FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 72 has reviewed ISO Recommendation R 365 and found it technically suitable for transformation. International Standard ISO 365 therefore replaces ISO Recommendation R 365-1967 to which it is technically identical.

ISO Recommendation R 365 was approved by the Member Bodies of the following countries :

Australia	Germany	Portugal
Austria	Greece	Spain
Brazil	Italy	Switzerland
Bulgaria	Japan	Turkey
Chile	Netherlands	United Kingdom
Czechoslovakia	New Zealand	U.S.S.R.
France	Poland	

The Member Body of the following country expressed disapproval of the Recommendation on technical grounds :

India

The Member Bodies of the following countries disapproved the transformation of ISO/R 365 into an International Standard :

Belgium
France
Germany
Poland

Textile machinery and accessories – Twin wire healds for Jacquard weaving – Dimensions

1 SCOPE AND FIELD OF APPLICATION

This International Standard specifies the dimensions of twin wire healds for Jacquard weaving.

2 DIMENSIONS

- b width of upper end loop
- b_2 width of inset mail
- b_3 diameter of lower end loop
- d thickness of wire
- h length of upper end loop
- h_2 length of inset mail
- L distance inside end loops
- L_1 distance from upper end loop to the centre of inset mail

Dimensions in millimetres

Basic dimensions						Co-ordinated dimensions	
L	L_1	d No.1)	$h_2 \times b_2$ No.1)		$h \times b$	L/L_1	
						350/150	400/190
350	150	0,25	34	2,4 × 0,9	301/2sR	4 × 2	X
		0,3	32	2,6 × 0,9	1010R	4 × 2	X
400	190	0,35	30	3,2 × 1,3	1015R	4 × 2	X
		0,4	28	4 × 1,5	1020R	5 × 2,5	X
				5,2 × 2,3	355R	5 × 2,5	X
0,5	26	5,6 × 2,7	380R	5 × 2,5		X	
		6,6 × 3,9	1080R	5 × 2,5		X	

1) The gauge and mail numbers are given for information only.
