## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The main task of technical committees is to prepare International Standards, but in exceptional circumstances a technical committee may propose the publication of a Technical Report of one of the following types:

type 1, when the required support cannot be obtained for the publication of an International Standard, despite repeated efforts;

type 2, when the subject is still under technical development or where for any other reason there is the future but not immediate possibility of an agreement on an International Standard;

type 3, when a technical committee has collected data of a different kind from that which is normally published as an International Standard ("state of the art", for example).

Technical Reports of types 1 and 2 are subject to review within three years of publication, to decide whether they can be transformed into International Standards. Technical Reports of type 3 do not necessarily have to be reviewed until the data they provide are considered to be no longer valid or useful.

ISO/TR 13298, which is a Technical Report of type 1, was prepared by Technical Committee ISO/TC 8. *Ships and marine technology*, Subcommittee SC 9, *General requirements*.

ISO/CD 13298 *Ships and marine technology — Vocabulary — General*, was deliberated for a long time, differently from normal standards on terms, so as to have it made into an International Standard which includes (1) the simplified "meaning of terms" intended to clarify the nuances of terms to get rid of misunderstanding in their use when translated into various languages, in lieu of a strict "definition of terms", and (2) the tables which provide a correspondence of terms in the languages of several countries.

SC 9 members agreed by voting that ISO/CD 13298 be put forward for voting before becoming ISO/DIS 13298. At this stage there was a request from ISO/CS to the effect that, as there seemed to be some problem with the contents and form of ISO/CD 13298 (necessity of providing "definitions of terms" instead of "meaning of terms", in the case of a standard for terms) for the approved CD to be published as an International Standard for terms, the contents should be modified accordingly, before submitting it for voting.

Then, opinions of ISO/TC 8/SC 9 members were solicited regarding the changing of "meaning of terms" to "definitions of terms", which revealed the following problems.

- a) To change the substance to "definitions of terms", very strict work of defining terms would become necessary, instead of the simplified explanation of the meaning of terms in ISO/CD 13298. This work would dictate a great deal of time and cost.
- b) The strict defining of various terms would give rise to a problem requiring the nomenclature of some currently and commonly used terms to be amended.

For this reason, it would be necessary to renew nomenclature of terms for use in International Standards.

- c) For the work of developing "definitions of terms", the cooperation of native speakers of English (members) is indispensable. Then, an invitation was put out to find any members belonging to English-speaking nations who could take charge of the development of "definitions of terms" in cooperation with Japan that had so far been in charge of the development of the draft text of terms. The invitation to cooperate yielded no positive response.

Considering the above circumstances, the SC 9 secretariat abandoned their plan to publish an International Standard.

However, the comparison tables between English and other languages is very important informative material, and it was decided that the contents of ISO/CD 13298 should be published with minor editorial changes, as a Technical Report.

# Ships and marine technology — Vocabulary of general terms

## 1 Scope

1.1 This Technical Report provides general terms and definitions used in the field of ships and marine technology.

1.2 Comparison tables between English and other languages are given in Annexes B to G, arranged numerically in the order of the reference numbers.

Annex B Chinese

Annex C Japanese

Annex D Polish

Annex E Portuguese

Annex F Russian

Annex G Swedish

## 2 Division

The terms in this Technical Report are divided into 13 groups as follows:

3.1 Kind of ship — Classification by goods carried

3.2 Kind of ship — Classification by specific service

3.3 Kind of ship — Classification by propulsion system

3.4 Kind of ship — Classification by ship type and material

3.5 Kind of ship — Classification by operating condition and routes

3.6 Subdivision and construction of ships

3.7 Title and crew

3.8 Ocean and marine meteorology

3.9 Navigation areas

3.10 Navigation, manoeuvring

3.11 Mooring, anchoring

3.12 Facilities for shipbuilding

3.13 International conventions, rules, regulations in relation to ship, harbour and navigation

### 3 Terms and definitions

NOTE The definitions in this report are expressed in explanatory sentences for intending to avoid misinterpretation. An asterisk (\*) after a term means that a definition exists in other rules or regulations.

#### 3.1 Kind of ship — Classification by goods carried

- 0101 passenger ship\*  
ship engaged in the carriage of passengers
- 0102 passenger-cargo ship\*  
ship engaged in the carriage of cargo and passengers
- 0103 cargo ship  
ship engaged in the carriage of cargo
- 0104 multi-purpose cargo ship  
ship capable of loading cargo of various kinds
- 0105 heavy cargo ship; heavy lifter; heavy lift cargo ship  
ship capable of loading heavy cargo with heavy cargo handling gear
- 0106 container ship  
ship which carries containers
- 0107 roll-on/roll-off ship; RO/RO  
ship which loads and unloads cargo by means of a trailer, fork-lift truck, etc.
- 0108 car carrier; pure car carrier  
ship which carries automobiles
- 0109 timber carrier; lumber carrier; log carrier  
ship which carries timber
- 0110 chip carrier  
ship which carries chipped wood in bulk
- 0111 ore carrier  
ship which carries ore in bulk
- 0112 coal carrier  
ship which carries coal in bulk
- 0113 cement carrier  
ship which carries cement in bulk
- 0114 sand carrier  
ship engaged in the transportation of earth and sand that are kept in a hopper
- 0115 bulk carrier  
ship which carries granular cargo in bulk
- 0116 oil tanker; crude oil carrier  
ship which carries oil

- 0117 VLCC  
very large crude oil carrier (200 000 300 000 DWT)
- 0118 ULCC  
ultra large crude oil carrier (more than 300 000 DWT)
- 0119 liquefied petroleum gas carrier  
ship which carries liquefied petroleum gas
- 0120 liquefied natural gas carrier  
ship which carries liquefied natural gas
- 0121 products carrier  
ship which carries petroleum products of various kinds
- 0122 chemical carrier  
ship which carries chemicals
- 0123 car/bulk carrier  
ship which carries car and bulk cargo
- 0124 oil/bulk carrier  
ship which carries bulk cargo and crude oil
- 0125 ore/oil carrier  
ship which carries ore and crude oil
- 0126 ore/bulk/oil carrier  
ship which carries ore, bulk cargo and crude oil
- 0127 refrigerated cargo carrier  
ship which carries refrigerated cargo
- 0128 cattle carrier; livestock carrier  
ship which carries cattle or livestock
- 0129 fish carrier  
ship provided with processing and/or freezing facilities to carry the fish catch
- 0130 ferry  
ship in which passengers and/or goods are conveyed over specified routes periodically
- 0131 passenger ferry  
ferry specially designed for the conveyance of passengers
- 0132 railway ferry  
ferry connecting railways
- 0133 train ferry  
ferry which carries entire railway trains
- 0134 car ferry  
ferry connecting roads and carrying automobiles
- 0135 lighter aboard ship  
ship loading lighters loaded with cargos by means of ship's crane and carrying them

### 3.2 Kind of ship — Classification by specific service

- 0201 merchant ship  
ship which is engaged in carriage services with a commercial purpose
- 0202 ice breaker  
ship with structure capable of breaking ice to navigate in icy waters
- 0203 pilot boat  
ship used for carrying pilots (to send and to receive)
- 0204 launch  
small motor ship used for traffic, pleasure, etc. which mostly is open
- 0205 yacht  
ship used for leisure and sports such as cruising and racing
- 0206 pleasure boat  
ship used for recreational purposes
- 0207 cruise ship  
passenger ship intended for sightseeing and shipboard attractions
- 0208 training ship  
ship used for training of seamen
- 0209 patrol boat; police boat  
ship used for patrolling for the purpose of guarding shores, ports and harbours
- 0210 rescue vessel [boat] [ship]  
ship fitted with special equipment for rescue purposes
- 0211 fire-fighting boat  
ship engaged in fire-fighting
- 0212 oil skimmer; oil recovery ship  
ship engaged in taking up oil from surface of water
- 0213 custom boat  
ship used for surveillance of ports and harbours for the purpose of controlling smuggling
- 0214 quarantine vessel  
ship engaged mainly in the transport of quarantine officers
- 0215 hospital ship  
ship fitted with medical treatment facilities and used for carrying invalids
- 0216 factory ship  
ship equipped with producing facilities (i.e. fish factory ship)
- 0217 mother ship  
ship provided with the facilities for supplying materials and to subordinate ships and for resting seafarers
- 0218 trawler  
ship used for catching fish by trawling

- 0219 support ship  
ship which supports a given industrial or other activity
- 0220 supply vessel  
ship used for supplying material, provisions etc. to another ship, offshore platform, etc.
- 0221 research ship  
ship designed for and employed in various research activities on the sea
- 0222 oceanographic research ship  
ship engaged in the observation and research of marine creatures, water quality, seabed topography, geology, oceanography, etc.
- 0223 meteorological observation ship  
ship engaged in the observation and research of meteorology at sea
- 0224 submersible research ship  
ship engaged in the observation and research of the features, creatures, etc. of the sea and seabed by staying submerged under water
- 0225 seabed exploring ship  
ship engaged in the exploration of resources on and under the seabed
- 0226 seabed mining ship  
ship engaged in the collection of mineral matter on the seabed
- 0227 mobile (offshore) drilling unit; MODU  
mobile platform or vessel used in drilling for oil, gas, etc. (offshore)
- 0228 self-elevating drilling unit  
ship engaged in performing drilling work on the seabed to exploit petroleum, gases, etc. by elevating the hull above the sea surface using elevating legs when performing the drilling work
- 0229 submersible drilling unit  
ship engaged in performing drilling work for petroleum, gases, etc. under the seabed, with the ship's bottom attached to the seabed and with the working deck exposed above the sea surface
- 0230 semi-submersible drilling unit; column-stabilized drilling unit  
ship, composed of ship hull, column, footing or lowerhull bracing, etc., engaged in drilling work for petroleum, gas, etc. under the seabed with the ship's body in a semi-submerged condition
- 0231 drilling ship  
ship, provided with propulsion machinery, engaged in work while floating on the water, with drilling facilities installed for exploiting petroleum, gas, etc. under the seabed
- 0232 FSO  
floating storage and off-loading unit
- 0233 FPSO  
floating production storage and off-loading unit
- 0234 pipe layer; pipe laying barge  
ship engaged in laying pipes on the seabed

- 0235 barge  
ship used for carrying goods without propulsion
- 0236 dredger; dredge  
ship engaged in dredging rivers, ports and harbours
- 0237 trailing suction hopper dredger; hopper dredge  
dredger engaged in sucking soil from the seabed by pumps and loading into a hopper
- 0238 cutter suction dredger; hydraulic dredge  
dredger engaged in sucking, and hydraulically conveying by pumps, soil drilled by cutters from the seabed
- 0239 crane ship; crane barge; floating crane  
ship engaged in principally lifting and moving heavy objects by means of an installed crane
- 0240 tugboat  
ship engaged in towing other ships with powerful propulsion
- 0241 pusher; pushing boat  
ship engaged in pushing other ships at the bow
- 0242 cable layer; cable ship; cable laying barge  
ship engaged in laying cables on the seabed or repairing them

### 3.3 Kind of ship — Classification by propulsion system

- 0301 nuclear ship; nuclear powered ship  
ship provided with nuclear powered main propulsion machinery
- 0302 motor ship  
ship provided with diesel main propulsion machinery
- 0303 steam turbine ship  
ship provided with steam turbine main propulsion machinery
- 0304 gas turbine ship  
ship provided with gas turbine main propulsion machinery
- 0305 electric propulsion ship  
ship provided with electric motor main propulsion machinery
- 0306 multiple screw ship  
ship provided with two or more screw propellers
- 0307 water jets craft  
ship provided with water propulsion
- 0308 sailing vessel [ship]  
ship powered mainly by sails

### 3.4 Kind of ship — Classification by ship type and material

- 0401 flush deck vessel; flush decker  
ship not provided with a superstructure
- 0402 three-island vessel; three islander  
ship provided with a forecastle, bridge and poop above an upper deck
- 0403 well deck vessel; well decker  
ship provided with a forecastle and poop above an upper deck
- 0404 raised quarterdeck vessel; sunken poop vessel  
ship provided with a poop (or a long poop formed by connecting a poop and a bridge) above sunken upper deck (stepped down at stern)
- 0405 shelterdeck vessel  
ship provided with a deck of light structure above an upper deck and a hull plate completely surrounding the side up to the flush deck
- 0406 semi-submersible ship; semi-submerged ship  
ship whose main hull is so constructed as to float partly submerged
- 0407 submerged ship  
ship able to submerge and which normally floats under water
- 0408 float on/float off ship  
ship designed with a cargo transfer system by which the ship opens itself to the sea then ballasts or deballasts in order to transfer floating cargo into or out of itself, but during sea shipment the cargo is stored dry
- 0409 catamaran; twin hull ship  
ship with twin hull
- 0410 SWATH  
small waterplane area twin hull
- 0411 trimaran  
ship with treble hull
- 0412 SES  
surface effect ship
- 0413 hydrofoil (craft)  
ship supported above the water surface in normal operating conditions by forces generated on foils
- 0414 air cushion ship; air cushion vehicle; ACV  
ship that gets lift from an air-cushion under its bottom, which enables it to hover over the surface of the water
- 0415 displacement ship  
ship whose hull, even when moving, is balanced only by hydrostatical buoyancy force
- 0416 wooden ship  
ship constructed of wood
- 0417 steel ship  
ship constructed of steel

- 0418 light alloy ship  
ship constructed of light alloy
- 0419 plastic ship; glassfibre reinforced plastics ship  
ship constructed of reinforced plastics
- 0420 high speed craft\*  
a craft capable of a maximum speed, in metres per second, equal to or exceeding  $3,7\Delta^{0,1667}$ , where:  
 $\Delta$  = displacement corresponding to the design waterline(m<sup>3</sup>)

### 3.5 Kind of ship — Classification by operating condition and routes

- 0501 sea going vessel; ocean going vessel  
ship capable of navigating on the ocean
- 0502 inland navigation ship  
ship capable of navigating only in water areas such as rivers, lakes and ports, estuaries
- 0503 liner  
ship engaged in periodical operation on specified routes
- 0504 tramper; tramp ship  
ship engaged on non-periodic cargo transport routes

### 3.6 Subdivision and construction of ships

- 0601 double hull  
structure with double skins at the side and bottom of a ship
- 0602 machinery space; engine room  
compartment installed with propulsive prime mover and auxiliary machinery
- 0603 cargo space; cargo hold  
compartment to be loaded with cargo
- 0604 accommodation space; living quarter  
compartment to accommodate passengers and crew members
- 0605 boiler room  
compartment installed with a boiler
- 0606 superstructure  
compartment constructed on an upper deck, with the breadth reaching both sides of a ship
- 0607 deck house  
compartment constructed on an upper deck or superstructure deck, with the breadth not reaching both sides of a ship
- 0608 chain locker  
location in which an anchor chain is stored
- 0609 shaft tunnel; shaft trunk  
watertight compartment formed as a tunnel running from the rear end of an engine room to the stern of a ship to protect a propeller shaft

- 0610 'tweendeck cargo space  
cargo hold constructed between decks
- 0611 cofferdam  
space constructed between two adjacent compartments to protect infiltration of water or oil from one compartment to another
- 0612 deep tank  
tank constructed as a part of a ship's structure, placed in a cargo hold or between decks to store mainly water, oil and other liquids
- 0613 forepeak tank  
water tank installed at the front of a collision bulkhead
- 0614 afterpeak tank  
water tank installed at the rear of a stern bulkhead
- 0615 cargo oil tank  
tank to store cargo oil
- 0616 slop tank\*  
a tank specifically designated for the collection of tank drainings, tank washings and other oily mixtures
- 0617 fuel oil tank  
tank to store fuel oil
- 0618 lubricating oil tank  
tank to store lubricating oil
- 0619 sludge tank  
tank to store sludge oil
- 0620 sump tank  
tank for circulating lubricating oil
- 0621 bilge tank  
tank to store bilge water accumulating on the bottom of a ship
- 0622 drain tank  
tank to collect system drains
- 0623 ballast water tank  
water tank constructed to adjust draught
- 0624 segregated ballast tank; SBT\*  
a tank, which is allocated to the carriage of ballast or to the carriage of ballast or cargoes other than oil or noxious liquid substances as variously defined in the Annexes of MARPOL 73/78, and which is completely separated from the cargo and oil fuel system
- 0625 fresh water tank  
tank to store fresh water
- 0626 drinking water tank; potable water tank  
tank to store drinking water

- 0627 feed water tank  
tank to store feed water in boiler system
- 0628 compass deck  
uppermost deck where a magnetic compass is fitted
- 0629 navigation bridge deck  
deck from which a ship is manoeuvred
- 0630 captain deck  
deck where a captain's room is located
- 0631 boat deck  
deck where lifeboats and a launching appliance together with all its lowering and recovery gear are arranged
- 0632 upper bridge deck  
deck immediately above a bridge deck
- 0633 bridge deck  
deck located above an upper deck, forming the top of a bridge
- 0634 weather deck; exposed deck  
deck exposed to the weather
- 0635 freeboard  
the freeboard assigned is the distance measured vertically downwards amidships from the upper edge of the deck line to the upper edge of the related load line
- 0636 freeboard deck  
the freeboard deck is normally the uppermost complete deck exposed to weather and sea, which has permanent means of closing all openings in the weather part thereof, and below which all openings in the sides of the ship are fitted with permanent means of watertight closing
- 0637 upper deck  
uppermost deck forming a principal portion of a hull
- 0638 second deck  
deck immediately below an upper deck
- 0639 forecastle deck  
deck immediately above an upper deck at the foremost location of a ship
- 0640 poop deck  
deck immediately above an upper deck at the sternmost location of a ship
- 0641 promenade deck  
deck provided for passenger's leisurely walk or physical exercise
- 0642 wagon deck  
deck to load locomotives, carriages, freight cars, etc.
- 0643 car deck  
deck to load automobiles

- 0644 navigation wing; dodger  
part of a navigation bridge deck, overhanging at ship side
- 0645 bulkhead  
partition to form compartments in a ship (bulkheads can be categorized into watertight bulkhead, oil-tight bulkhead, non-watertight bulkhead, etc. from the standpoint of purpose, and transverse bulkhead, longitudinal bulkhead, casing bulkhead, partial bulkhead, etc. from the standpoint of arrangement)
- 0646 longitudinal bulkhead  
bulkhead provided in a longitudinal direction
- 0647 transverse bulkhead  
bulkhead placed in a transverse direction
- 0648 collision bulkhead  
watertight transverse bulkhead placed at the front part of a ship
- 0649 afterpeak bulkhead  
watertight transverse bulkhead placed at the stern part of a ship
- 0650 partial bulkhead  
bulkhead not continuous from side to side or from bow to stern of a ship
- 0651 swash bulkhead; swash plate; wash plate  
plate provided to reduce the motion of free water in a tank
- 0652 break bulkhead  
watertight bulkhead provided at a superstructure side
- 0653 engine room casing; engine casing; machinery casing  
casing surrounding the opening of an engine room
- 0654 stem  
member to form the strong foremost portion of a ship to which shell platings are attached
- 0655 stern frame  
frame to form the strong stern end of a ship and to support a rudder, propeller shaft, etc.
- 0656 frame  
strength member to be arranged in the transverse or longitudinal direction inside shell platings
- 0657 beam  
strength member to be arranged on the surface of a deck, in the transverse or longitudinal direction with some distance kept
- 0658 girder  
strong support to carry beams
- 0659 shell plating; shell  
plate to form a ship's hull
- 0660 deck plating  
plate to form the ship's deck(s)
- 0661 mid deck  
deck placed at the middle level of a ship to divide a cargo oil tank into top and bottom

- 0662 double bottom  
bottom of a ship which has a double structure
- 0663 keel  
structural member running longitudinally at the centre of a ship's bottom
- 0664 duct keel  
keel formed as a box
- 0665 bilge keel  
member fitted at the outside of a ship bottom curvature to reduce rolling movement
- 0666 bulwark  
closed wall round the edge of a ship, placed at the exposed deck to protect people or cargo from falling overboard or to prevent waves coming on deck

### 3.7 Title and crew

- 0701 seafarers; crew; mariner  
general term to denote captain, seaman and reserve crew member
- 0702 reserve seafarers; reserve crew; reserve mariner  
seafarer not on board a ship because of holiday, sick leave, standby, etc.
- 0703 seaman  
seafarer (except captain) on board a ship as a crew member
- 0704 officer; ship's personnel  
general term to denote captain, chief engineer, officer, engineer, chief radio operator, radio operator, purser, and doctor
- 0705 rating  
seafarer other than officer
- 0706 captain; master  
person responsible for all operations and activities on a ship
- 0707 chief officer; chief mate\*  
chief of the deck department
- 0708 second officer; second mate\*  
officer of the deck department who supports the chief officer
- 0709 boatswain\*  
foreman of the deck department
- 0710 quartermaster\*  
rating of the deck department whose duties include steering the rudder and maintenance of the steering gear
- 0711 able seaman\*  
senior rating of the deck department whose duties include cargo handling and maintenance and inspection of machinery
- 0712 sailor\*  
rating of the deck department except senior rating

- 0713 chief engineer\*  
person responsible for all operations and activities in the engine department
- 0714 second engineer\*  
engineer who supports the chief engineer
- 0715 No. 1 oiler; No. 1 motorman\*  
foreman of the engine department
- 0716 oiler; motorman  
senior rating of the engine department who assumes duties of the department as commanded by engineers and No. 1 oiler
- 0717 assistant oiler; assistant motorman  
rating of the engine department except senior rating
- 0718 chief radio operator; chief radio officer\*  
person with the greatest responsibility in the radio communication and purser departments (only when purser duties are assigned additionally)
- 0719 radio operator; radio officer\*  
officer engaged in duties including communication with the outside and meteorological information using radio equipment
- 0720 electrician\*  
foreman of electric installation
- 0721 chief steward  
foreman of the purser department who commands and supervises the duties of the department rating under the direction of the chief of the department (purser, chief officer)
- 0722 steward  
rating of the purser department assigned with the duties related to the galley
- 0723 purser  
person with the greatest responsibility in the purser department
- 0724 doctor  
doctor as a crew member of a ship
- 0725 apprentice, cadet  
trainee engaged in the on-the-job training on board a ship or trainee on a ship from a nautical school
- 0726 pilot  
person who directs ship operation and guides the ship in harbours and coastal waters in place of the captain

### 3.8 Ocean and marine meteorology

NOTE WMO Manual on codes, Vol. 1, International code 3700 should be referred to.

- 0801 sea condition; sea state  
state of sea surface

- 0802 Beaufort wind scale  
scale of wind force classified by the sea state generated by the wind
- 0803 following wind  
wind blowing in the direction of a ship's heading
- 0804 contrary wind; head wind  
wind blowing against a ship's heading
- 0805 sea scale  
scale of waves classified by the wave heights
- 0806 swell scale  
scale of swell classified by heights and lengths
- 0807 wind wave  
undulation of water surface directly dependent on the action of wind
- 0808 swell  
undulation of water surface that has been propagated irrespective of the wind at the site
- 0809 cross sea  
irregular waves proceeding opposite the direction of wind
- 0810 wave crest  
a high point of wave's profile
- 0811 ocean current  
flow of seawater in certain direction caused by wind, etc.
- 0812 tidal current  
flow of seawater caused by tide
- 0813 following current  
ocean current or tidal current in the direction of a ship's heading
- 0814 tide  
rise and fall of the sea surface

### 3.9 Navigation areas

- 0901 international voyage  
voyage between two or more countries
- 0902 ocean going area; deep sea  
divisions of the waters laid down by laws of each country
- 0903 coasting area  
divisions of the waters laid down by laws of each country
- 0904 smooth water area  
divisions of the waters laid down by laws of each country
- 0905 restricted waters  
waters where navigation is limited

- 0906 narrow waters  
waters which are narrow
- 0907 shallow waters  
waters which are shallow
- 0908 aids to navigation  
landbased marks or other position-fixing systems to assist in keeping on a safe navigation route
- 0909 beacon  
mark, a kind of aid to navigation, floating or fixed

### 3.10 Navigation, manoeuvring

- 1001 course  
direction in which a ship proceeds
- 1002 course keeping  
keeping the heading in the planned direction
- 1003 helm angle for course keeping  
angle of rudder to maintain the heading
- 1004 ahead  
proceeding to the front
- 1005 astern  
proceeding to the rear
- 1006 shift  
moving a ship to another location
- 1007 turning round  
changing the direction of the bow
- 1008 steering  
operating a rudder
- 1009 alongside pier  
operating a ship to come alongside a pier
- 1010 alongside ship  
two ships locating side by side each other
- 1011 basin trial; mooring trial; dock trial  
trial operation of the main engine while the ship is moored to check the main engine
- 1012 sea trial  
trial operation of a ship on the sea for confirming the performance of various features
- 1013 sea trial speed  
speed obtained at the speed test of sea trial
- 1014 milepost; measured mile  
mark to be used in the speed test of sea trial

- 1015 service speed; sea speed  
speed of a ship obtained at the normal engine output while fully loaded
- 1016 harbour speed  
reduced speed of a ship in ports, narrow channels, etc.
- 1017 log speed  
speed of a ship through the water
- 1018 ground speed  
speed of a ship against the shore or sea bottom
- 1019 full load condition  
condition in which a ship is loaded to the summer free board mark with cargo, fuel, water, etc.
- 1020 ballast condition  
condition in which the ship is loaded with ballast (water or other materials) to increase draught or to adjust the trim of a ship
- 1021 hogging  
condition in which the ship's bow and stern are falling in relation to the midship
- 1022 sagging  
condition in which the ship's bow and stern are rising in relation to the midship
- 1023 heel; list  
inclination of a ship to either side
- 1024 trim  
difference of the draughts at the bow and the stern of a ship

### 3.11 Mooring, anchoring

- 1101 lay-up  
mooring a ship for a long period and not using it for service
- 1102 mooring  
fastening a ship temporarily to fixed mooring facilities with the ship in full service condition
- 1103 buoy mooring  
fastening a ship to a buoy
- 1104 pier mooring  
fastening a ship to a pier
- 1105 anchoring  
lowering an anchor to stay at a given location
- 1106 let go [drop] anchor  
lowering an anchor
- 1107 anchorage  
place of anchoring

1108 single anchor mooring  
anchoring with an anchor on one side lowered

1109 two anchor mooring  
anchoring with the anchors on both sides lowered

1110 heavy sea anchoring  
anchoring to prepare for a strong gale

### 3.12 Facilities for shipbuilding

1201 shipyard  
factory to carry out shipbuilding, repair and maintenance

1202 berth; slipway  
incline constructed on land to build or repair a ship

1203 dry dock; dock; graving dock  
facilities constructed at the shore to carry out cleaning, painting, inspection, repair, construction, etc. of a ship

1204 floating dock  
mobile, floating structure which ballast and deballast itself to dry dock a ship

1205 outfitting basin; outfitting quay  
space where equipping work is carried out on a ship after launching

1206 outfitting shop  
factory where work on and assembling of equipment are carried out

1207 hull assembly shop  
factory where tasks from the machining of ship hull parts to the building of hull blocks are carried out

1208 pipe shop  
factory where work on pipes is carried out

1209 engine shop; engine fitting shop  
factory where assembling and fitting of engine are carried out

1210 carpentry shop; shipwright shop  
factory where wood work and outfit work are carried out

1211 mould loft  
space where the drawing of ship structure and template-marking are carried out

### 3.13 International conventions, rules, regulations in relation to ship, harbour and navigation\*

1301 International Maritime Organization; IMO

1302 International Convention for the Safety of Life at Sea; SOLAS

1303 International Load Line Convention; ILLC

1304 International Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978 relating thereto; MARPOL 73/78

- 1305 International Association of Classification Societies; IACS
- 1306 International Load Line Certificate
- 1307 International Oil Pollution Prevention Certificate
- 1308 Passenger Ship Safety Certificate
- 1309 Cargo Ship Safety Construction Certificate
- 1310 Cargo Ship Safety Equipment Certificate
- 1311 Cargo Ship Safety Radio Certificate
- 1312 Exemption Certificate
- 1313 International Load Line Exemption Certificate
- 1314 certificate of ship's nationality
- 1315 certificate of classification
- 1316 certificate for refrigerating installation
- 1317 maritime authority  
organization of the flagstate government related to the safety, etc. of ships
- 1318 Panama Canal tonnage certificate  
certificate issued by the maritime authority to set a standard to calculate the rate of tolls of the Panama Canal
- 1319 Suez Canal special tonnage certificate  
certificate issued by the maritime authority to set a standard to calculate the rate of tolls of the Suez Canal
- 1320 ship inspection certificate  
certificate issued by the maritime authority to the ship which has passed the periodical inspection
- 1321 records of marine boards of inspection  
ship inspection memorandum given by the maritime authority when an inspection is finished
- 1322 classification society
- 1323 official number (distinctive number)
- 1324 port of registry
- 1325 tonnage measurement  
measurement to determine the tonnage of a ship
- 1326 international code of signal  
book containing the rules, signals, etc. of the communication specified internationally for the communication between ships
- 1327 signal letter; distinctive letter; call sign  
international signal given to each ship for rapid communication between ships
- 1328 port regulations  
rule specified by each country for the safety of cargo handling, navigation in port, and stevedores in relation to ships

- 1329 classification survey during construction  
inspection during construction of a ship to confirm the compliance to respective regulations
- 1330 classification survey of ships not built under survey  
inspection of the level similar to the periodical inspection, done in relation to the ship's age, forming the requirement to newly register a constructed ship
- 1331 special survey  
detailed inspection to be carried out periodically for maintaining the safety of ships and human life
- 1332 intermediate survey; annual survey  
simplified inspection to be carried out between periodical inspections
- 1333 additional survey  
inspection to be carried out on necessary items in the case of damage, repair, remodelling, etc.
- 1334 International Convention on Tonnage Measurement of ships
- 1335 The Torremolinos Protocol of 1993 relating to the International Convention for the Safety of Fishing Vessels 1977; SFV Protocol 1993
- 1336 International Code for the Construction and Equipment of Ships carrying Dangerous Chemicals in Bulk; IBC Code
- 1337 International Code for the Construction and Equipment of Ships carrying Liquefied Gases in Bulk; IGC Code
- 1338 Code for the Construction and Equipment of Mobile Offshore Drilling Units, 1989 ; MODU Code 1989
- 1339 International Code of Safety for High Speed Craft; HSC Code
- 1340 International Management Code for the Safe Operation of Ships and for Pollution Prevention; ISM Code
- 1341 IMO Ship Identification Number
- 1342 International Regulations for Preventing Collisions at Sea; COLREG
- 1343 High Speed Craft Safety Certificate
- 1344 Permit to Operate High Speed Craft
- 1345 Enhanced Programme of Inspections during Surveys of Bulk Carriers and Oil Tankers
- 1346 initial survey  
a survey before the ship is put in service
- 1347 renewal survey  
to ensure that the ship is fit for the service for which it is intended
- 1348 International Convention on Standards of Training, Certification and Watchkeeping for Seafarers; STCW
