Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 130, *Graphic technology*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Graphic technology — Determination of the energy consumption of digital printing devices including transitional and related modes

AMENDMENT 1

3.30, definition

Replace the definition with the following:

digital printing device being measured

4.3.2.6, heading title

Replace the title of subclause with the following:

Production print (BP)

Figure 3, key table

Replace the key table in Figure 3 with the following:

Key

X	time, *t*
1 to 16	number of imposed pages on output sheets
a	Print start.
b	FPPT1, i.e. FPPT from print-ready mode.
c	Print-ready mode reached.
d	FPPT 2, i.e. FPPT from off mode.
e	Warm-up time, i.e. difference between FPPT 1 and FPPT 2.
f	FPPT 3, i.e. FPPT from sleep mode.
g	Recovery time, i.e. difference between FPPT 1 and FPPT 3.

4.5.4, last sentence

Replace the last sentence with the following:

Explanations for each mode, 1 to 12, are given in the following Table 1.

4.6.2, where table

Replace the explanation on the symbols of Formula (2) with the following:

where

t is the time expressed with the unit h;

N is the actual number of printed pages.

4.7.1, second sentence

Replace the second sentence of the subclause under Table 4 with the following:

AL is for other combinations than BQ, BP or BQ/BP, e.g. duplex production printing or small format devices.

Annex A, Table 1

Replace the row on ambient conditions in Table A.1 by the following:

Ambient conditions			
Temperature	°C to °C	Relative humidity	% to %
