Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 9100-9 was prepared by the European Committee for Standardization (CEN) in collaboration with Technical Committee ISO/TC 63, *Glass containers*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This first edition cancels and replaces ISO 9100:1992.

ISO 9100 consists of the following parts, under the general title *Glass containers — Vacuum lug finishes*:

- *Part 1: General*
- *Part 2: 33 medium*
- *Part 3: 38 regular*
- *Part 4: 38 medium*
- *Part 5: 43 and 48 regular*
- *Part 6: 53 and 58 regular*
- *Part 7: 58 deep*
- *Part 8: 63, 66 and 70 regular*
- *Part 9: 63, 66 and 70 deep*
- *Part 10: 77 regular*
- *Part 11: 82 regular*
- *Part 12: 89 regular*
- *Part 13: 100 regular*
- *Part 14: 110 regular*

Foreword

This document (EN ISO 9100-9:2005) has been prepared by Technical Committee CEN/TC 261 "Packaging", the secretariat of which is held by AFNOR, in collaboration with Technical Committee ISO/TC 63 "Glass containers".

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by July 2005, and conflicting national standards shall be withdrawn at the latest by July 2005.

Efficient packaging is of great importance for the distribution and the protection of goods. Insufficient or inappropriate packaging can lead to damage or wastage of the contents of the pack.

It is based on CE.T.I.E (International Technical Centre for Bottling and Packaging) ¹⁾ data sheet GME 20-07 : 1995.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

1 Scope

This document specifies the dimensions of vacuum lug finishes with nominal sizes of 63, 66 and 70 mm deep for wide-mouth glass containers.

2 Normative references

Not applicable.

3 Dimensions

3.1 The design and dimension of the finish shall be as shown in Figures 1 to 3 and Table 1.

3.2 Details which are not specified shall be selected in accordance with the application. For general tolerances see EN 22768-1.

Dimensions in millimetres

Figure 1 — Cutter profile

Dimensions in millimetres

**Key**

- a) Parting line
- b) See Figure 3
- c) In order to provide a proper cap removal, the theoretical cam-off point (X) shall be on the upper flank of the thread.
