Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 7185 was developed by Technical Committee ISO/TC 97, *Information processing systems*, and was circulated to the member bodies in August 1982.

It has been approved by the member bodies of the following countries :

Australia	Hungary	Romania
Canada	Ireland	Spain
Czechoslovakia	Italy	Sweden
Cuba	Japan	Switzerland
Egypt, Arab Rep. of	Netherlands	United Kingdom
Finland	New Zealand	USA
France	Norway	
Germany, F. R.	Poland	

No member body expressed disapproval of the document.
