	Relation
NA		Needs Analysis	Identification and description of requirements, demands, and constraints of an educational project	
		NA.1 Initiation NA.2 Stakeholder Identification NA.3 Definition of objectives NA.4 Demand Analysis		
<b>Sub-processes / Sub-aspects</b>				
<b>Objective</b>		To describe the needs and demand leading to an educational project		
<b>Method</b>		<i>Quality Function Deployment</i>		
<b>Result</b>		Documentation of goals, objectives, needs, and requirements of an educational project		
<b>Actors</b>		<i>Project manager; specialists, learners, sponsors</i>		
<b>Metrics / Criteria</b>		<i>Indicators</i>		
<b>Standards</b>		ISO 9000:2000		
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
NA.1	Needs Analysis	Initiation	Initiation of an educational project; description of necessity or demand for learning/education/training	FA.4
<b>Sub-process(es) / Sub-aspects</b>	<ul style="list-style-type: none"> <li>• Identification of demands and requirements</li> <li>• Identification of necessities</li> </ul>			
<b>Objective</b>	Description and indication of the processes goals and aims <i>Needs for teaching</i>			
<b>Method</b>	<i>Methods of marketing research and market analysis, trend analysis, need analysis, interviews, balanced scorecard, skill gap analysis; Assessments, work place analysis, Auditing</i>			
<b>Result</b>	Definition and documentation of the needs, necessities, and demands (for learning / education / training)			
<b>Actors</b>	<i>End user</i> <i>Education and training manager</i> <i>Experts in education and training</i>			
<b>Metrics / Criteria</b>	<i>Review of description validity</i>			
<b>Standards</b>	<i>ISO 900x:2000, ANSI/PMI 99-001-2000 5.1 Initiation</i>			
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
NA.2	Needs Analysis	Stakeholder Identification	Identification, description and evaluation of the stakeholders groups	
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Identification of actors</li> <li>• Identification of interested parties</li> <li>• Identification of users</li> </ul>		
<b>Objective</b>		Description of all potential stakeholders. Influence and cooperation within the education and training processes. Importance for and on the development, acceptance and market capabilities of the finished products		
<b>Method</b>		<i>Literature analysis, Staff sheets, Curricula, Workshops Examination regulations, business-plans Interviews, Guidelines</i>		
<b>Result</b>		Description of all interested parties, their focused objectives, documentation of objectives.		
<b>Actors</b>		<i>Managers Initiator</i>		
<b>Metrics / Criteria</b>		<i>Measurements of acceptance, contracts and applications</i>		
<b>Standards</b>		<i>ANSI 10.1 und 10.2</i>		
<b>Annotation / Example</b>		Who are the respective actors and interested parties? (students, teachers, Trainer, Tutors, managers, enterprises, organizations, examination boards, regulative bodies in education, Universities, sponsors, cooperating institutions, clients, relevant social groups)..		

ID	Category	Process	Description	Relation
NA.3	Needs Analysis	Definition of Objectives	Description and evaluation of the objectives of relevant stakeholders	CD. x, IM.5, IM.6., LP.1., LP.2., LP.3, LP.4.
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Strategic goals</li> <li>• Tactical goals</li> <li>• Operative goals</li> </ul>		
<b>Objective</b>		Identification, description, and evaluation of goals of the stakeholders	Transition to a quality system in accordance with ISO 9000.	
<b>Method</b>		Questionnaire, Interview, Polls, Workshop.		
<b>Result</b>		Documentation of goals and objectives	operational, consistent goal-systems for quality-measurements in accordance with DIN/ISO 9000	
<b>Actors</b>		project or consortia leadership, user, client		
<b>Metrics / Criteria</b>		Achievement of objectives		
<b>Standards</b>		ISO 9000:2000, ISO 14800		
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
NA.4	Needs Analysis	Demand Analysis	Specification, description, and evaluation of the demand for qualification	
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Description of the qualification demand</li> <li>• Justification of demand</li> <li>• Kind of the qualification demand (formal, informal, prescriptive, taxonomy)</li> </ul>		
<b>Objective</b>		Specification, description and validation of demand and objectives in an educational project and their operational description		
<b>Method</b>		<i>Document analysis, Interview, Workshop, systematic and methodical formulations</i>		
<b>Result</b>		Requirement specification for project		
<b>Actors</b>		<i>Project manager, user, supplier, sponsor</i>		
<b>Metrics / Criteria</b>		<i>Evaluation by experts, Certification through DIN/ISO 9000</i>		
<b>Standards</b>		<i>ISO 9000:2000, ANSI PMI 99-001-2000a</i>		
<b>Annotation / Example</b>

FA.1	Framework Analysis	Analysis of the external context	Identification, description and evaluation of the external context / framework of the educational process	
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Legal context / conditions</li> <li>• Economic context / conditions</li> <li>• Educational context / conditions</li> <li>• Social context / conditions</li> <li>• Political context / conditions</li> </ul>		
<b>Objective</b>		Identification, description and validation of the external context / framework of the educational process		
<b>Method</b>		<i>Methods of empirical social-/educational research; consultation of specialists; market analysis;</i>		
<b>Result</b>		<p>Identification and documentation of relevant aspects of the external context</p> <p><i>Legal provisions concerning training intervals in security relevant areas</i></p> <p><i>Development of the e-learning market</i></p> <p><i>Structures and processes of the organization within which an educational process is located; organizational culture of learning;</i></p> <p><i>Structures and constraints due to established curricula etc.</i></p> <p>Planning for updates of context analysis</p>		
<b>Actors</b>		<i>Project manager; experts (e.g. market researchers, lawyers)</i>		
<b>Metrics / Criteria</b>		<i>Check on plausibility of results; additional expertise</i>		
<b>Standards</b>		<i>Project management and documentation guidelines; standards for social research;</i>		
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
FA.2	Framework Analysis	Analysis of staff resources	Identification and description of actors, their qualifications and competencies, and availability	
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Roles / functions</li> <li>• Competencies / formal qualifications</li> <li>• Availability of actors</li> </ul>		
<b>Objective</b>		Identification of the roles / functions, competencies / qualifications and availability of actors and users		
<b>Method</b>		<i>Methods of empirical social/educational research (e.g. document analysis); consultation of specialists; staff profile analysis</i>		
<b>Result</b>		<ul style="list-style-type: none"> <li>- Description of roles / functions of staff</li> <li>- Description of competencies / formal qualifications of staff</li> <li>- Description of availability of staff</li> </ul>		
<b>Actors</b>		<i>Project manager; Human Resource experts, learners</i>		
<b>Metrics / Criteria</b>		<i>Categories 2, 3, 4 of RQC</i>		
<b>Standards</b>		<i>Project management and documentation guidelines; standards for social research;</i>		
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relations
FA.3	Framework Analysis	Analysis of target group	Identification and description of the target group	NA.x, CD.x, LP.x, EO.x
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Socio-cultural and social factors</li> <li>• Individual attribute (age, gender, preferences, etc)</li> <li>• Motivation</li> <li>• Skills, qualification, competencies</li> <li>• Roles and functions</li> </ul>		
<b>Objective</b>		Definition of the target group and learner profiles		
<b>Method</b>		<i>Quantitative or qualitative methods of empirical research; Analysis of CVs, certificates, etc</i>		
<b>Result</b>		Documentation of target group and learner profiles		
<b>Actors</b>		<i>Project manager, Human Resource manager, learners, teachers</i>		
<b>Criteria / Metrics</b>				
<b>Standards</b>		PAPI; LIP		
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
FA.4	Framework Analysis	Analysis of organizational and institutional context	Identification and description of the organizational and institutional context	
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Business Model</li> <li>• Organizational structure</li> <li>• Internal context</li> <li>• Learning culture</li> </ul>		
<b>Objective</b>		Description of the organizational and institutional context relevant for the educational process		
<b>Method</b>		<i>Document analysis; interviews;</i>		
<b>Result</b>		Documentation of the organizational and institutional context		
<b>Actors</b>		<i>Project manager; educational staff</i>		
<b>Metrics / Criteria</b>				
<b>Standards</b>				
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
FA.5	Framework Analysis	Time and budget planning	Identification and description of financial, contractual, and temporal constraints	NA.4
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Time</li> <li>• Budget / financial resources</li> <li>• Contractual constraints</li> </ul>		
<b>Objective</b>		Description of temporal, budgetary, and contractual constraints		
<b>Method</b>		<i>Models for calculating costs; project planning methods;</i>		
<b>Result</b>		<ul style="list-style-type: none"> <li>• Detailed financial plan</li> <li>• Detailed project schedule</li> <li>• Documentation of contractual requirements</li> </ul>		
<b>Actors</b>		<i>Project sponsor; project manager, controller, finance officer</i>		
<b>Metrics / Criteria</b>		<i>Periodical checks and updates, Categories 3 and 4 of RQC</i>		
<b>Standards</b>		<i>Project management and documentation guidelines; principles of budgeting;</i>		
<b>Annotation / Example</b>		<i>First Prototype: 31.3.2003; Version 1.0 by 31.12.2003; Usage 2 times per quarter</i>		
		<i>Design of the web site: 20000 Euro; Cost-Benefit-Analysis</i>		

ID	Category	Process	Description	Relation
FA.6	Framework Analysis	Environment analysis	Identification and description of the environment of and physical resources for an educational process	
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Buildings, rooms and furniture</li> <li>• Technical environment (Hardware, Software, Network)</li> </ul>		
<b>Objective</b>		Description of the environment relevant for educational purposes		
<b>Method</b>		<i>Document analysis (room plans); inspection;</i>		
<b>Result</b>		<ul style="list-style-type: none"> <li>• Detailed description of physical resources (<i>number and size of rooms</i>)</li> <li>• Detailed description of technical environment (<i>number and specs of PCs; specs of LAN</i>)</li> </ul>		
<b>Actors</b>		<i>Project manager; educational staff, facility manager</i>		
<b>Metrics / Criteria</b>				
<b>Standards</b>		<i>Product information; standards relating to products (e.g. LAN-components)</i>		
<b>Annotation / Example</b>		<i>Training room 10-20 Desktop PCs (Model XYZ), Learning spaces 2-6 people;</i>		
		<i>Network Ethernet 100MBit.; Netmeeting 100 Licenses; PC Model XYZ; Pentium IV, Hard disk 8BG, CD-ROM; WLAN-; internal Web-Cam</i>		
		<i>Training budget: 1000 Euro p. a. per employee</i>		

## Conception / Design

ID	Category	Process Name	Description	Relations
CD		Conception / Design	Design and Conception of an educational process	
<b>Sub-processes / Sub-aspects</b>		CD.1 Learning objectives		
		CD.2 Concept for contents		
		CD.3 Didactical concept / methods		
		CD.4 Roles and activities		
		CD.5 Organizational concept		
		CD.6 Technical concept		
		CD.7 Concept for media- and interaction design		
		CD.8 Media concept		
		CD.9 Communication concept		
		CD.10 Concept for tests and evaluation		
		CD.11 Concept for maintenance		
<b>Objective</b>		To plan and design the concepts for an educational process		
<b>Method</b>		<i>Use of Design Guidelines</i>		
<b>Result</b>		To provide a conception and design for educational processes		
<b>Actors</b>		<i>Consultant, Media Designers</i>		
<b>Metrics / Criteria</b>				
<b>Standards</b>				
<b>Annotation / Example</b>				

ID	Category	Process Name	Description	Relations
CD.1	Conception / Design	Learning objectives	Definition and commitment of learning objectives	NA.1, NA.2, FA.x, LP.x
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Objectives</li> <li>• Competency model</li> </ul>		
<b>Objective</b>			Description of learning objectives in relation to target groups resp. sub groups embedded in a model of competencies	
<b>Method</b>			<i>Use of the context analysis; discussion and formalization of competency model and objectives</i>	
<b>Result</b>			Documentation and validation of learning objectives and competency model	
<b>Actors</b>			<i>Curricula designer, subject experts, teacher</i>	
<b>Metrics / Criteria</b>			<i>Analysis of experiences, comparison with needs in real practice</i>	
<b>Standards</b>			<i>Reference taxonomies, ontologies</i>	
<b>Annotation / Example</b>				

ID	Category	Process Name	Description	Relations
CD.2	Conception / Design	Concept for contents	Concept of learning and teaching contents	NA.3, NA.4, FA3-FA.6, CD.1, CD.3, LP.x
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Topics / subjects</li> <li>• Volume</li> </ul>		
<b>Objective</b>		Representation of the learning and instructional contents		
<b>Method</b>		<i>Describing subjects using semantic networks</i>		
<b>Result</b>		Documentation of planned contents		
<b>Actors</b>		<i>Curricula designer, Subject experts, teacher</i>		
<b>Metrics / Criteria</b>		<i>Expert interviews, Categories 5-8 of RQC</i>		
<b>Standards</b>		<i>National Curriculum Standards</i>		
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
CD.3	Conception / Design	Didactical concept / methods	Conception of Didactic models, concepts, principles of using methods	NA.3; NA.4; NA.5; NA.6 FA; CD.1
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Learning and pedagogical theories</li> <li>• Didactic models</li> <li>• Curriculum</li> <li>• Learning Scenarios</li> <li>• Methodical concepts</li> <li>• Activities</li> </ul>		
<b>Objective</b>		Development of didactic models based on learning and pedagogical theories; selection of adequate methods, activities, settings of work and technologies; designation of objectives and contents relevant for test creation		
<b>Method</b>		<i>Use of instructional design guidelines</i>		
<b>Result</b>		<ul style="list-style-type: none"> <li>• Documentation of the overall concept of didactics</li> <li>• Selection procedure for didactic models</li> <li>• Description of the selection procedure for methodical concepts</li> <li>• Description of the controlling</li> <li>• Activity schemes</li> </ul>		
<b>Actors</b>		<i>Didactic experts, teacher</i>		
<b>Metrics / Criteria</b>		<i>Formatively by permanent experience feedback by teacher and learner</i>		
<b>Standards</b>		<i>Summatively by success control at the end of learning process (Which increase of competencies has been achieved?)</i>		
<b>Annotation / Example</b>		<i>IMS Learning Design, DIN PAS 1032-2</i>		

ID	Category	Process	Description	Relation
CD.4	Conception / Design	Roles and activities	Description of roles and their functions in the educational process	NA.2; FA.2; FA.3, FA.4; FA.6; CD.2
<b>Sub-processes / Sub-aspects</b>		Relevant roles in learning scenarios		
<b>Objective</b>		<i>Curricula responsible, Experts for media didactics, Didactic experts, Content writer, Screenplay writer, Teacher, Learner, Tutor / learning advisor / moderator, Support, Test expert</i>		
<b>Method</b>		Definition of roles, tasks, responsibilities and rights between the actors		
<b>Result</b>		<i>Actor and workflow modelling</i>		
<b>Actors</b>		Documentation and justification of roles and functions		
<b>Metrics / Criteria</b>		<i>Project manager</i>		
<b>Standards</b>		<i>Analysis of experiences</i>		
<b>Annotation / Example</b>		<i>IMS Learning Design</i>		

ID	Category	Process	Description	Relation
CD.5	Conception / Design	Organizational Concept	Concept of general conditions of the organizational concept	
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Location</li> <li>• Duration, Learning time</li> <li>• Segmentation of learning time</li> </ul>		
<b>Objective</b>		<i>Representation of general conditions relevant for the learning process</i>		
<b>Method</b>		Description and justification of the general conditions	<i>Data of requirements of areas and technical equipment, data of planned average time, data of planned fixed or freely selectable times, Expert interviews</i>	
<b>Result</b>		Documentation of general conditions		
<b>Actors</b>		<i>Curricula responsible, experts media didactics, Didactic experts</i>		
<b>Metrics / Criteria</b>		Category 2 of RQC		
<b>Standards</b>				
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
CD.6	Conception / Design	Technical Concept	Concept of the technological realisation	
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Mandatory technical requirements</li> <li>• Optional technical requirements</li> </ul>		
<b>Objective</b>		Representation of the technical concept		
<b>Method</b>		<i>Data of software requirements, definition of interfaces, integration into existing structures</i>		
<b>Result</b>		Documentation of the technical base <i>Functional specifications</i>		
<b>Actors</b>		<i>Technical group, network experts , teacher, support staff</i>		
<b>Metrics / Criteria</b>		<i>Failor Mode and Effects Analysis FMEA</i>		
<b>Standards</b>		<i>Category 1 of RQC, ISO 9241</i>		
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
CD.7	Conception / Design	Concept of media- and interaction design	Definition of media- and interaction design	NA.3; NA.4; FA.; CD.1.; CD.2; CD.4; CD.6
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Media design</li> <li>• Interaction design</li> </ul>		
<b>Objective</b>			Representation of the design concept concerning all relevant fields in consideration of existing templates / guide lines	
<b>Method</b>			<i>Development of screen design and interaction design based on specifications of software ergonomics, Human-Computer Interaction design /usability and if so of the corporate design of the organisation</i>	
<b>Result</b>			Documentation of design principles ( <i>design concept, style guide</i> ) <i>Design prototype</i>	
<b>Actors</b>			<i>Design experts, Experts media didactics</i>	
<b>Metrics / Criteria</b>			<i>Usability test on the basis of the design prototype</i> <i>Heuristic evaluation</i>	
<b>Standards</b>			<i>Conformity examination respecting existing specifications, ISO 9241, ISO</i>	
<b>Annotation / Example</b>			<i>ISO 9241, ISO 13407, ISO 14915, W3C-Accessibility-Guidelines, US Section 508</i>	

ID	Category	Process	Description	Relation
CD.8	Conception / Design	Media concept	Selection of media usage	NA.3; NA.4; NA.5; NA.6; FA.4; FA.5; CD.1; CD.2, CD.5;CD.6
<b>Sub-processes / Sub-aspects</b>		Selection and use (by media functions) <ul style="list-style-type: none"> <li>• <i>Presentation and Distribution of Information</i></li> <li>• <i>Collecting and filtering of information</i></li> <li>• <i>Information editing, interaction</i></li> <li>• <i>Constructive representation of own learning results</i></li> <li>• <i>Performance support tools, Communication</i></li> </ul>		
<b>Objective</b>		<ul style="list-style-type: none"> <li>• Specification of required media functions</li> <li>• Selection and design of media usage adequate to target group, learning objectives, learning contents and general conditions</li> </ul>		
<b>Method</b>				
<b>Result</b>		Documentation media selection procedure and media usage		
<b>Actors</b>		<i>Expert media didactics, media designer</i>		
<b>Metrics / Criteria</b>		<i>Examination for didactics and methods adequacy and for technical feasibility of selected media usage before implementation process</i>		
<b>Standards</b>				
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
CD.9	Conception / Design	Communication concept	Selection and description of planned communication media	NA.3; NA.4; NA.5; NA.6; FA.5; FA.6; CD.1; CD.2
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Aspects of communication media:                             <ul style="list-style-type: none"> <li>○ <i>Actors</i></li> <li>○ <i>Medium</i></li> <li>○ <i>Communication objectives</i></li> <li>○ <i>Tools</i></li> </ul> </li> <li>• <i>Tutor / moderator / trainer instruction</i></li> </ul>		
<b>Objective</b>			Integration and description of relevant communication and interaction media	
<b>Method</b>				
<b>Result</b>			Documentation of communication and interaction media according to the relevant aspects <i>Documentation/ guideline for tutor/ trainer/ moderator</i>	
<b>Actors</b>			<i>Curricula responsible, expert media didactics, teacher</i>	
<b>Metrics / Criteria</b>			Examination for didactics and methods adequacy and for technical feasibility of selected communication media before implementation process, <i>Categories 2 and 5 of RQC</i>	
<b>Standards</b>				
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
CD.10	Conception / Design	Concepts for tests / evaluation	Specification of evaluation concept and test procedures	EO.x
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Test development</li> <li>• Test validation</li> <li>• Test scoring</li> </ul>		
<b>Objective</b>		Identification of test procedures for competency / skill levels		
<b>Method</b>		<i>Proving with suitable comparison groups</i> <i>Statistical validation</i>		
<b>Result</b>		Documentation and justification of test procedures for classification, diagnostics, learning success and proficiency / competence level		
<b>Actors</b>		<i>Didactical experts, test expert, teacher</i>		
<b>Metrics / Criteria</b>		<i>Correlation of different test procedures</i> <i>Expert discourse</i> <i>Categories 2, 6, 8 of RQC</i>		
<b>Standards</b>		<ul style="list-style-type: none"> <li>○ National and international professional associations' standards</li> <li>○ State/ school performance standard</li> </ul>		
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
CD.11	Conception / Design	Concepts for maintenance	Conception for maintenance and updates of learning scenarios	LP.5
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Didactical / methodological updates (<i>adaptation of learning methods</i>)</li> <li>• Content updates</li> <li>• Technical maintenance</li> </ul>		
<b>Objective</b>		To ensure the appropriateness of the concepts		
<b>Method</b>		<i>Maintenance plans, interviews, trend analysis</i>		
<b>Result</b>		Documentation and justification of maintenance and update concepts		
<b>Actors</b>		<i>Didactical experts, test expert, teacher</i>		
<b>Metrics / Criteria</b>		<i>Correlation of different test procedures</i> <i>Expert discourse</i> <i>Categories 2, 6, 8 of RQC</i>		
<b>Standards</b>		ISO 9001:2000		
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
DP.1	Development / Production	Content realization	Realization of teaching / learning contents	CD.2
<b>Sub-processes / Sub-aspects</b>		Topics/Subjects		
<b>Objective</b>		Representation of teaching/learning contents		
<b>Method</b>		<i>Expert / learner interview, desktop research</i>		
<b>Result</b>		Representation of planned contents <i>Process plan, Curriculum Production of script / realization</i>		
<b>Actor</b>		<i>Teacher, expert, scriptwriter, programmer</i>		
<b>Metrics / Criteria</b>		<i>Prototype evaluation, peer-review</i>		
<b>Standards</b>		<i>Guideline for scriptwriters General education theories / taxonomies</i>		
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
DP.2	Development / Production	Design realization	Realization of screen- and interaction design	CD.7
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Media design</li> <li>• Interaction design</li> </ul>		
<b>Objective</b>		Realization of design concept for all relevant fields in consideration of existing patterns/guidelines		
<b>Method</b>				
<b>Result</b>		Templates for media / interaction design		
<b>Actor</b>		<i>Designer, illustrator</i>		
<b>Metrics / Criteria</b>		<i>Verification of conformity with regards to existing patterns, acceptance of screen design by client</i> <i>Category 7 of RQC</i>		
<b>Standards</b>		<i>Principles of interface design and usability, standards for software ergonomics (DIN EN ISO 9241)</i>		
<b>Annotation / Example</b>		The realization of the interaction design implies design of control interaction, e.g. functions, navigation, menus, buttons, but also of didactical interactions, e.g. exercises, talks, opportunities of exploration Existing conditions could be, for example, a style guide or corporate identity or corporate design conditions and have to be taken into consideration accordingly.		

ID	Category	Process	Description	Relation
DP.3	Development / Production	Media realization	Production of the relevant and chosen Media / media resources	CD.8
<b>Sub-processes / Sub-aspects</b>		Audio, video, graphics, animations, photos		
<b>Objective</b>		Production of required media		
<b>Method</b>		Production of media on the basis of defined criteria Guidelines for appropriate/available formats and available software Data security		
<b>Result</b>		Completed media products		
<b>Actor</b>		Designers, illustrators, film-maker, photographers, speakers		
<b>Metrics / Criteria</b>		Screenplay conformity test, correctness test		
<b>Standards</b>				
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
DP.4	Development / Production	Technical realization	Realization of technical concept	CD.6
<b>Sub-processes / Sub-aspects</b>				
<b>Objective</b>		Realization of technical concept		
<b>Method</b>		Java / Flash programming using programming / documentation guidelines		
<b>Result</b>		<ul style="list-style-type: none"> <li>• Documented development of application / coding</li> <li>• Code review</li> </ul>		
<b>Actor</b>		Designer, Programmer		
<b>Metrics / Criteria</b>				
<b>Standards</b>		General software-engineering standards, SCORM, XML		
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relations
DP.5	Development / Production	Maintenance	Maintenance of learning scenarios	EO.x
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Content maintenance</li> <li>• Technical maintenance</li> </ul>		
<b>Objective</b>		Provision of recent solutions, realization of maintenance concepts		
<b>Method</b>		<i>Interviews, trend analysis</i>		
<b>Result</b>		<i>Up-to-date learning scenarios</i>		
<b>Actors</b>		<i>Programmer, content experts, evaluators</i>		
<b>Metrics / Criteria</b>				
<b>Standards</b>				
<b>Annotation / Example</b>

## Implementation

ID	Category	Process	Description	Relation
IM		Implementation	Description of the implementation of technological components	
<b>Sub-processes / Sub-aspects</b>		IM.1 Testing of learning resources IM.2 Adaptation of learning resources IM.3 Activation of learning resources IM.4 Organization of use IM.5 Technical infrastructure		
<b>Objective</b>		To implement appropriate technological components being used in the educational process		
<b>Method</b>		<i>Change / configuration / content management</i>		
<b>Result</b>				
<b>Actor</b>		<i>Project manager, IT-manager</i>		
<b>Metrics / Criteria</b>				
<b>Standards</b>				
<b>Annotation / Example</b>				

ID	Category	Process Name	Description	Relations
IM.1	Implementation	Testing of learning resources	Testing and validation of technical components of the educational process	DP.2, DP.3
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Testing in development environment</li> <li>• Delivery</li> <li>• Testing in productive environment</li> </ul>		
<b>Objective</b>			Achievement of a system status, which is qualified for final release by correct function and high usability.	
<b>Method</b>			<i>Module Design Test, Functional Test, Challenge Test, Module Integration Test (alpha test), Installation Test, User Acceptance Test (beta test), Test Implementation, pre-production environment, Performance Test (Pilot phase)</i>	
<b>Result</b>		Documented test results and change requests	A qualified software and documentation with correct function and high usability.	
<b>Actors</b>			<i>Developers of e-Learning systems, Project Manager, Documentation Specialists, IT technicians, test persons of the target group, where applicable independent test institutions</i>	
<b>Metrics / Criteria</b>			<i>Test results are reviewed by a Change Control Board, which sets priorities for changes. Usually at least the Chief Developer and the Project Manager are members of the CCB (see DP.2) and where applicable a user representative.</i>	
<b>Standards</b>			IEEE Software Validation	
<b>Annotation / Example</b>				

ID	Category	Process Name	Description	Relations
IM.2	Implementation	Adaptation of learning resources	Description of configuration management, adaptation, and documentation control	DP.x, LP.1
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Configuration-Management</li> <li>• Adaptation and change of resources</li> <li>• Documentation</li> </ul>		
<b>Objective</b>		Securing that all change requests (see DP.1) for a defined system are done in an effective and controlled manner		
<b>Method</b>		<p><i>Configuration Management consists of documented program version control of freezed code, hardware and network configuration, document version control and authorized personnel.</i></p> <p><i>Changes in program code, graphical design, in the system design or the didactical approach is done in a controlled manner.</i></p> <p><i>All quality documents like requirements, specifications, test plans and results and the project documentation are created, reviewed, approved, changed, archived and changed in a controlled manner.</i></p> <p><i>A Design Review Summary Report gives an overview of processed changes.</i></p> <p><i>For an increased efficiency a Documentation Management database should be used.</i></p>		
<b>Result</b>		<ul style="list-style-type: none"> <li>• Configuration Management Plan, Change Control Plan, Documentation Control Plan and processed Change Request Forms and a Design Review Summary Report.</li> <li>• All change requests are either processed or on hold resp. omitted, in agreement with the customer.</li> <li>• Updated system version</li> </ul>		
<b>Actors</b>		Developer, screen designer, project manager, customer		
<b>Metrics / Criteria</b>		Evaluation of Configuration and Change Control System by the Change Control Board (see DP.1)		
<b>Standards</b>		IEEE Software Validation		
<b>Annotation / Example</b>		XML based DMS, Visual SourceSafe, CC database		

ID	Category	Process Name	Description	Relations
IM.3	Implementation	Activation of learning resources	Learning products have to be approved by the customer/provider before they can go into operation. This process describes the staging and deployment of the product.	DP.6
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Provision</li> <li>• Registration</li> <li>• Release</li> <li>• Activation</li> </ul>		
<b>Objective</b>		<ul style="list-style-type: none"> <li>• Supply of customers/providers with the necessary technical equipment and learning material</li> <li>• Authorized Access to the learning platform (test modus) and transition of the product into the production environment</li> </ul>		
<b>Method</b>		<p><i>Staging: Deployment, System Administration, Installation, configuration and test of base components of the production environment</i></p> <p><i>Registration : licenses, users, courses, etc.</i></p> <p><i>Release: user acceptance test, handout of product documentation, formal sign-off</i></p>		
<b>Result</b>			Learning environment and learning materials are supplied to the customer, access to the learning platform is granted	
<b>Actors</b>			Supplier, provider, third party vendors, learner, system administrator, user	
<b>Metrics / Criteria</b>				
<b>Standards</b>				
<b>Annotation / Example</b>				

ID	Category	Process Name	Description	Relations
IM.4	Implementation	Organization of Use	Providing the organizational requirements for the operation of the learning scenario	FA.2, FA.4
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Organizational structure</li> <li>• Qualification of the administration personal</li> <li>• Technical competence and pre-knowledge of users</li> <li>• Support</li> </ul>		
<b>Objective</b>		Providing the operational requirements		
<b>Method</b>				
<b>Result</b>		Implementation of the organizational framework		
<b>Actors</b>		<i>Project Manager, IT Manager, representative of the legal and finance department</i>		
<b>Metrics / Criteria</b>				
<b>Standards</b>				
<b>Annotation / Example</b>				

ID	Category	Process Name	Description	Relations
IM.5	Implementation	Technical Infrastructure	Providing the organizational requirements for the operation of the learning scenario	NA.4, FA.1, FA.5, DP.3, DP.4, IM.1
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Infrastructure components</li> <li>• Data security</li> <li>• Documentation</li> <li>• Support</li> </ul>		
<b>Objective</b>		Providing the organizational requirements for the operation of the learning scenario		
<b>Method</b>		<ul style="list-style-type: none"> <li>• Challenge testing, disaster simulation</li> <li>• Troubleshooting guidelines for technical problem solution and workarounds</li> </ul>		
<b>Result</b>		Providing tested infrastructure <ul style="list-style-type: none"> <li>• Technical configuration summary report</li> <li>• Technical training records</li> <li>• Disaster recovery plan</li> <li>• Completed technical checklists</li> <li>• Vendor audits, Summary Report reviewed by the Change Control Board</li> </ul>		
<b>Actors</b>		Supplier, third party vendors, onsite system administrators		
<b>Metrics / Criteria</b>				
<b>Standards</b>		ISO 9241		
<b>Annotation / Example</b>				

## Learning Process / Realization

ID	Category	Process	Description	Relation
LP		Learning Process	Realization and use of the learning process	
Sub-processes / Sub-aspects		LP.1 Administration LP.2 Activities LP.3 Review of competency levels		
Objective		To perform the learning process		
Method				
Result		Completed process of learning, education and training.		
Actor		<i>Learners, trainers, tutors</i>		
Metrics / Criteria		<i>User performance, user satisfaction</i>		
Standards				
Annotation / Example				

ID	Category	Process	Description	Relation
LP.1	Learning Process	Administration	Description of the administrative requirements and conditions of the learning process	FA; CD; IM
			<ul style="list-style-type: none"> <li>• Information</li> <li>• Consultation of learners</li> <li>• Educational Planning/ qualification requirement analysis</li> <li>• Technical support</li> <li>• Registration</li> <li>• Billing / Accounting</li> <li>• Complaint management</li> <li>• Contract</li> <li>• Certification</li> <li>• Transparency</li> <li>• Organizational context, situative context, social context</li> </ul>	
<b>Sub-processes / Sub-aspects</b>				
<b>Objective</b>			To specify and provide administrative functions according to the needs of the stakeholder of the learning process	
<b>Method</b>			Using the organizational, economical and technological operational concepts	
<b>Result</b>			Realization and documentation of administrative processes	
<b>Actor</b>			<i>Administrator, project management</i>	
<b>Metrics / Criteria</b>				
<b>Standards</b>				
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
LP.2	Learning Process	Activities	Description of the learning, support, and transfer activities	CD, LP.1, LP.3
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Learning activities</li> <li>• Support activities</li> <li>• Transfer activities</li> </ul>		
<b>Objective</b>		Initiation of individual learning processes through learning/support/transfer activities		
<b>Method</b>		Using the learning scenario conception		
<b>Result</b>		Documentation of the observable learning progression and learning activities		
<b>Actor</b>				
<b>Metrics / Criteria</b>		Category 6 of RQC		
<b>Standards</b>		DIN PAS 1032-2, IMS Learning Design		
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relations
LP.3	Learning Process	Review of Competency Level	Activities to determine the competency level	CD.9

EO.4	Evaluation / Optimization	Optimization / Improvement	Description of the adaptation and optimization of products and processes	all categories
<b>Sub-processes / Sub-aspects</b>		<ul style="list-style-type: none"> <li>• Preventive measures</li> <li>• Corrective measures</li> </ul>		
<b>Goal</b>		Maintaining / increasing the efficiency and effectiveness of products and processes on the basis of experiences and recommendations		
<b>Methods</b>				
<b>Results</b>		Documentation and justification of measures for improvement taken	<ul style="list-style-type: none"> <li>• maintenance / improvement of the efficiency and effectiveness of products and processes</li> <li>• preventive measures: adaptation to changed circumstances</li> <li>• corrective measures: implementation of recommendations based on evaluation</li> </ul>	
<b>Actors</b>		Project manager, evaluators, designer, teacher, programmer		
<b>Metrics / Criteria</b>				
<b>Standards</b>				
<b>Annotation / Example</b>		<ul style="list-style-type: none"> <li>• The work group is discussing a differentiation of two processes: preventive and corrective measures; these will be different with respect to input and methods;</li> <li>• Taking into account circumstances, for example with respect to the organization, staff, (technical) resources etc.;</li> <li>• The results of evaluation activities serve as input for improvement of planning and implementation in future projects („lessons learned“)</li> </ul>		

**Annex C**  
(informative)

**French code of practice in E-Learning (AFNOR Z76-001)**

The French code of practice in E-Learning shows how the model can be used with different process models. The processes from the French model can be mapped to RFDQ:

ID	Process	Sub-process(es)	RFDQ ID	RFDQ Process
AN	Analysis	AN1: Strategic analysis / context of demand  AN2: Needs and resources analysis / feasibility of demand	NA  FA	Needs Analysis  Framework Analysis
DC	Design / Construction	DC1: Design of learning system and its environment  DC2: Design of learning resources and material	CD	Conception / Design
IN	Instrumentation	IN1: Choice of material and of technologies  IN2: Implementation of material and technologies  IN3: Definition of maintenance strategies  IN4: Definition of updating strategies	DP  IM	Development / Production  Implementation
RE	Realization	RE1: Negotiation / prescription  RE2: Coaching / Tutoring  RE3: Learning  RE4: Collaboration  RE5: Assessment	LP	Learning Process
EV	Evaluation	EV1: Planning who, what, when, how  EV2: Data collection and analysis  EV3: Recommendations for improvement	EO	Evaluation / Optimization

**Table 3: List of the processes and sub-processes / mapping of RFDQ**

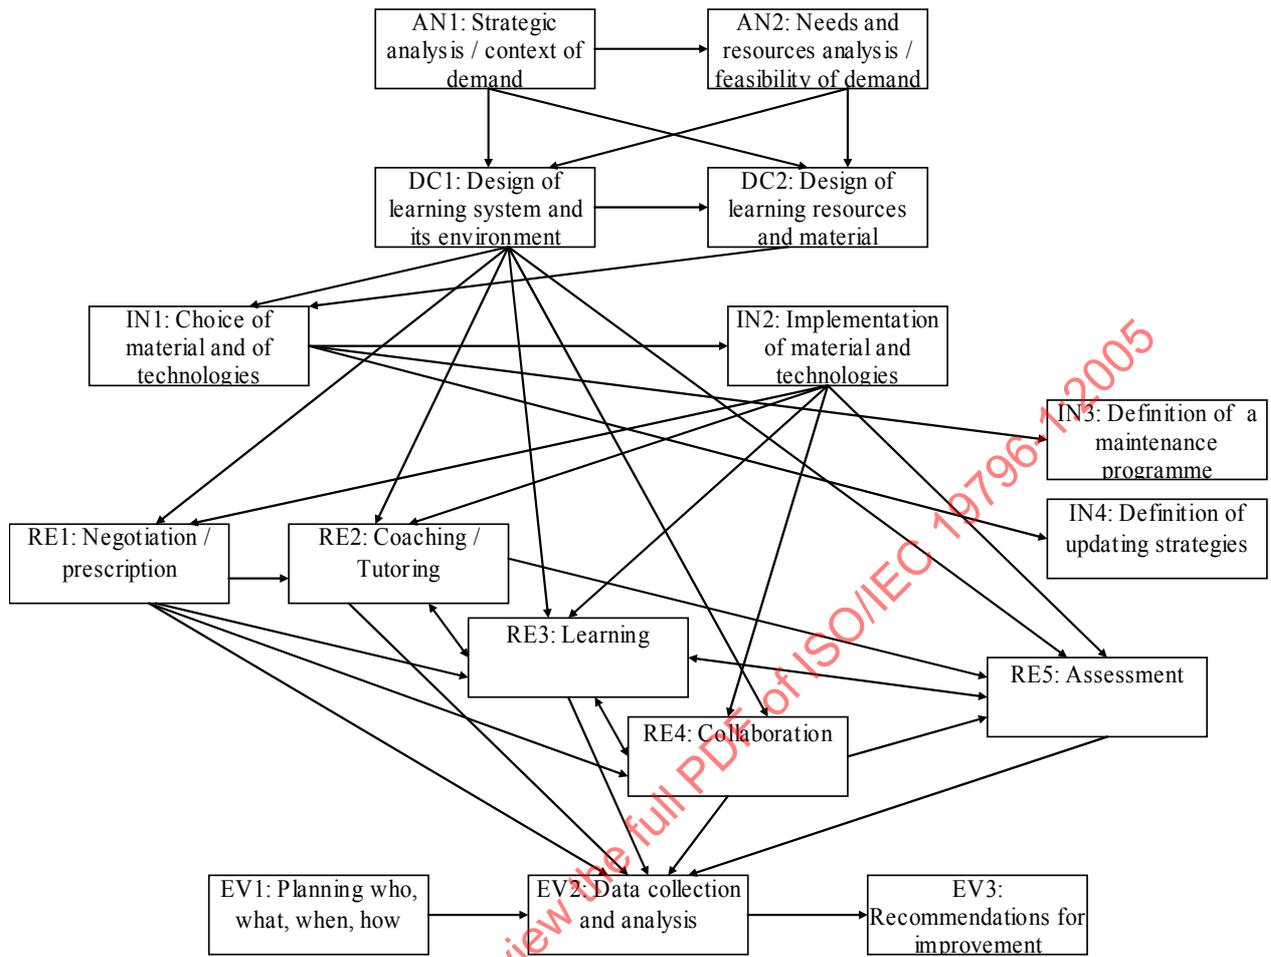

Figure 3: Links between sub-processes

Analysis

ID	Category	Process	Description	Relation
AN		Analysis	In the analysis phase, the context, the needs, requirements, demands, and constraints for the development of an e-learning system are identified and defined.	
<b>Sub-processes / Sub-aspects</b>		AN1: Strategic analysis / context of demand AN2: Needs and resources analysis / feasibility of demand		
<b>Objective</b>		To describe the context and the reasons (the needs and demand) for the development of an e-learning system; the resources available and the constraints for its implementation		
<b>Method</b>		<i>Methods for field research in social and economical sciences, Strategic Analysis, Needs Analysis</i>		
<b>Result</b>		Description of the context, the added value produced and the needs and demand which are met by the development of an e-learning system		
<b>Actors</b>		<i>Project manager; specialists</i>		
<b>Metrics / Criteria</b>				
<b>Standards</b>			<i>Project Management Standards, National Standards AFNOR X50 - 749, 750, 756 and 760</i>	
<b>Annotation / Example</b>

<b>Annotation / Example</b>				

Instrumentation			
ID	Category	Process	Description
IN		Instrumentation	In the instrumentation phase, material, tools and technologies are chosen and implemented, and the maintenance and updating strategies are defined
	<b>Sub-processes / Sub-aspects</b>	IN1: Choice of material and technologies IN2: Implementation of material and technologies IN3: Definition of a maintenance programme IN4: Definition of updating strategies	
	<b>Objective</b>	To chose and implement appropriate technological components being used in the educational system, and to define strategies for maintenance and updating of these components	
	<b>Method</b>		
	<b>Result</b>		
	<b>Actors</b>	<i>Project manager, implementers, IT-specialists</i>	
	<b>Metrics / Criteria</b>		
	<b>Standards</b>		
	<b>Annotation/ Example</b>		
			<b>Relation</b>

ID	Category	Process	Description	Relation
IN1	Instrumentation	Choice of material and technologies	Preparation of decisions concerning the technical components of the learning system: off-the-shelf learning material, tools and technologies.	DC1, DC2, IN2, IN3, IN4
<b>Sub-processes / Sub-aspects</b>		<p>Definition of a set of criteria to select material, tools, technologies...</p> <p>Collection of information about uses from other users, internet forums, ...</p> <p>Preparing the decision about the dilemma: make or buy?</p>		
<b>Objective</b>		To prepare the decisions about technological choices for decision makers		
<b>Method</b>				
<b>Result</b>		Information about advantages and disadvantages of various solutions, a set of criteria and arguments to support the decisions		
<b>Actor</b>		<i>Project manager, consultants, other users</i>		
<b>Metrics / Criteria</b>				
<b>Standards</b>				
<b>Annotation/ Example</b>				

ID	Category	Process Name	Description	Relations
IN2	Instrumentation	Implementation of material and technologies	According to the chosen alternative (make or buy), sub-processes are different: buying and installing equipment, software or material in one case; deciding to use or not Open Source software, developing and testing software tools and material before installing it in the other.	IN1, RE1, RE2, RE3, RE4, RE5
<b>Sub-processes / Sub-aspects</b>		Buying equipments, software and learning material Use of Open Source software Developing and testing tailor-made material and software tools Installing the equipment, software, material		
<b>Objective</b>		To buy or develop the technical components of the system, and to install them		
<b>Method</b>		<i>In case of tailor-made software, use of Software development methodologies is highly recommended</i>		
<b>Result</b>		Operational technological components of the learning system		
<b>Actors</b>		<i>Project Manager, Software Developers, Documentation Specialists, IT technicians, Media specialist, test persons of the target group...</i>		
<b>Metrics / Criteria</b>				
<b>Standards</b>		<i>W3C recommendations, AICC, SCORM, Metadata models (IEEE 1484.12.1:2003-Learning Object Metadata)</i>		
<b>Annotation / Example</b>				

ID	Category	Process Name	Description	Relations
IN3	Instrumentation	Definition of a maintenance programme	The definition of a maintenance programme is part of the implementation process	/N1
<b>Sub-processes / Sub-aspects</b>		Choosing between prevention and repair Definition of a maintenance programme		
<b>Objective</b>		To define a maintenance programme		
<b>Method</b>				
<b>Result</b>		A Maintenance programme		
<b>Actors</b>		<i>Project manager, IT specialists</i>		
<b>Metrics / Criteria</b>				
<b>Standards</b>				
<b>Annotation / Example</b>				

ID	Category	Process Name	Description	Relations
IN4	Instrumentation	Definition of updating strategies	Definition of updating strategies is also part of the implementation process	IN1
<b>Sub-processes / Sub-aspects</b>		Monitor technological changes and evolution of uses or changes in users practices Organising technological watch		
<b>Objective</b>		To be able to anticipate technological obsolescence by watching the evolutions and planning systematic updating		
<b>Method</b>				
<b>Result</b>		An updating plan for technological components		
<b>Actors</b>		<i>Project manager, IT specialists</i>		
<b>Metrics / Criteria</b>				
<b>Standards</b>				
<b>Annotation / Example</b>

## Realization

ID	Category	Process	Description	Relation
RE		Realization	In the realization phase, the learning system and its environment are in use; and a set of activities are performed by various actors in order to achieve the expected result: learning.	
<b>Sub-processes / Sub-aspects</b>		RE1: Negotiation / prescription RE2: Coaching / tutoring RE3: Learning RE4: Collaboration RE5: Assessment		
<b>Objective</b>		To describe the activities performed by various actors contributing to the success of the learning process		
<b>Method</b>				
<b>Result</b>		Learning		
<b>Actor</b>		<i>Learners, trainer or teachers, tutors or coaches, administrative staff, counsellors</i>		
<b>Metrics / Criteria</b>		User performance, user satisfaction		
<b>Standards</b>				
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
RE1	Realization	Negotiation / prescription	The learner is informed, an individual training path is prescribed, and a contract confirms the agreement	DC1, IN2, RE2, RE3, RE4, EV2
<b>Sub-processes / Sub-aspects</b>		Information of the learner Prescription of an individual learning path (eventually taking into account prior learning assessment) Proposal of a contract presenting the conditions proposed for learning, the objectives, the support available, etc.		
<b>Objective</b>		To evaluate and propose the conditions for successful learning		
<b>Method</b>				
<b>Result</b>		A contract and the administrative data about the learner		
<b>Actor</b>		<i>Administrative staff, trainers or teachers, learners</i>		
<b>Metrics / Criteria</b>				
<b>Standards</b>		Standards for learner information (AFNOR X50-760), Quality standards (ISO 9000:2000)...		
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
RE2	Realization	Coaching / tutoring	The type of support and the way it is provided are described here	DC1, IN2, RE1, RE3, RE5, EV2
			Implementing a given combination of support types (pedagogical, didactical, methodological, technical, administrative...) Implementing the support tools	
<b>Sub-processes / Sub-aspects</b>				
<b>Objective</b>			To support the learner and the learning process	
<b>Method</b>				
<b>Result</b>			Implementation of support in order to facilitate the learning process	
<b>Actor</b>			<i>Learners, tutor or coach</i>	
<b>Metrics / Criteria</b>				
<b>Standards</b>				
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
RE3	Realization	Learning	The learning process is described here	DC1, IN2, RE1, RE2, RE4, RE5, EV2
<b>Sub-processes / Sub-aspects</b>		Setting the learning environment Use of material and support tools Relations with tutor and coach Relations with other learners		
<b>Objective</b>		To learn		
<b>Method</b>				
<b>Result</b>		Acquisition of knowledge and skills		
<b>Actor</b>		<i>Learners, tutor or coach, teacher or trainer...</i>		
<b>Metrics / Criteria</b>				
<b>Standards</b>				
<b>Annotation / Example</b>

ID	Category	Process	Description	Relations
RE4	Realization	Collaboration	Relations with other learners and collaborative work facilities are described here	DC1, IN2, RE1, RE3, RE5, EV2
<b>Sub-processes / Sub-aspects</b>		Encouraging and monitoring collaborative activities Use of collaborative technologies		
<b>Objective</b>		To develop collaborative learning situation in order to enhance the learning process		
<b>Method</b>				
<b>Result</b>		Collaborative activities		
<b>Actor</b>		Learners, tutor or coach, teacher or trainer...		
<b>Metrics / Criteria</b>				
<b>Standards</b>				
<b>Annotation / Example</b>				

IECNORM.COM · Click to view the full PDF of ISO/IEC 19796-1:2005

ID	category	Name of process	Description of process	Relation
RE5	Realization	Assessment	Description of activities to promote the transfer of lessons learned into a professional/everyday context	DC1, IN2, RE2, RE3, RE4, EV2
<b>Sub-processes / Sub-aspects</b>		Definition of indicators and value scales for marks and appreciations Self evaluation Production expected from the learner in assessments External Evaluation		
<b>Objective</b>		To validate acquired knowledge and skills		
<b>Methods</b>				
<b>Result</b>		Marks, appreciations, and eventually at the end, certification or diploma		
<b>Actor</b>		<i>Learners, teachers or trainers</i>		
<b>Metrics /Criteria</b>				
<b>Standards</b>		Standards for certification, diplomas...		
<b>Annotation / Example</b>				

## Evaluation

ID	Category	Process	Description	Relation
EV		Evaluation	The evaluation methods, principles and procedures are defined here	
<b>Sub-processes / Sub-aspects</b>		EV1: Planning who, what, when, how EV2: Data collection and analysis EV3: Recommendations for improvement		
<b>Objective</b>		To define the evaluation process of the learning system		
<b>Method</b>		<i>Questionnaire, User tracking, Interviews ...</i>		
<b>Result</b>		An evaluation of the learning system		
<b>Actor</b>		<i>Evaluators, learners, tutors or coaches, teachers or trainers</i>		
<b>Metrics / Criteria</b>				
<b>Standards</b>				
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
EV1	Evaluation	Planning who, what, when, how	Who evaluates, what to evaluate, when and how evaluate are described here	EV2 and all categories for other processes
<b>Sub-processes / Sub-aspects</b>		Defining who, what, when, how to evaluate Tracking learner's activities and automation of the evaluation of certain parameters Measurement of ROI		
<b>Objective</b>		To plan the evaluation of the learning system		
<b>Methods</b>		<i>Documents analysis, interviews, questionnaires, measurement of satisfaction, testing, statistical analysis...</i>		
<b>Result</b>		Detailed plan on how to proceed with the evaluation		
<b>Actor</b>		<i>Evaluators</i>		
<b>Metrics /Criteria</b>		According to the process evaluated: Operational partnerships, improvement of cost / benefit ratio, acceptance by the actors, efficiency (of the learning system, of technologies, of collaboration tools...)		
<b>Standards</b>				
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
EV2	Evaluation	Data collection and analysis	Description of the main focus for evaluating each processes	EV1, RE1, RE2, RE3, RE4, RE5 and all categories for other processes
<b>Sub-processes / Sub-aspects</b>		Analysis of strategic results Analysis of the construction process Analysis of the instrumentation process Analysis of the realization process Cost analysis		
<b>Objective</b>		To get the relevant data for each process, and to analyse them		
<b>Methods</b>		<i>Documents analysis, interviews, questionnaires, measurement of satisfaction, testing, statistical analysis...</i>		
<b>Result</b>		Evaluation reports for each process		
<b>Actor</b>		<i>Evaluators</i>		
<b>Metrics / Criteria</b>		According to the process evaluated: Operational partnerships, improvement of cost / benefit ratio, acceptance by the actors, efficiency (of the learning system, of technologies, of collaboration tools...)		
<b>Standards</b>				
<b>Annotation / Example</b>				

ID	Category	Process	Description	Relation
EV3	Evaluation	Recommendations for improvement	At the final stage, the strengths and weaknesses of the learning system and of its environment are identified and recommendations for improvement made	EV2, and all categories for other processes
		Providing recommendations		
<b>Sub-processes / Sub-aspects</b>		Disseminating the results and the recommendations Setting an action plan for improvement		
<b>Objective</b>		To improve the learning system		
<b>Methods</b>				
<b>Result</b>		Recommendations, action plan for improving the learning system		
<b>Actor</b>		<i>Evaluators, all actors involved</i>		
<b>Metrics /Criteria</b>				
<b>Standards</b>				
<b>Annotation / Example</b>				

## Annex D (informative)

### Reference Quality Criteria (RQC) DIN PAS 1032-1

A comprehensive list of reference criteria for the assurance of quality of learning products is provided in the criteria catalogue. The catalogue contains as well functional as media and learning psychology related reference criteria. Furthermore, it includes criteria related to data security and (special marked) criteria related to national laws in the area of distance learning.

These criteria can be used for assessment and evaluation within the process model, described in 3.2. Only criteria which are suitable for a certain context should be used. Hence, the criteria just provide a comprehensive list – when implementing a quality management or quality assurance system, adequate criteria can be chosen from this list.

The reference catalogue shall provide a common basis to build country and domain specific catalogue profiles. These profiles contain a relevant selection of criteria and can specify priorities e.g. by marking criteria as “must-criteria”. Such a criteria profile based on the reference catalogue is deployed in the evaluation of processes based on the process reference model. For this purpose each process specification in the process reference model contains a reference to the relevant section of the reference criteria catalogue. Furthermore the reference catalogue can be applied to create criteria profiles

- which allow comparisons of learning products.
- which support certification of learning products (according to quality standards).

When learning products are software products, ISO 9241 applies to the learning product. For that reason the 213 criteria of ISO 9241 are building the first section of the reference catalogue. Additionally, 480 criteria were collected, which are specific to learning products.

The list of reference criteria is structured into catalogue sections, to allow easier access to certain criteria. Each criterion appears only once in the catalogue. A criteria profile however may use another structure.

Criteria of ISO 9241 are evaluative. The reference criteria of the other sections are however evaluative and descriptive (see table below).

SectionNo.	Section/Category	No of criteria	No of descriptive criteria
2	General Conditions	101	32
3	Technical Aspects	103	23
4	Data storage and Data processing	37	14
5	Functionalities	69	29
6	Theoretical Aspects	80	17
7	Encoding of Information	59	3
8	Special modes of presentation	31	0
	Total	480	118

**Table 4 — Criteria specific to learning products**

For example screen design criteria of ISO 9241 are evaluative. Red typing on a blue screen is a mistake in screen design (color criteria) after ISO 9241. In contrast a criteria such as “Availability of tutors” cannot be evaluated out of context of the whole learning product. Nevertheless the description concerning this criterion provided to the potential user is important for the evaluation of a product. Information provided to a descriptive criteria can be evaluated e.g. if a provider claims that a tutor is available daily between 9am-5pm.

The reference criteria are neutral concerning didactical and media and learning psychology related models and theories. The catalogue rather provides a set of criteria which have to be fulfilled, when a provider claims that a learning product follows the approach of e.g. explorative learning.

The structure of the catalogue is shown by example of the criteria 5.4.2.4 (Section 5 - Functionalities, Subsection 4 - Communication, Subsubsection 2 - asynchronous communication):

No	Criterion	Description/ Operationalization	Value space	Comments, Explanations
5.4.2.4	Support of asynchronous communication by enabling learners to share/publish data	<i>Which type of data can be published/shared by learners?</i>  <i>For which type of data are publication/authoring tools offered for learners?</i>	a) selection (none, plain text, formatted text, images, audio, video, other)  b) selection (none, for plain text, for formatted text, for Web-pages, image editing, audio editing, video editing, other)	The possibility to share different kind of data among learners supports the communication and learning process, especially for group and project oriented learning styles. For example learner web-pages or shared file directories facilitate the exchange of data. A basic form of data exchange would be the exchange of ascii-text through Email.  Standard Authoring and publication tools facilitate the exchange of data among learners. For example conflicts of data formats are avoided, when learners use the tools offered by the learning product instead of using a variety of tools.

The full list is provided in the following table.

ID	Bezeichnung	Description	descriptive (d) evaluative (e)
1.	Bestehende Normen – Software-Ergonomie	existing norms – software ergonomics	
1.1	Visuelle Anzeige (29 241-3)	visual visualisation (9241-3)	e
