**Metallic powders, excluding powders for hardmetals —
Determination of compressibility in uniaxial compression**

TECHNICAL CORRIGENDUM 1

Poudres métalliques, à l'exclusion des poudres pour métaux-durs — Détermination de la compressibilité sous compression uniaxiale

RECTIFICATIF TECHNIQUE 1

Technical Corrigendum 1 to ISO 3927:2001 was prepared by Technical Committee ISO/TC 119, *Powder Metallurgy*, Subcommittee SC 2, *Sampling and testing methods for powders (including powders for hardmetals)*.

Clause 8, Title

Delete 1).

Subclause 8.1

Replace the text with the following:

8.1 The precision data specified in 8.2 and 8.3 are quoted from ASTM B331-95. The specimens that were the subject of ASTM B331-95 had a diameter of 25,4 mm and heights varying between 6,9 mm and 7,4 mm. Despite the difference in specimen dimensions, it is considered that these precision data provide an indication of the precision to be expected with the specimens specified in this International Standard.
