Ref. No. ISO 7518-1983 (E)

Descriptors : technical drawings, buildings, symbols, marking, graphic symbols.

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 7518 was developed by Technical Committee ISO/TC 10, *Technical drawings*, and was circulated to the member bodies in January 1982.

It has been approved by the member bodies of the following countries:

Australia	India	South Africa, Rep. of
Austria	Italy	Spain
Belgium	Japan	Sweden
Brazil	Netherlands	Thailand
Canada	New Zealand	USA
China	Poland	USSR
Egypt, Arab Rep. of	Romania	

The member bodies of the following countries expressed disapproval of the document on technical grounds:

Finland  
Norway  
United Kingdom

# Technical drawings — Construction drawings — Simplified representation of demolition and rebuilding

## 1 Scope and field of application

This International Standard specifies rules for symbols, markings and simplified representations of demolition and rebuilding on general arrangement drawings and assembly drawings.

In general the applications shown concern plans. Views and sections can be shown similarly.

## 2 References

ISO 128, *Technical drawings — General principles of presentation*.

ISO 3098/1, *Technical drawings — Lettering — Part 1: Currently used characters*.

ISO 4069, *Building and civil engineering drawings — Representation of areas on sections and views — General principles*.

## 3 General principles

Demolition and rebuilding can be indicated either on existing drawings which emphasizes the original state of the works, or on new drawings which emphasizes new works.

A clear contrast should be aimed at, when indicating retained parts, removed parts and new parts respectively.

Where necessary the drawings and symbols shall be amplified by text.

To clarify the alterations planned, it is advisable to have the original (existing) state of the building on a drawing with indications of the planned alterations, as well as a new drawing of the altered building.

## 4 Outlines, dimensions and information in text

No.	Intention	Indication to be made on	
		existing drawing	new drawing
4.1	Existing part to be retained	(no convention)	— thin line
4.2	Existing part to be removed		 — thin line with crosses
4.3	New part	— thick line  — line thicker than others on the drawing	— thick line
4.4	Existing dimensions and information to be retained <sup>1)</sup>	(no convention)	1370 INFORMATION
4.5	Dimensions and information to show existing parts to be removed <sup>1)</sup>		<del>1370 INFORMATION</del> — thin line through the dimension or text
4.6	Dimensions and information of new parts <sup>1)</sup>		1370 INFORMATION

1) It may be useful to differentiate between original and new dimensions and text information. This can be done by different heights or style of the numerals and text.
