March 1968

COPYRIGHT RESERVED

The copyright of ISO Recommendations and ISO Standards belongs to ISO Member Bodies. Reproduction of these documents, in any country, may be authorized therefore only by the national standards organization of that country, being a member of ISO.

For each individual country the only valid standard is the national standard of that country.

Printed in Switzerland

Also issued in French and Russian. Copies to be obtained through the national standards organizations.

BRIEF HISTORY

The ISO Recommendation R 690, *Bibliographical references – Essential and supplementary elements*, was drawn up by Technical Committee ISO/TC 46, *Documentation*, the Secretariat of which is held by the Deutscher Normenausschuss (DNA).

Work on this question by the Technical Committee began in 1951 and led, in 1962, to the adoption of a Draft ISO Recommendation.

In June 1964, this Draft ISO Recommendation (No. 722) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies :

Australia	Greece	Norway
Belgium	Hungary	Poland
Brazil	India	Portugal
Canada	Ireland	Romania
Chile	Israel	Spain
Colombia	Italy	Sweden
Czechoslovakia	Japan	United Kingdom
Denmark	Korea, Rep. of	U.S.S.R.
France	Netherlands	Yugoslavia
Germany	New Zealand	

No Member Body opposed the approval of the Draft.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council which decided, in March 1968, to accept it as an ISO RECOMMENDATION.

BIBLIOGRAPHICAL REFERENCES

ESSENTIAL AND SUPPLEMENTARY ELEMENTS

1. SCOPE

A bibliographical reference is a set of data sufficiently precise and detailed to enable a publication or part of a publication to be identified.

In addition to the elements essential for identification (already published in ISO Recommendation R 77-1958, *Bibliographical references – Essential elements*), this ISO Recommendation includes, in clauses 3.1 to 3.3, supplementary items which may be added to indicate the character, scope, authority or availability of the work referred to.

Order of items is dealt with in section 4, while the remaining sections, 5 to 10, contain detailed recommendations on the individual elements and the presentation of a bibliographical reference.

The numbers listed in section 3 relate to the explanatory notes given in subsequent sections.

2. FORMS OF REFERENCE

A bibliographical reference may be any one of the following :

- (a) part of a bibliographical list, either descriptive or analytical;
- (b) the heading of an abstract or of a critical review;
- (c) a note appended to a text (either at the foot of a page or at the end of the text);
- (d) partly embodied in a text, partly in a note;
- (e) wholly embodied in a text.

3. REFERENCE DETAILS

Elements commonly included in a "full" reference are listed below in their preferred order (see section 4), with the essential elements in italics.

These elements should be taken, whenever possible, from the title page and, if reference is made to a contribution, from the heading to this and not from any index or other place in the publication (but see clauses 7.1.1 and 7.2.1). When it is thought useful, elements may be transliterated (see section 9).

3.1 Reference to a book or other separately issued publication

<i>(a)</i> Reference to the publication as a whole	<i>(b)</i> Reference to a particular page or portion*	Relevant notes in sections 5 to 9
<i>Name(s) of author(s), with forename(s)</i> Other secondary element(s)	<i>Name(s) of author(s), with forename(s)</i> Other secondary element(s)	5
<i>Title of the publication</i> Translation of the title	<i>Title of the publication</i> Translation of the title	5.1.2, 6 6.2
<i>Edition number, (or other specification of the edition)</i>	<i>Edition number, (or other specification of the edition)</i>	
<i>Place(s) of publication</i>	<i>Volume number (in multi-volume publications)</i> <i>Place(s) of publication</i>	7.1.1
Publisher(s)	Publisher(s)	7.1.2 7.1.3
<i>Year(s) of publication</i>	<i>Year(s) of publication</i>	7.2.1
Number of volumes (in multi-volume publications)		
Size (height at least)		7.3
Pagination (total number of pages)		7.4

* References to passages in literary works, or to certain texts such as laws, may be made in terms of the formal divisions of the text, which may replace any or all of the items after the title in this column 3.1 (b).

(a) Reference to the publication as a whole	(b) Reference to a particular page or portion*	Relevant notes in sections 5 to 9
---	--	-----------------------------------

Mention of any

-- illustrations, plates, etc.		7.5
-- bibliography		7.5
-- summary in another language		7.5

Title of collection or series, and the number of the publication in the series

Title of collection or series, and the number of the publication in the series

Price

Specific page, or first and last pages (or other clear identification, e.g. section number) of the portion referred to

CHAMRATH, G.C. Die Rechte der Schallplatte und des Tonbandes. (Résumé en fr.) *In*: Congrès int. des Bibliothèques et des Centres de Docum. (Bruxelles, sept. 1955). Vol. II B. La Haye, Nijhoff, 1955, pp. 15-24.

BUKOWSKI, St., Zasady systemu wymiarowego w budownictwie przemysłowym (Koordynacja modularna). *Normalizacja*, 27 (2), luty 1959 : 54-56.

RAMSBOTTOM, John. Fungi pathogenic to man. *In*: Medical Research Council - A system of bacteriology in relation to medicine, vol. 8, London, H.M. Stationery Office, 1931, pp. 11-70.

GODFREY, G. Bernard. Joints in tubular structures. *Struct. Engng*, 37 (4) Ap. '59 : 126-135.

Abridged

RAMSBOTTOM, John. Fungi pathogenic to man. *In*: Med. Res. Council - A system of bacteriology in relation to medicine, vol. 8, London, 1931, 11-70.

* See footnote to clause 3.1 (b) for reference to passages in literary work, etc.

** See clause 4.1 for permissible variation of the order of these items.

- 5.1.4 The editor (in this sense the word indicates a person who establishes a critical edition), the director, the compiler or the commentator of a collective publication (other than a periodical or serial publication) may be considered as the author, if his name appears prominently on the title page.

Example FURNAS, C.C., *ed.* Research in industry.

- 5.1.5 Titles indicating rank, office or status (academic, professional, etc.) may be retained in the reference to facilitate identification of the author.

Example CLARK, William, A.R.I.B.A. BALFOUR, Robert, Col.
CLARK, William, M.D. BALFOUR, Robert, Rev.
M.R.C.P.

- 5.1.6 *Pseudonyms*. When a work has been issued under an assumed name, normally this name only is given in the reference. When the author's real name is well known, it may be inserted in square brackets [] after the pseudonym. In a bibliographical list, a cross-reference should be made from the real name to the pseudonym.

Example BLAKE, Nicholas, *pseud.* [Cecil Day Lewis]
NOVALIS, *pseud.* [Friedrich Leopold von Hardenberg]
STENDHAL, *pseud.* [Henri Beyle]

5.2 Corporate authors

- 5.2.1 When it is clear that an organization or group of persons acting as a body accepts the main responsibility for a publication, this body is treated as the author.

Example ACADEMIE FRANCAISE. Dictionnaire de l'académie française.

- 5.2.2 The form of the name used in the reference is normally that which appears in the publication, transliterated when necessary.

Examples ACADEMIA SCIENTIARUM FENNICA
MAGYAR SZABVANYUGYI HIVATAL
S S S R [Transliteration of C C C P in Russian]
UNITED STATES. Department of Defence.

To distinguish between different bodies with the same name, the appropriate place name is added.

Example TRINITY COLLEGE (Cambridge)
TRINITY COLLEGE (Dublin)

- 5.2.3 When the corporate author is a State (or Federation of States), or a provincial, local or municipal authority, the relevant name in general use may be adopted rather than the full official name.

Examples FRANCE (for : République Française)
JUGOSLAVIJA (for : Federativna Narodna Republika Jugoslavije)

- 5.2.4 If the name of the body implies subordination to a more important parent body of which it is an organ or administrative division, or if its full significance depends on the inclusion of the name of the parent body, the latter is given first in the reference.

Examples CONSEIL INTERNATIONAL DU BÂTIMENT. Section "Documentation"
FRANCE. Ministère de la guerre. Direction centrale du matériel
SEINE-ET-OISE. Archives départementales
UNITED STATES. Interstate Commerce Commission

But if a body, although subordinate to some other, has specific functions of its own, and the full significance of its name is independent of that of the other body, it figures under its own name.

Examples ACADEMIE FRANÇAISE
WORLD HEALTH ORGANIZATION (WHO)

- 5.3 **Anonymous publications** (see also clause 5.1.6)

In references to anonymous publications, the title is normally the first element in the reference, but when the name of the author is well established, it may be inserted in square brackets[] at the head of the reference. In a bibliographical list, a cross-reference should then be made from the title to the name of the author.

Example [Hadert, H.] Fachbücher für den Farbenchemiker

6. TITLE

(see also clauses 7.6.2 and 7.6.3)

6.1 Form of title

- 6.1.1 The title is given as it appears in the publication referred to, transliterated where necessary.

Examples T.N.O. - Nieuws
РАДИОХИМИЯ (Radiohimija)

- 6.1.2 A title which is inconveniently long may be shortened, but initial words should never be omitted, nor should the sense be altered.

Example LISLE de LAUTURE (Hervé de). - Allergothérapie spécifique et thelassothérapie [à la lumière de travaux expérimentaux et de 600 observations]. Une application possible : l'Institut marin de la Baule-en Bretagne. [Travail du Laboratoire d'immunologie de la Faculté de médecine de Bordeaux et du Centre de recherches bioclimatiques de la Baule].
