Ref. No. ISO 4197-1981 (E)

Descriptors : agricultural machinery, soil working equipment, cultivators, dimensions, fixing.

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4197 was developed by Technical Committee ISO/TC 23, *Tractors and machinery for agriculture and forestry*, and was circulated to the member bodies in November 1978.

It has been approved by the member bodies of the following countries :

Austria	India	South Africa, Rep. of
Belgium	Italy	Spain
Bulgaria	Korea, Rep. of	Sweden
Canada	New Zealand	Switzerland
Chile	Poland	Turkey
Finland	Portugal	USSR
Germany, F.R.	Romania	Yugoslavia

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Denmark  
France  
United Kingdom

# Equipment for working the soil — Hoe blades — Fixing dimensions

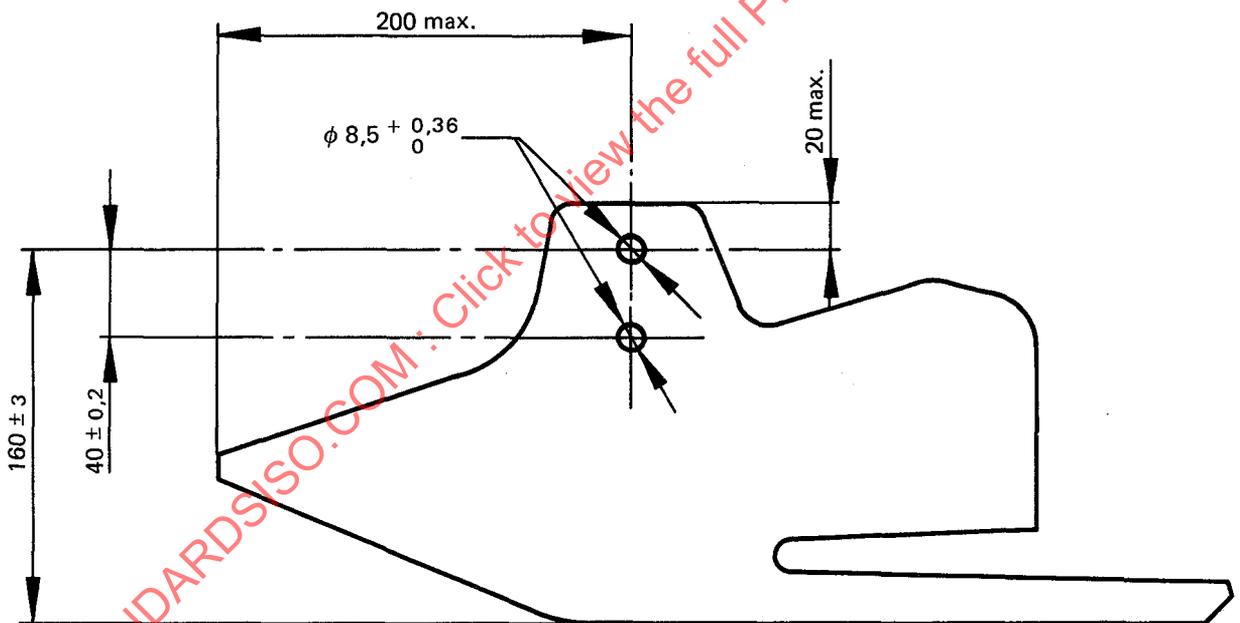

## 1 Scope and field of application

This International Standard specifies the fixing dimensions of hoe blades with operating width up to 220 mm inclusive.

## 2 Dimensions

Fixing dimensions shall comply with those shown in the figure.

Dimensions in millimetres

NOTE — The contours are only for dimensional reference.
