FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 42 has reviewed ISO Recommendation R 1203 and found it suitable for transformation. International Standard ISO 1203 therefore replaces ISO Recommendation R 1203-1971.

ISO Recommendation R 1203 was approved by the Member Bodies of the following countries :

Belgium	Israel	Switzerland
Chile	Italy	Thailand
Czechoslovakia	Japan	United Kingdom
France	Korea, Rep. of	U.S.A.
Germany	South Africa, Rep. of	
Greece	Sweden	

No Member Body expressed disapproval of the Recommendation.

The Member Body of the following country disapproved the transformation of ISO/R 1203 into an International Standard :

Japan

Photography — Roll film cameras — Back window location and picture sizes

1 SCOPE AND FIELD OF APPLICATION

This International Standard specifies the location of back windows of roll film cameras in relation to the number of exposures and film sizes they are designed to accommodate, and specifies the picture sizes produced.

2 BACK WINDOW LOCATION

The locating dimensions shown in the figure are given in table 1.

3 PICTURE SIZES

The picture sizes corresponding to the nominal roll film negative sizes are given in table 2.
