AMENDMENT 1
1998-09-01

Passenger car tyres — Verifying tyre capabilities — Laboratory test methods

AMENDMENT 1

*Pneumatiques pour voitures particulières — Vérification de l'aptitude des
pneumatiques — Méthodes d'essai en laboratoire*

AMENDEMENT 1

Reference number
ISO 10191:1995/Amd.1:1998(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Amendment 1 to ISO 10191:1995 was prepared by Technical Committee ISO/TC 31, *Tyres, rims and valves*, Subcommittee SC 3, *Passenger car tyres and rims*.
