1996-10-15

AMENDMENT 1
1997-12-15

Information technology — Open Systems Interconnection — Connection-oriented protocol for the Association Control Service Element: Protocol specification

AMENDMENT 1: Incorporation of extensibility markers

Technologies de l'information — Interconnexion de systèmes ouverts (OSI) — Protocole en mode orienté connexion pour l'élément de service de contrôle d'association: Spécification du protocole

AMENDEMENT 1: Incorporation de marqueurs d'extensibilité

Reference number
ISO/IEC 8650-1:1996/Amd.1:1997(E)

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Amendment 1 to International Standard ISO/IEC 8650-1:1996 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 21, *Open systems interconnection, data management and open distributed processing*, in collaboration with ITU-T. The identical text is published as ITU-T Rec. X.227/Amd.1.

Introduction

This amendment to the connection-oriented ACSE protocol specification includes the ASN.1 extensibility marker in the module describing the protocol.

INTERNATIONAL STANDARD

ITU-T RECOMMENDATION

INFORMATION TECHNOLOGY – OPEN SYSTEMS INTERCONNECTION – CONNECTION-ORIENTED PROTOCOL FOR THE ASSOCIATION CONTROL SERVICE ELEMENT: PROTOCOL SPECIFICATION

AMENDMENT 1
Incorporation of extensibility markers

1) Subclause 2.1

Add the following reference.

– ITU-T Recommendation X.501 (1993) | ISO/IEC 9594-2:1995, *Information Technology – Open Systems Interconnection – The Directory: Models*.

2) Subclause 9.1

Replace the ASN.1 module with the following:

```
ACSE-1 { joint-iso-itu-t association-control(2) modules(0) apdus(0) version1(1) }
-- ACSE-1 refers to ACSE version 1

DEFINITIONS ::=

            ae-qualifier-form1                      AE-qualifier-form1,
            ae-qualifier-form2                      AE-qualifier-form2,
            ... }
-- When both AP-title and AE-qualifier data values are present in an AARQ or AARE APDU, both must
-- have the same form to allow the construction of an AE-title as discussed in CCITT Rec. X.665 |
-- ISO/IEC 9834-6.

AP-title-form1 ::= Name
-- The value assigned to AP-title-form1 is The Directory Name of an application-process title.

AE-qualifier-form1 ::= RelativeDistinguishedName
-- The value assigned to AE-qualifier-form1 is the relative distinguished name of a particular
-- application-entity of the application-process identified by AP-title-form1.

AP-title-form2 ::= OBJECT IDENTIFIER

AE-qualifier-form2 ::= INTEGER

AE-title ::= CHOICE {
            ae-title-form1                          AE-title-form1,
            ae-title-form2                          AE-title-form2,
            ...         }
```

```
-- As defined in CCITT Rec. X.650 | ISO 7498-3, an application-entity title is composed of an application-
-- process title and an application-entity qualifier. The ACSE protocol provides for the transfer of an
-- application-entity title value by the transfer of its component values. However, the following data type
-- is provided for International Standards that reference a single syntactic structure for AE titles.

        AE-title-form1 ::= Name
-- For access to The Directory (ITU-T Rec. X.500-Series | ISO/IEC 9594), an AE title has AE-title-form1.
-- This value can be constructed from AP-title-form1 and AE-qualifier-form1 values contained in an
-- AARQ or AARE APDU. A discussion of forming an AE-title-form1 from AP-title-form1 and AE-qualifier-
-- form1 may be found in CCITT Rec. X.665 | ISO/IEC 9834-6.

        AE-title-form2 ::= OBJECT IDENTIFIER
        -- A discussion of forming an AE-title-form2 from AP-title-form2 and AE-qualifier-form2 may be
        -- found in CCITT Rec. X.665 | ISO/IEC 9834-6.

        AE-invocation-identifier ::= INTEGER

        AP-invocation-identifier ::= INTEGER
        -- End of Application-entity title productions

        Associate-result ::= INTEGER
              { accepted (0),
              rejected-permanent (1),
              rejected-transient (2)
               } (0..2, ...)

        Associate-source-diagnostic ::= CHOICE
         { acse-service-user                    [1] INTEGER
                                                { null (0),
                                                 no-reason-given (1),
                                                application-context-name-not-supported (2),
                                                calling-AP-title-not-recognized (3),
                                                calling-AP-invocation-identifier-not-recognized (4),
                                                calling-AE-qualifier-not-recognized (5),
