INTERNATIONAL ORGANIZATION FOR STANDARDIZATION

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 3767-3 was prepared by Technical Committee ISO/TC 23, *Tractors and machinery for agriculture and forestry*.

Users should note that all International Standards undergo revision from time to time and that any reference made herein to any other International Standard implies its latest edition, unless otherwise stated.

Tractors, machinery for agriculture and forestry, powered lawn and garden equipment — Symbols for operator controls and other displays —

Part 3:

Symbols for powered lawn and garden equipment

0 Introduction

This document is part 3 of ISO 3767 covering symbols for operator controls, and symbols other than for operator controls, with the following parts:

Part 1: Common symbols.

Part 2: Symbols for agricultural tractors and machinery.

Part 3: Symbols for powered lawn and garden equipment.

Part 4: Symbols for forestry machinery.

1 Scope and field of application

This part of ISO 3767 establishes symbols for use on powered lawn and garden equipment. These symbols complement those established in ISO 3767-1, and are divided into two groups:

Group 1: Symbols for operator controls.

Group 2: Symbols other than for operator controls (under study).

For additional symbols specific to agricultural tractors and machinery, see ISO 3767-2, and for forestry machinery, see ISO 3767-4. (See also ISO 3789-1 and ISO 3789-3 for location and method of operation of operator controls.)

3 General

3.1 The symbols shall be as shown in the table in 4.7, except for alterations necessary to reproduce an accurate representation in the operator's line of sight.

3.2 If, in a symbol, a machine or parts of the machine are shown in a side view a machine driving from right to left shall be assumed.

3.3 Symbols on controls shall be of good contrast to their background.

4 Symbols for operator controls

4.1 The symbols in this clause are for use on powered lawn and garden equipment, and relate to the operation of operator controls.
