## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT), see the following URL: [Foreword — Supplementary information](#).

The committee responsible for this document is ISO/TC 72, *Textile machinery and accessories*, Subcommittee SC 1, *Spinning preparatory, spinning, twisting and winding machinery and accessories*.

# Textile machinery and accessories — Cylindrical sliver cans —

## Part 1: Main dimensions

### AMENDMENT 1

Page 4, [Table 1](#)

Change [Table 1](#) to read as follows:

**Table 1 — Dimensions and tolerances of sliver cans without castors**

Dimensions in millimetres

$d \pm 3$	$h$
300	900
350	
400	
450	
470	
500	
600	
700	
300	1 000
350	
400	
450	
470	
500	
600	
700	
350	1 070
400	
450	
470	
500	
600	
700	
<p><sup>a</sup> Inside diameters <math>d</math> greater than 700 mm shall be in increments of 100 mm.</p> <p><sup>b</sup> Heights <math>h</math> greater than 1 200 mm shall be in increments of 100 mm.</p>	

**Table 1** (continued)

$d \pm 3$	$h$
400	1 100
450	
470	
500	
600	
700	
450	1 200 <sup>b</sup>
470	
500	
600	
700 <sup>a</sup>	
<sup>a</sup> Inside diameters $d$ greater than 700 mm shall be in increments of 100 mm. <sup>b</sup> Heights $h$ greater than 1 200 mm shall be in increments of 100 mm.	

Page 7, [Table 2](#)

Change [Table 2](#) to read as follows:

**Table 2 — Dimensions and tolerances of sliver cans with castors**

Dimensions in millimetres

$d \pm 3$	$h$	$d_3$
400	900	280
450		330
470		350
500		380
600		480
700		540
400	1 000	280
450		330
470		350
500		380
600		480
700		540
800		640
900		740
<sup>a</sup> Inside diameters $d$ greater than 1 000 mm shall be in increments of 200 mm. <sup>b</sup> Heights $h$ greater than 1 200 mm shall be in increments of 100 mm.
