
**Optics and optical instruments —
Microscopes — Interfacing connection for
35 mm SLR photo cameras (T-thread
adaptation)**

*Optique et instruments d'optique — Microscopes — Raccord d'interface
pour appareils photographiques SLR de 35 mm (adaptateur à filetage en T)*

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 11882 was prepared by Technical Committee ISO/TC 172, *Optics and optical instruments*, Subcommittee SC 5, *Microscopes and endoscopes*.

Optics and optical instruments — Microscopes — Interfacing connection for 35 mm SLR photo cameras (T-thread adaptation)

1 Scope

This International Standard gives specifications for the photo exit port of microscopes for connecting 35 mm single-lens reflecting (SLR) photo cameras (T-thread adaptation), without the associated 35 mm camera lens, with reference to the projected microscope image plane.

The adaptation of the 35 mm SLR photo cameras is obtained using camera-specific adapters which are not included in the scope of this International Standard.

2 Requirements

The connecting dimensions of the 35 mm SLR photo camera interface shall be as shown in figure 1.

3 Fitting arrangement for a 35 mm SLR photo camera

The fitting arrangement for a 35 mm SLR photo camera with an intermediate mechanical adapter shall be as shown in figure 2.

Dimensions in millimetres

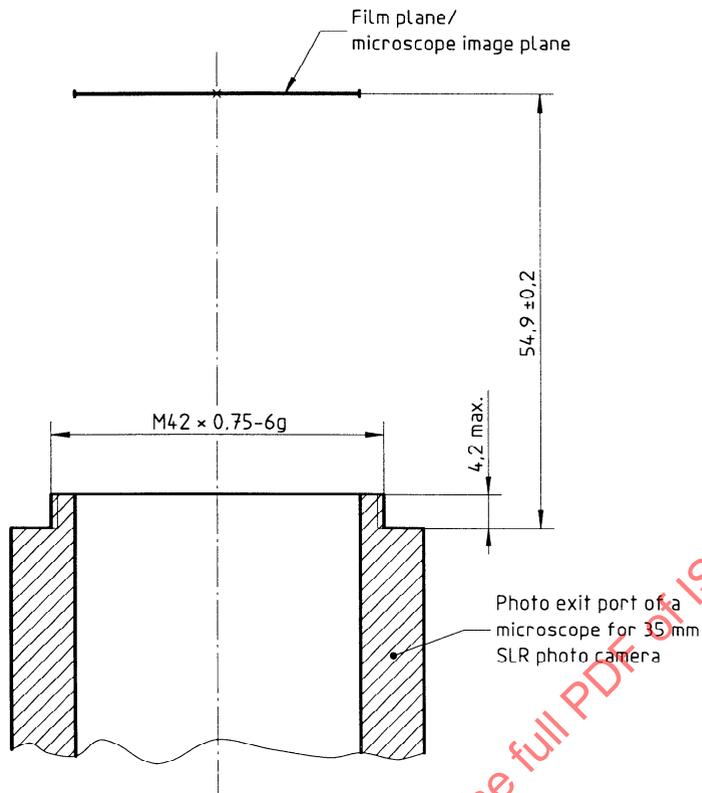

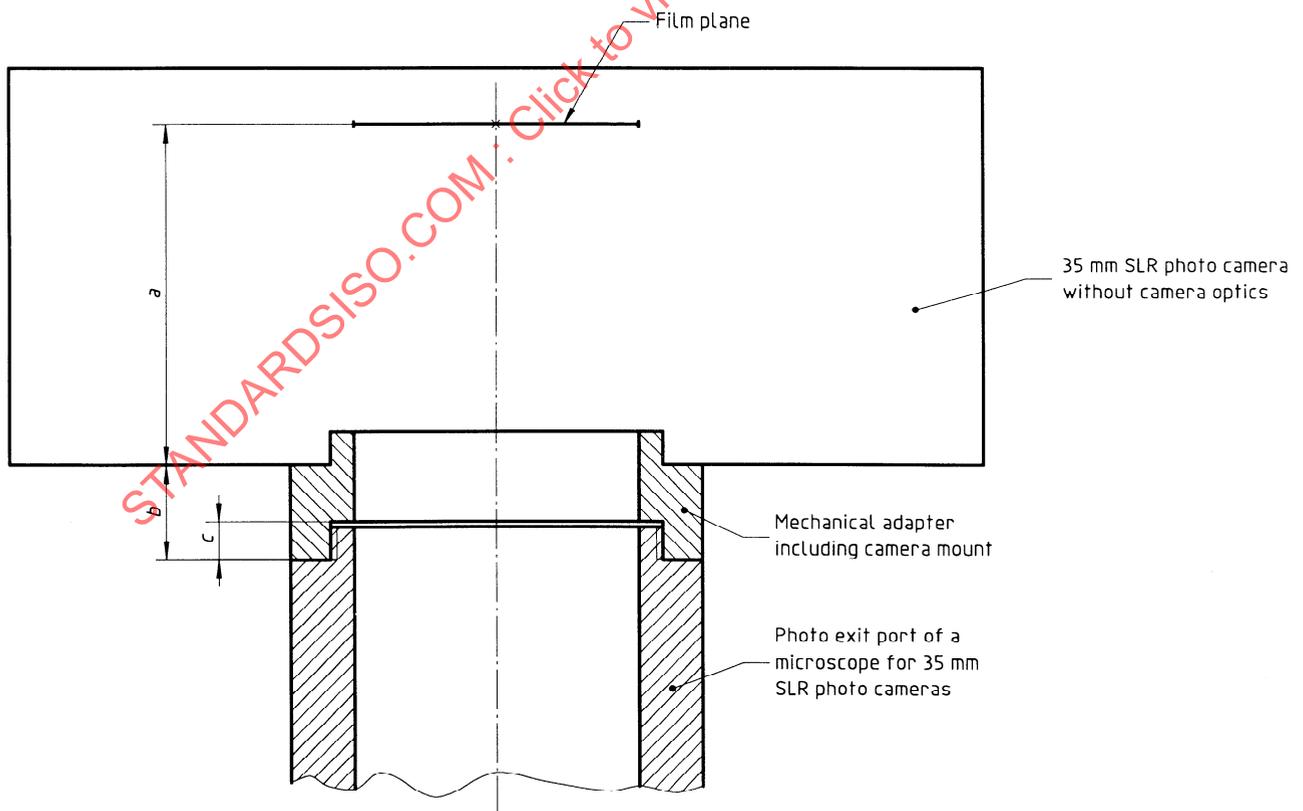

Figure 1

$a + b = (54,9 \pm 0,2) \text{ mm}$

$c \geq 4,5 \text{ mm}$
