Ref. No. ISO 5506-1978 (E)

Descriptors : food products, vegetable products, soya, chemical tests, enzymatic activity, urease, determination of content, ammoniacal nitrogen.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5506 was developed by Technical Committee ISO/TC 34, *Agricultural food products*, and was circulated to the member bodies in August 1976.

It has been approved by the member bodies of the following countries :

Australia	Hungary	Portugal
Austria	India	Romania
Bulgaria	Iran	South Africa, Rep. of
Canada	Israel	Spain
Chile	Korea, Rep. of	Turkey
Czechoslovakia	New Zealand	United Kingdom
France	Peru	Yugoslavia
Germany, F.R.	Poland	

No member body expressed disapproval of the document.

Soya bean products — Determination of urease activity

ERRATUM

Page 1

Replace the second paragraph of clause 1 by the following :

"It is applicable to products having a urease activity of less than 1 mg of nitrogen per gram of product as received under the conditions specified. For more active products, the method is applicable provided that the mass of the test portion is reduced (see the note to 7.2)."
