AMENDMENT 1  
2013-07-15

---

---

**Gas cylinders — Refillable seamless  
steel tubes for compressed gas  
transport, of water capacity  
between 150 l and 3 000 l — Design  
construction and testing**

**AMENDMENT 1: Requirements for  
design of tubes for embrittling gases**

*Bouteilles à gaz — Tubes en acier sans soudure rechargeables  
d'une contenance en eau de 150 l à 3 000 l pour le transport des  
gaz comprimés — Conception, construction et essais*

*AMENDEMENT 1: Exigences de conception des tubes destinés aux  
gaz fragilisants*

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. [www.iso.org/directives](http://www.iso.org/directives)

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received. [www.iso.org/patents](http://www.iso.org/patents)

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

The committee responsible for this document is ISO/TC 58, *Gas cylinders*, Subcommittee SC 3, *Cylinder design*.
