UDC 678.743.22 : 531.754.2

Ref. No. ISO 1068-1975 (E)

Descriptors : plastics, thermoplastic resins, polyvinyl chloride, physical tests, bulk density, measurement.

Price based on 2 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 61 has reviewed ISO Recommendation R 1068 and found it technically suitable for transformation. International Standard ISO 1068 therefore replaces ISO Recommendation R 1068-1969 to which it is technically identical.

ISO Recommendation R 1068 was approved by the Member Bodies of the following countries :

Australia	Hungary	Romania
Austria	India	South Africa, Rep. of
Belgium	Iran	Spain
Bulgaria	Israel	Sweden
Canada	Italy	Switzerland
Czechoslovakia	Japan	Turkey
Egypt, Arab Rep. of	Korea, Rep. of	United Kingdom
France	Netherlands	U.S.A.
Germany	New Zealand	Yugoslavia
Greece	Poland	

No Member Body expressed disapproval of the Recommendation.

The Member Body of the following country disapproved the transformation of ISO/R 1068 into an International Standard :

Canada

Plastics – PVC resins – Determination of compacted apparent bulk density

ERRATUM

Outside front cover :

- a) Replace the English title by :

“Plastics – Homopolymer and copolymer resins of vinyl chloride – Determination of compacted apparent bulk density”.

- b) Replace the French sub-title by :

“Plastiques – Résines d’homopolymères et de copolymères de chlorure de vinyle – Détermination de la masse volumique apparente du produit tassé”.

Page 1

- a) Replace the title by :

“Plastics – Homopolymer and copolymer resins of vinyl chloride – Determination of compacted apparent bulk density”.

- b) Replace the third line of clause 1 by :

“homopolymer and copolymer resins of vinyl chloride.”

- c) Replace the note to clause 1 by :

“NOTE – The non-compacted apparent bulk density may be determined by the method specified in ISO 60, *Plastics – Determination of apparent density of material that can be poured from a specified funnel.*”
