Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 310 was developed by Technical Committee ISO/TC 65, *Manganese and chromium ores*.

This second edition was submitted directly to the ISO Council, in accordance with clause 5.10.1 of part 1 of the Directives for the technical work of ISO. It cancels and replaces the first edition (i.e. ISO 310-1975), which had been approved by the member bodies of the following countries :

Austria	Hungary	Poland
Bulgaria	India	Portugal
Chile	Ireland	Romania
Czechoslovakia	Italy	South Africa, Rep. of
France	Japan	United Kingdom
Germany, F. R.	Netherlands	USSR

No member body had expressed disapproval of the document.
