Ref. No. ISO 3637-1977 (E)

Descriptors : textiles, clothing, garments, outerwear garments, women, dimensions, designation, labelling.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3637 was developed by Technical Committee ISO/TC 133, *Sizing systems and designations for clothes*, and was circulated to the member bodies in October 1975.

It has been approved by the member bodies of the following countries :

Australia	Iran	Spain
Brazil	Israel	Sweden
Denmark	Mexico	Switzerland
Finland	Netherlands	Turkey
France	New Zealand	U.S.A.
Hungary	Romania	U.S.S.R.
India	South Africa, Rep. of	Yugoslavia

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Canada	Japan
Germany	Poland
Italy	

Size designation of clothes – Women's and girls' outerwear garments

0 INTRODUCTION

This International Standard is one of a series which deals essentially with the size designation of clothing, and is not directly concerned with sizing systems as such.

The primary aim of this and other International Standards in this series is the establishment of a size designation system that indicates (in a simple, direct and meaningful manner) the body size of the woman or girl that a garment is intended to fit. Provided that the shape of her body (as indicated by the appropriate dimensions) has been accurately determined, this system will facilitate the choice of garments that fit.

The size designation system is based on body and not garment measurements. Choice of garment measurements is normally left to the designer and the manufacturer, who are concerned with style, cut and other fashion elements, and who must make due allowance for garments normally worn beneath a specific outer garment.

Definitions and body measurement procedure are prescribed in ISO 3635, which is applicable to all categories of clothing.

1 SCOPE AND FIELD OF APPLICATION

This International Standard establishes a system of designating the sizes of women's and girls' outerwear

garments (including knitwear and swimwear) that are classified as

- a) covering the upper or the whole body, or
- b) covering the lower body only,

and applies to civilian and uniform garments.¹⁾

Both the control dimensions on which the size designation system is based and the method of indicating the size designation on a garment label are laid down.

2 REFERENCE

This International Standard should be read in conjunction with the following International Standard :

ISO 3635, *Size designation of clothes – Definitions and body measurement procedure.*

3 DEFINITIONS

For the purposes of this International Standard, the definitions given in ISO 3635 and the following definitions apply :

3.1 woman : A female person whose growth in height is finished.

3.2 girl : A female person whose growth in height is not yet finished.

1) Examples of garments covered by this International Standard are given in the annex.

4 CONTROL DIMENSIONS

The control dimensions shall be as follows :

a) Women's garments covering the upper or the whole body :

Other than knitwear and swimwear	Knitwear	Swimwear
1) Bust girth	Bust girth	Bust girth
2) Hip girth		Hip girth
3) Height		

b) Women's garments covering the lower body only :

- 1) Hip girth
- 2) Waist girth
- 3) Outside leg length

c) Girls' garments covering the upper or the whole body :

Other than knitwear and swimwear	Knitwear	Swimwear
1) Height	Bust girth	Bust girth
2) Bust girth	Height	Hip girth
3) Hip girth		

d) Girls' garments covering the lower body only :

- 1) Height
- 2) Hip girth
- 3) Waist girth

with the descriptive words such as height, hip girth, etc., alongside, in the order in which they are given in clause 4.

NOTE – The above requirements shall not preclude the use, in exceptional instances and as specified by the national standards organization concerned, of

- a) size designations comprising only one or two of the applicable control dimensions;
- b) size designations shown as a range by stating the minimum and maximum control measurements separated by an oblique stroke or a hyphen.

5.2 Garment measurements shall not be incorporated in the size designation but, where considered of value, garment measurements may be indicated separately (see 6.3).

6 LABELLING

6.1 Method

The size designation of each garment shall be indicated clearly, conspicuously and in plainly legible form on a label, or on a swing ticket, or on both. Pictograms shall be large enough to ensure immediate understanding and numerals shall, in all cases, be readily discernible.

6.2 Attachment

The label or swing ticket shall be securely attached to the garment and so positioned as to be easily readable.

6.3 Additional information

Information additional to the size designation may be separately indicated on the label, or on the swing ticket, or on both, provided that it does not in any way reduce the prominence and conspicuousness of the size designation. Such additional information may include a size code number, body measurements, or garment measurements considered to constitute useful information.

6.4 Examples of labels

The examples of labels given in figures 1 and 2 illustrate methods of labelling that range from the simple indication on the standard pictogram of the relevant control dimensions to more elaborate forms that provide additional information, such as a garment measurement or a size code number. Where the size designation is supplemented by a size code number, separation of the two, as illustrated, renders the size code number readily recognizable as being part of a system of size designation adopted by a national or limited population group only.

5 SIZE DESIGNATION

5.1 The size designation of each garment shall comprise the control dimensions (see clause 4), in centimetres, of the intended wearer of that garment. Where practicable, the standard pictogram, as given in ISO 3635, should be used as a means of indicating the size designation. Where it is not practicable to use the standard pictogram the numerical values of the control dimensions shall be given, together

a) Woman's jacket

or

BUST GIRTH	96
HIP GIRTH	104
HEIGHT	164

b) Woman's coat

or

BUST GIRTH	100
HIP GIRTH	108
HEIGHT	170 – 176
COAT LENGTH	96
