NFPA grants you a license as follows: The right to download an electronic file of this NFPA document for temporary storage on one computer for purposes of viewing and/or printing one copy of the NFPA document for individual use. Neither the electronic file nor the hard copy print may be reproduced in any way. In addition, the electronic file may not be distributed elsewhere over computer networks or otherwise. The hard copy print may only be used personally or distributed to other employees for their internal use within your organization.

### IMPORTANT NOTICE ABOUT THIS DOCUMENT

NFPA codes, standards, recommended practices, and guides, of which the document contained herein is one, are developed through a consensus standards development process approved by the American National Standards Institute. This process brings together volunteers representing varied viewpoints and interests to achieve consensus on fire and other safety issues. While the NFPA administers the process and establishes rules to promote fairness in the development of consensus, it does not independently test, evaluate, or verify the accuracy of any information or the soundness of any judgments contained in its codes and standards.

The NFPA disclaims liability for any personal injury, property or other damages of any nature whatsoever, whether special, indirect, consequential or compensatory, directly or indirectly resulting from the publication, use of, or reliance on this document. The NFPA also makes no guaranty or warranty as to the accuracy or completeness of any information published herein.

In issuing and making this document available, the NFPA is not undertaking to render professional or other services for or on behalf of any person or entity. Nor is the NFPA undertaking to perform any duty owed by any person or entity to someone else. Anyone using this document should rely on his or her own independent judgment or, as appropriate, seek the advice of a competent professional in determining the exercise of reasonable care in any given circumstances.

The NFPA has no power, nor does it undertake, to police or enforce compliance with the contents of this document. Nor does the NFPA list, certify, test or inspect products, designs, or installations for compliance with this document. Any certification or other statement of compliance with the requirements of this document shall not be attributable to the NFPA and is solely the responsibility of the certifier or maker of the statement.

*See inside back cover for additional important notices and information.*

### NOTICES

All questions or other communications relating to this document and all requests for information on NFPA procedures governing its codes and standards development process, including information on the procedures for requesting Formal Interpretations, for proposing Tentative Interim Amendments, and for proposing revisions to NFPA documents during regular revision cycles, should be sent to NFPA headquarters, addressed to the attention of the Secretary, Standards Council, National Fire Protection Association, 1 Batterymarch Park, P.O. Box 9101, Quincy, MA 02269-9101.

Users of this document should be aware that this document may be amended from time to time through the issuance of Tentative Interim Amendments, and that an official NFPA document at any point in time consists of the current edition of the document together with any Tentative Interim Amendments then in effect. In order to determine whether this document is the current edition and whether it has been amended through the issuance of Tentative Interim Amendments, consult appropriate NFPA publications such as the *National Fire Codes*<sup>®</sup> Subscription Service, visit the NFPA website at [www.nfpa.org](http://www.nfpa.org), or contact the NFPA at the address listed above.

A statement, written or oral, that is not processed in accordance with Section 6 of the Regulations Governing Committee Projects shall not be considered the official position of NFPA or any of its Committees and shall not be considered to be, nor be relied upon as, a Formal Interpretation.

The NFPA does not take any position with respect to the validity of any patent rights asserted in connection with any items which are mentioned in or are the subject of this document, and the NFPA disclaims liability for the infringement of any patent resulting from the use of or reliance on this document. Users of this document are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Users of this document should consult applicable federal, state, and local laws and regulations. NFPA does not, by the publication of this document, intend to urge action that is not in compliance with applicable laws, and this document may not be construed as doing so.

## **Licensing Policy**

This document is copyrighted by the National Fire Protection Association (NFPA). By making this document available for use and adoption by public authorities and others, the NFPA does not waive any rights in copyright to this document.

**1. Adoption by Reference**—Public authorities and others are urged to reference this document in laws, ordinances, regulations, administrative orders, or similar instruments. Any deletions, additions, and changes desired by the adopting authority must be noted separately. Those using this method are requested to notify the NFPA (Attention: Secretary, Standards Council) in writing of such use. The term "adoption by reference" means the citing of title and publishing information only.

**2. Adoption by Transcription**—**A.** Public authorities with lawmaking or rule-making powers only, upon written notice to the NFPA (Attention: Secretary, Standards Council), will be granted a royalty-free license to print and republish this document in whole or in part, with changes and additions, if any, noted separately, in laws, ordinances, regulations, administrative orders, or similar instruments having the force of law, provided that: (1) due notice of NFPA's copyright is contained in each law and in each copy thereof; and (2) that such printing and republication is limited to numbers sufficient to satisfy the jurisdiction's lawmaking or rule-making process. **B.** Once this NFPA Code or Standard has been adopted into law, all printings of this document by public authorities with lawmaking or rule-making powers or any other persons desiring to reproduce this document or its contents as adopted by the jurisdiction in whole or in part, in any form, upon written request to NFPA (Attention: Secretary, Standards Council), will be granted a nonexclusive license to print, republish, and vend this document in whole or in part, with changes and additions, if any, noted separately, provided that due notice of NFPA's copyright is contained in each copy. Such license shall be granted only upon agreement to pay NFPA a royalty. This royalty is required to provide funds for the research and development necessary to continue the work of NFPA and its volunteers in continually updating and revising NFPA standards. Under certain circumstances, public authorities with lawmaking or rule-making powers may apply for and may receive a special royalty where the public interest will be served thereby.

**3. Scope of License Grant**—The terms and conditions set forth above do not extend to the index of this document.

(For further explanation, see the Policy Concerning the Adoption, Printing, and Publication of NFPA Documents, which is available upon request from the NFPA.)

## NFPA 1000

### Standard for

# Fire Service Professional Qualifications Accreditation and Certification Systems

## 2000 Edition

This edition of NFPA 1000, *Standard for Fire Service Professional Qualifications Accreditation and Certification Systems*, was prepared by the Technical Committee on Accreditation and Certification to Fire Service Professional Qualifications, released by the Technical Correlating Committee on Professional Qualifications, and acted on by the National Fire Protection Association, Inc., at its World Fire Safety Congress and Exposition™ held May 14–17, 2000, in Denver, CO. It was issued by the Standards Council on July 20, 2000, with an effective date of August 18, 2000, and supersedes all previous editions.

This edition of NFPA 1000 was approved as an American National Standard on August 18, 2000.

### Origin and Development of NFPA 1000

In 1990 the Professional Qualifications Correlating Committee recommended that the Association establish a project related to fire service certification and accreditation programs. The project was approved at the July 1990 meeting of the NFPA Standards Council. As a result of this action, a technical committee was named to develop procedures for the accreditation of agencies involved in certification, based on the NFPA Professional Qualifications Standards, and procedures for the certification of individuals to those standards.

The Technical Committee on Accreditation and Certification to Fire Service Professional Qualifications met for the first time in October 1991 and regularly during 1992 and 1993 to develop this document. The committee reviewed materials related to accreditation and certification programs of non-fire service organizations and, where possible, used nationally accepted requirements from these programs as the basis for this document. The committee's objective was to develop requirements that could be used to evaluate accreditation and certification systems that use NFPA Professional Qualifications Standards.

In the 2000 edition of this document, the committee has added provisions for the accrediting of nonengineering, fire-related, academic, degree-granting programs offered by institutions of higher education.

## Technical Correlating Committee on Professional Qualifications (PQU-AAC)

**Douglas P. Forsman**, *Chair*  
Oklahoma State University, OK [M]

**Fred G. Allinson**, Nat'l Volunteer Fire Council, WA [L]  
**Stephen P. Austin**, State Farm Fire & Casualty Co., DE [I]  
 Rep. TC on Fire Investigator Pro Qual  
 (VL to Pro Qual System Mgmt.)  
**Dan W. Bailey**, USDA Forest Service, MT [E]  
 Rep. TC on Wildfire Suppression Pro Qual  
 (VL to Pro Qual System Mgmt.)  
**Boyd F. Cole**, SunnyCor Inc., IL [M]  
 Rep. TC on Emergency Vehicle Mechanic Technicians  
 Pro Qual  
 (VL to Pro Qual System Mgmt.)  
**David T. Endicott**, Prince William County Fire & Rescue  
 Service, VA [U]  
 Rep. TC on Fire Fighter Pro Qual  
 (VL to Pro Qual System Mgmt.)  
**Gerald C. Evans**, Salt Lake City Fire Dept., UT [L]  
 Rep. TC on Telecommunicator Pro Qual  
 (VL to Pro Qual System Mgmt.)  
**Jon C. Jones**, Jon Jones & Assoc., MA [SE]  
 Rep. TC on Industrial Fire Brigades Pro Qual  
 (VL to Pro Qual System Mgmt.)

**Charles E. Kirtley**, City of Guymon Oklahoma Fire Dept.,  
 OK [U]  
 Rep. TC on Public Fire Educator Pro Qual  
 (VL to Pro Qual System Mgmt.)  
**Michael J. McGovern**, Lakewood Fire Dept., WA [L]  
 Rep. Int'l Assn. of Fire Fighters  
**William E. Peterson**, Plano Fire Dept., TX [M]  
 Rep. TC on Fire Inspector Pro Qual  
 (VL to Pro Qual System Mgmt.)  
**Hugh A. Pike**, U.S. Air Force Fire Protection, FL [E]  
 Rep. TC on Rescue Technician Pro Qual  
 (VL to Pro Qual System Mgmt.)  
**Johnny G. Wilson**, Georgia Firefighter Standards & Train-  
 ing Council, GA [E]  
 Rep. Nat'l Board on Fire Service Professional Qualifica-  
 tion  
**John P. Wolf**, University of Kansas, KS [SE]  
 Rep. TC on Accreditation and Certification to Fire Ser-  
 vice Pro Qual  
 (VL to Pro Qual System Mgmt.)

### Alternate

**Michael W. Robinson**, Baltimore County Fire Dept., MD  
 [E]  
 (Alt. to J. G. Wilson)

**Frank E. Florence**, NFPA Staff Liaison

*This list represents the membership at the time the Committee was balloted on the final text of this edition. Since that time, changes in the membership may have occurred. A key to classifications is found at the back of the document.*

NOTE: Membership on a committee shall not in and of itself constitute an endorsement of the Association or any document developed by the committee on which the member serves.

**Committee Scope:** This Committee shall have primary responsibility for the management of the NFPA Professional Qualifications Project and documents related to professional qualifications for fire service, public safety, and related personnel.

**Technical Committee on Accreditation and Certification to Fire Service  
Professional Qualifications (PQU-ACF)**

**John P. Wolf, Chair**  
University of Kansas, KS [SE]

**Mike Brackin**, State Fire Academy of Mississippi, MS [U]  
**Kenneth M. Briscoe**, North Carolina Dept. of Insurance,  
NC [E]  
**Donald Lee Cox**, Town of Menasha Fire Dept., WI [L]  
**Vincent K. Elmore**, Palm Beach Fire Dept., FL [E]  
**Michael R. Hill**, Thomasville, NC [SE]  
**Lynne Lofquist**, Office of the Fire Marshal, ON, Canada  
[E]

**Steve Lutz**, Utah Fire & Rescue Academy, UT [SE]  
**Russell K. Mason**, Central County Fire & Rescue, MO [U]  
**Randal E. Novak**, Oklahoma State University, OK [M]  
Rep. Int'l Fire Service Training Assn.  
**Frederick W. Piechota, Jr.**, Connecticut Commission on  
Fire Prevention & Control, CT [E]  
**Richard Powell**, Saginaw Township Fire Dept., MI [L]  
**Jimmy L. Smith**, Fitchburg, MA [L]

**Alternate**

**Robert P. French**, Office of the Ontario Fire Marshal, ON,  
Canada [E]  
(Alt. to L. Lofquist)

**Frank E. Florence**, NFPA Staff Liaison

*This list represents the membership at the time the Committee was balloted on the final text of this edition. Since that time, changes in the membership may have occurred. A key to classifications is found at the back of the document.*

NOTE: Membership on a committee shall not in and of itself constitute an endorsement of the Association or any document developed by the committee on which the member serves.

**Committee Scope:** This Committee shall have primary responsibility for documents on (1) procedures for fire service personnel certification to NFPA Professional Fire Service Qualifications Standards or other standards adopted by the authority having jurisdiction, and (2) procedures for accrediting national, state, provincial and local jurisdictions as certifying entities for NFPA Professional Fire Service Qualifications Standards or other standards adopted by the authority having jurisdiction. The Committee shall also have primary responsibility for documents on procedures for accrediting nonengineering, fire-related, academic, degree-granting programs offered by institutions of postsecondary education.

**NFPA 1000****Standard for****Fire Service Professional Qualifications  
Accreditation and Certification Systems****2000 Edition**

NOTICE: An asterisk (\*) following the number or letter designating a paragraph indicates that explanatory material on the paragraph can be found in Appendix A.

Information on referenced publications can be found in Chapter 6 and Appendix C.

**Chapter 1 Administration**

**1.1 Scope.** This standard establishes the minimum criteria for accrediting bodies; and for the assessment and validation of the process used to certify fire and related emergency response personnel to professional qualifications standards; and of non-engineering, fire-related, academic, degree-granting programs offered by institutions of higher education.

**1.2 Purpose.**

**1.2.1** The purpose of this standard is to establish criteria and requirements applicable to organizations providing accreditation to and for those entities certifying fire and related emergency response personnel as having met or complied with a recognized national standard; and/or to and for nonengineering, fire-related, academic, degree-granting programs offered by institutions of higher education.

**1.2.2** It is not the intent of this standard to conflict with the statutory requirements of any jurisdiction.

**1.3 General.**

**1.3.1\*** Organizations that accredit certifying entities or that certify individuals to fire service professional qualifications standards or that accredit nonengineering, fire-related, academic, degree-granting programs offered by institutions of higher education shall meet the requirements of this standard.

**1.3.2** Accrediting bodies shall meet the requirements of Chapter 3.

**1.3.3** Certifying entities shall meet the requirements of Chapter 4.

**1.3.4** Fire-related, academic, degree-granting programs offered by institutions of higher education shall meet the requirements of Chapter 5.

**1.3.5** Accreditation of a certifying entity shall be, at a minimum, based on the process described in Section 3.2 and Chapter 4.

**1.3.6** Accreditation of a degree-granting entity shall be, at a minimum, based on the process described in Section 3.3 and Chapter 5.

**Chapter 2 Definitions**

**2.1 Definitions.** For the purpose of this standard, terms shall have the following meanings.

**2.1.1 Accredited.** To give official authorization to or to approve a process or procedure, to recognize as conforming to a standard, and to recognize an entity (e.g., an educational institution) as maintaining standards that qualify its graduates for admission to higher or more specialized institutions or for professional practice.

**2.1.1.1 Accrediting Body.** A voluntary, nongovernmental association that administers accrediting procedures for entities that certify individuals to fire service professional qualifications standards.

**2.1.2\* Approved.** Acceptable to the authority having jurisdiction.

**2.1.3\* Authority Having Jurisdiction.** The organization, office, or individual responsible for approving equipment, materials, an installation, or a procedure.

**2.1.4 Certification.** Attests authoritatively; specifically, the issuance of a document that states that one has demonstrated the knowledge and skills necessary to function in a field.

**2.1.4.1 Certifying Entity.** An organization that is accredited to award certification to individuals.

**2.1.5 Degree.** Recognition of completion of a prescribed program of study at the postsecondary level.

**2.1.5.1 Degree-Granting Entity.** An accredited institution of postsecondary higher education that is authorized to award degrees.

**2.1.6 Job Performance Requirement.** A statement that describes a specific job task, lists the items necessary to complete the task, and defines measurable or observable outcomes and evaluation areas for the specific task.

**2.1.7 Shall.** Indicates a mandatory requirement.

**2.1.8 Should.** Indicates a recommendation or that which is advised but not required.

**2.1.9\* Simulation.** The repeatable act of carrying out a job performance requirement in a safe environment that reproduces actual job performance conditions to the fullest possible extent.

**2.1.10 Standard.** A document, the main text of which contains only mandatory provisions using the word "shall" to indicate requirements and which is in a form generally suitable for mandatory reference by another standard or code or for adoption into law. Nonmandatory provisions shall be located in an appendix, footnote, or fine-print note and are not to be considered a part of the requirements of a standard.

**Chapter 3 Accrediting Body Requirements****3.1 General.**

**3.1.1\*** The accrediting body shall be independent of direct governmental control and shall have sole responsibility for the final decision on the accreditation of a certifying entity or degree-granting entity.

**3.1.2** The accrediting body shall not be the certifying entity and shall document policies and procedures to implement this requirement. Accreditation and certification shall be conducted objectively and independently. Care shall be taken to

avoid conflicts of interest or the appearance of conflicts of interest. Accreditation bodies and certification entities shall establish policies and procedures to ensure that no individual, entity, or interest group exercises undue or inappropriate influence over the standards-making, accreditation, or certification system.

**3.1.3** The accrediting body shall not be the standards-making body for the standard(s) for which accreditation or certification is being offered. Accreditation and standards-making shall be conducted objectively and independently. Care shall be taken to avoid conflicts of interest or the appearance of conflicts of interest. Accreditation bodies and standards-making entities shall establish policies and procedures to ensure that no individual, entity, or interest group exercises undue or inappropriate influence over the standards-making, accreditation, or certification system.

**3.1.4** The accrediting body shall conduct accreditation on a multistate/provincial/territorial, national, or international basis.

**3.1.5\*** The accrediting body shall evaluate for accreditation the certification programs for fire and related emergency response personnel as requested by the certifying entity and as defined by NFPA professional qualifications standards, other NFPA standards related to the competence of emergency responders for certifying entities within the United States, or other standards adopted by the authority having jurisdiction for non-U.S. certifying entities. The accrediting body shall evaluate for accreditation the fire-related, academic, degree-granting programs offered by institutions of higher education.

**3.1.6\*** The accrediting body shall evaluate for accreditation entities that are empowered to operate and that confer certification to fire and related emergency response personnel or that award degrees.

**3.1.7** The accrediting body shall develop and maintain public documents that describe the accreditation process, including, at a minimum, the scope, evaluative criteria, and procedures to include: applications, self-study, granting, withdrawing, revoking or suspending, appealing decisions, responding to public inquiries, and term of accreditation. The accrediting body shall make public a current listing of the accreditation or candidacy of all institutions or programs with which it is affiliated.

**3.1.8** The accrediting body shall have impartial, public representation in its evaluation, policy, and decision-making processes. This body shall include individuals who are not educators in, or members of, the profession for which students are being prepared, nor who are in any way directly related to the institutions or programs being evaluated. Accrediting bodies shall include representation of the users of the accreditation system.

**3.1.9** The accrediting body shall have the resources necessary to implement and maintain the accrediting process as described in this standard.

### **3.2 Accreditation Process for Certifying Entities.**

**3.2.1 Mission.** The evaluation of a certifying entity shall be based on its own stated mission. The mission shall be consistent with purposes accepted as appropriate to the fire service and to the recognized scope of the accrediting body.

**3.2.2 Criteria.** Accrediting bodies shall utilize evaluative criteria and processes that judge the following:

- (1) The appropriateness of the candidate program's mission
- (2) The adequacy of resources and organization to meet its mission
- (3) The outcomes that indicate that the mission is met
- (4) The reasonable assurance of the continued meeting of the mission

### **3.2.3 Timing.**

**3.2.3.1** The accrediting body shall evaluate a program for candidacy only at the invitation of the party responsible for the candidate program.

**3.2.3.2** The accrediting body shall have the right to initiate a review of the accreditation status of an accredited certifying entity at any time.

**3.2.4\* Term.** Accreditation shall not be permanent. The accrediting body shall develop and maintain policies regarding the term for which accreditation is granted and the periodic reevaluation of programs that it accredits.

### **3.2.5 Appeals.**

**3.2.5.1** The accrediting body shall establish policies and procedures for appealing those decisions refusing or terminating accreditation (or candidacy) of a program.

**3.2.5.2** The accrediting body shall maintain the accreditation (or candidacy) status of the program until completion of the appeal process.

**3.2.6\* Change in Scope.** The accrediting body shall develop and maintain policies and procedures that address changes in the scope of certifying activities by an accredited certifying entity.

**3.2.7 Accreditation Procedures.** The steps in the initial accreditation process and subsequent reaccreditation(s) shall consist, at a minimum, of the following:

- (1) A self-analysis of the candidate program
- (2) A written report of the results of the self-analysis
- (3) A review of the report by the accrediting body
- (4) A site visitation by the accrediting body to examine the applicant's certification system in relation to the criteria for accreditation established by the accrediting body
- (5) A written preliminary report to the applicant by the accrediting body concerning the status of the application
- (6) An opportunity and a reasonable period for the applicant to comment on the preliminary report before final action is taken relative to the accreditation status
- (7) A final report and written decision regarding the application and accreditation status

**3.2.7.1** The accrediting body shall develop, maintain, and furnish to all applicants statements of the topics to be contained in the self-analysis required in 3.2.7(1).

**3.2.7.2** The accrediting body shall develop, maintain, and furnish to all applicants statements of the procedures to be used in the site visitation required in 3.2.7(4).

**3.2.7.3** The accrediting body shall develop and maintain policies for the selection, training, and evaluation of personnel who conduct the site visitation required in 3.2.7(4).

**3.2.8 Withdrawal of Application.** The accrediting body shall permit an applicant to withdraw an application for accreditation at any time before a final decision is made on that application.

### 3.3 Accreditation Process for Degree-Granting Entities.

**3.3.1\* Mission.** The accrediting body shall be independent of direct governmental control and shall have sole responsibility for the final decision on the accreditation of a degree-granting entity.

**3.3.2 Criteria.** Accrediting bodies shall utilize evaluative criteria and processes that judge the following:

- (1) The appropriateness of the candidate program's mission
- (2) The adequacy of resources and organization to meet its mission
- (3) The outcomes that indicate that the mission is met
- (4) The reasonable assurance of the continued meeting of the mission

**3.3.3 Review Status.** The accrediting body shall have the right to initiate a review of the accreditation status of an accredited degree-granting entity at any time.

**3.3.4 Term.** Accreditation shall not be permanent. The accrediting body shall develop and maintain policies regarding the term for which accreditation is granted and the periodic reevaluation of programs that it accredits. The period of accreditation shall not be longer than the time elapsing between general institutional accreditations.

#### 3.3.5 Appeals.

**3.3.5.1** The accrediting body shall establish policies and procedures for appealing those decisions refusing or terminating accreditation (or candidacy) of a program.

**3.3.5.2** The accrediting body shall maintain the accreditation (or candidacy) status of the program until completion of the appeal process.

**3.3.6\* Change in Scope.** The accrediting body shall develop and maintain policies and procedures that address changes in the scope of degree-granting activities by an accredited degree-granting entity.

**3.3.7 Accreditation Procedures.** The steps in the initial accreditation process and subsequent reaccreditation(s) shall consist, at a minimum, of the following:

- (1)\* A demonstration by the candidate institution that it is generally accredited as a postsecondary, academic, degree-granting institution
- (2) A self-analysis of the candidate program
- (3) A written report of the results of the self-analysis
- (4) A review of the report by the accrediting body
- (5) A site visitation by the accrediting body to examine the applicant's degree-granting system in relation to the criteria for accreditation established by the accrediting body
- (6) A written preliminary report to the applicant by the accrediting body concerning the status of the application
- (7) An opportunity and a reasonable period for the applicant to comment on the preliminary report before final action is taken relative to the accreditation status
- (8) A final report and written decision regarding the application and accreditation status

**3.3.7.1** The accrediting body shall develop, maintain, and furnish to all applicants statements of the topics to be contained in the self-analysis required in 3.3.7(2).

**3.3.7.2** The accrediting body shall develop, maintain, and furnish to all applicants statements of the procedures to be used in the site visitation required in 3.3.7(5).

**3.3.7.3** The accrediting body shall develop and maintain policies for the selection, training, and evaluation of personnel who conduct the site visitation required in 3.3.7(5).

**3.3.8 Withdrawal of Application.** The accrediting body shall permit an applicant to withdraw an application for accreditation at any time before a final decision is made on that application.

## Chapter 4 Certifying Entity Requirements

### 4.1 Administration of Programs.

**4.1.1\* Authority.** The certifying entity that is a candidate for accreditation shall provide documentation of its authority to issue certificates.

**4.1.2 Mission and Goals.** The certifying entity shall document its mission and goals.

**4.1.3 Levels.** The certifying entity shall publish a listing of the certification levels that it has adopted, including career path and prerequisites, if any, for each level.

#### 4.1.4 Job Performance Requirements.

**4.1.4.1\*** The certifying entity within the United States shall utilize the job performance requirements found in the applicable NFPA professional qualification standards, and other NFPA standards related to the competence of emergency responders. Certifying entities outside the United States shall utilize the job performance requirements in those standards that are adopted by the authority having jurisdiction for non-U.S. certifying entities.

**4.1.4.2** The certifying entity shall provide to applicants, on request, a listing of the job performance requirements to be used in the certification process and the prerequisites required before taking examinations at the various certification levels.

**4.1.5\* Funding.** The certifying entity shall provide evidence of the financial capability to support its continuous operation. The certifying entity shall provide documentation to describe the source(s) of its funding. The certifying entity shall utilize the budgetary and auditing procedures established by the authority having jurisdiction.

#### 4.1.6 Record Keeping/Documentation.

**4.1.6.1** The certifying entity shall adopt policies and procedures consistent with applicable local, state/provincial, and federal requirements, specifying the information it will reserve or keep confidential and the information it will release or make available.

**4.1.6.2\*** The certifying entity shall maintain a record-keeping system that ensures the retrievability and preservation of certification records.

#### 4.1.7 Staffing.

**4.1.7.1** The certifying entity shall have and maintain the personnel resources necessary to implement and sustain the certification system.

**4.1.7.2\*** The certifying entity shall adopt and publish minimum criteria for the evaluators used in its programs. At a minimum, evaluators shall have the following skills capabilities:

- (1) A demonstrable proficiency in the knowledge and skills for the subject matter
- (2) A familiarity with the evaluation/examination and record-keeping processes

**4.1.7.3** The certifying entity shall develop and maintain a process for the periodic evaluation of evaluators to assess degree of skills and knowledge levels.

#### **4.1.8 Facilities and Equipment.**

**4.1.8.1** The certifying entity shall provide adequate space for classroom and manipulative skills testing as required to serve its purposes.

**4.1.8.2** The facilities and equipment provided shall ensure that the health and safety of the participants is safeguarded.

#### **4.1.9 Delegation of Authority.**

**4.1.9.1\*** An accredited entity that elects to delegate some or all of its certifying authority to another entity shall establish written policies regarding such delegation.

**4.1.9.2** The delegated certification authority shall be conducted under the same procedures, criteria, and standards as those used by the accredited entity. Such delegated authority shall not be transferable.

**4.1.9.3** The accredited entity shall be responsible for compliance with the criteria of the accrediting body.

**4.1.9.4\*** The accredited entity shall not delegate its certifying authority to another entity that has broader authority.

**4.1.10\* Conflicts of Interest.** Certifying entities shall establish policies and procedures to ensure that no individual, entity, or interest group exercises undue or inappropriate influence over the certification system. A national standards-making body that wishes to certify individuals to a standard it has developed shall establish an independent mechanism to certify such individuals.

#### **4.2 Policies and Procedures.**

**4.2.1\* Statutory Compliance.** The certifying entity shall provide evidence of compliance with applicable statutes and other local, state/provincial/territorial, and federal regulations operative in its jurisdiction.

**4.2.2 Nondiscrimination.** The certifying entity shall ensure that its services are available to all qualified individuals without regard to race, creed, sex, age, or ethnic origin.

#### **4.2.3 Safety and Health.**

**4.2.3.1\*** The certifying entity shall ensure the safety and health of individuals participating in the evaluation process by complying with applicable NFPA standards (e.g., NFPA 1500, *Standard on Fire Department Occupational Safety and Health Program*) or equivalent standards adopted by the authority having jurisdiction.

**4.2.3.2\*** Personal protective clothing, apparatus, equipment, and facilities utilized in the evaluation of candidates shall meet the applicable NFPA standard(s) as required in Chapters 4, 5, and 7 of NFPA 1500, *Standard on Fire Department Occupational Safety and Health Program*, or equivalent standards adopted by the authority having jurisdiction.

#### **4.2.4 Evaluation/Testing.**

**4.2.4.1\*** The certifying entity shall establish and maintain procedures for administering a standardized written and manipulative skills examination, where applicable, for each level of certification offered.

**4.2.4.2** Examinations shall be administered or caused to be administered by the certifying entity for each level of certification offered.

**4.2.4.3** Examinations shall be drawn from a test bank(s) and/or job performance skills list maintained by the certifying entity.

**4.2.4.4** The certifying entity shall establish an evaluation security system that will prevent compromising of the evaluation instrument(s) and the evaluation process.

**4.2.4.5** The certifying entity shall ensure that questions and job skill tests used in certification examinations are reliable discriminators.

**4.2.4.6** The certifying entity shall ensure that question item banks utilized in the certification process are of sufficient size to allow generation of multiple written examination forms.

**4.2.4.7\*** The certifying entity shall ensure that cognitive and manipulative skills examinations are comprehensive with respect to the requirements of the professional qualification standard being tested. The certifying entity shall have the means to evaluate each objective in the level for which accreditation is being sought. Examinations shall sample the various objectives contained in each professional qualification standard.

**4.2.4.8\*** Certifying entities shall ensure that evaluators of manipulative skills testing perform their evaluations in an objective manner.

**4.2.4.9\*** When performance in actual conditions cannot be demonstrated, manipulative skills shall be performed in a simulated environment, if the simulation would lead to the successful evaluation of the skills required by the actual condition.

#### **4.2.5 Historical Recognition.**

**4.2.5.1** The certifying entity shall document the policy and procedures to be used toward historical recognition of prior training conducted within its jurisdiction.

**4.2.5.2** Adoption of any standard or program shall not render any individual's prior certification invalid.

**4.2.6 Reciprocity.** The certifying entity shall develop a policy and procedure to be used to evaluate certification or training received in another jurisdiction. Accredited entities shall examine the credentials of individuals from other accredited entities to determine which level of certification, if any, is applicable.

**4.2.7\* Current Knowledge and Recertification.** The certifying entity shall provide documentation describing a current knowledge policy and a recertification policy.

**4.2.8 Suspension, Revocation, and Denial.** The certifying entity shall develop and maintain policies and procedures for the suspension, revocation, and denial of certification.

**4.2.9\* Appeals.** The certifying entity shall document procedures to resolve disputes arising from the interpretation or application of any provision of the certification process.

## Chapter 5 Degree-Granting Entity Requirements

### 5.1 Administration of Programs.

**5.1.1 Authority.** The degree-granting entity that is a candidate for accreditation shall provide documentation of its authority to issue degrees.

**5.1.2 Mission and Goals.** The degree-granting entity shall document its mission and goals.

**5.1.3\* Levels.** The degree-granting entity shall publish a listing of the degree levels that it offers, including career path and prerequisites, if any, for each level.

**5.1.4\* Student-Based Outcomes.** The degree-granting entity shall develop and utilize student-based outcomes in the development and delivery of the academic program.

**5.1.5\* Funding.** The degree-granting entity shall provide evidence of financial capability to support its continuous operation. The degree-granting entity shall provide documentation to describe the source(s) of its funding. The degree-granting entity shall utilize the budgetary and auditing procedures established by the authority having jurisdiction.

### 5.1.6 Record Keeping/Documentation.

**5.1.6.1** The degree-granting entity shall adopt policies and procedures consistent with applicable local, state/provincial/territorial, and federal requirements, specifying the information it will reserve or keep confidential and the information it will release or make available.

**5.1.6.2\*** The degree-granting entity shall maintain a record-keeping system that ensures the retrievability and preservation of degrees awarded.

### 5.1.7 Staffing.

**5.1.7.1\*** The degree-granting entity shall have and maintain the personnel resources necessary to implement and sustain the academic program. At a minimum, faculty shall have the following skills capabilities:

- (1) An adequate knowledge of the subject matter
- (2) An understanding of the instructional process

**5.1.7.2\*** The degree-granting entity shall develop and maintain a process for the periodic evaluation of faculty to assess instructional ability and knowledge levels.

**5.1.8\* Facilities and Equipment.** The candidate degree-granting entity shall provide an adequate learning environment.

### 5.1.9 Reserved.

**5.1.10 Conflicts of Interest.** Degree-granting entities shall establish policies and procedures to ensure that no individual, entity, or interest group exercises undue or inappropriate influence over the degree-granting process.

## 5.2 Policies and Procedures.

**5.2.1 Statutory Compliance.** The degree-granting entity shall provide evidence of compliance with applicable statutes and other local, state/provincial/territorial, and federal regulations operative in its jurisdiction.

**5.2.2 Nondiscrimination.** The degree-granting entity shall ensure that its services are available to all qualified individuals without regard to race, creed, sex, age, or ethnic origin.

### 5.2.3 Safety and Health.

**5.2.3.1\*** The degree-granting entity shall ensure the safety and health of individuals participating in the instructional/evaluation process by complying with applicable NFPA standards (e.g., NFPA 1500, *Standard on Fire Department Occupational Safety and Health Program*) or equivalent standards adopted by the authority having jurisdiction.

**5.2.3.2\*** Personal protective clothing, apparatus, equipment, and facilities utilized in the instruction/evaluation of candidates shall meet the applicable NFPA standard(s) as required in Chapters 4, 5, and 7 of NFPA 1500, *Standard on Fire Department Occupational Safety and Health Program*, or equivalent standards adopted by the authority having jurisdiction.

**5.2.4\* Evaluation and Testing.** The degree-granting entity shall develop methods of evaluating student progress towards completion of course and degree requirements.

### 5.2.5 Historical Recognition.

**5.2.5.1** The degree-granting entity shall document the policy and procedures to be used toward historical recognition of degrees awarded prior to the date of its accreditation.

**5.2.5.2** Adoption of any standard or program shall not render invalid any individual's degree or degrees received prior to the date of its accreditation.

**5.2.6 Reciprocity.** The degree-granting entity shall develop a policy and procedure to be used to evaluate credits received from another institution. Accredited entities shall examine the credentials of individuals from other accredited entities to determine which level of transferability, if any, is applicable.

### 5.2.7 Reserved.

**5.2.8 Revocation and Denial.** The degree-granting entity shall develop and maintain policies and procedures for the revocation and denial of degrees.

**5.2.9\* Appeals.** The degree-granting entity shall document procedures to resolve disputes arising from the interpretation or application of any provision of the degree-granting process.

## Chapter 6 Referenced Publications

**6.1** The following documents or portions thereof are referenced within this standard as mandatory requirements and shall be considered part of the requirements of this standard. The edition indicated for each referenced mandatory document is the current edition as of the date of the NFPA issuance of this standard. Some of these mandatory documents might also be referenced in this standard for specific informational purposes and, therefore, are also listed in Appendix C.

**6.1.1 NFPA Publication.** National Fire Protection Association, 1 Batterymarch Park, P.O. Box 9101, Quincy, MA 02269-9101.

NFPA 1500, *Standard on Fire Department Occupational Safety and Health Program*, 1997 edition.

## Appendix A Explanatory Material

*Appendix A is not a part of the requirements of this NFPA document but is included for informational purposes only. This appendix contains explanatory material, numbered to correspond with the applicable text paragraphs.*

**A.1.3.1** Fire service organizations, as public agencies, are open to public scrutiny and are held accountable for their actions. There is value in being able to demonstrate that the personnel of these agencies are certified as meeting standards of competency by an entity that has itself been evaluated by an independent, thorough, objective, and public process and approved (accredited) as meeting the requirements of the process. Accreditation establishes accountability for performance by putting competency on the record so that it can be evaluated on the record.

**A.2.1.2 Approved.** The National Fire Protection Association does not approve, inspect, or certify any installations, procedures, equipment, or materials; nor does it approve or evaluate testing laboratories. In determining the acceptability of installations, procedures, equipment, or materials, the authority having jurisdiction may base acceptance on compliance with NFPA or other appropriate standards. In the absence of such standards, said authority may require evidence of proper installation, procedure, or use. The authority having jurisdiction may also refer to the listings or labeling practices of an organization that is concerned with product evaluations and is thus in a position to determine compliance with appropriate standards for the current production of listed items.

**A.2.1.3 Authority Having Jurisdiction.** The phrase “authority having jurisdiction” is used in NFPA documents in a broad manner, since jurisdictions and approval agencies vary, as do their responsibilities. Where public safety is primary, the authority having jurisdiction may be a federal, state, local, or other regional department or individual such as a fire chief; fire marshal; chief of a fire prevention bureau, labor department, or health department; building official; electrical inspector; or others having statutory authority. For insurance purposes, an insurance inspection department, rating bureau, or other insurance company representative may be the authority having jurisdiction. In many circumstances, the property owner or his or her designated agent assumes the role of the authority having jurisdiction; at government installations, the commanding officer or departmental official may be the authority having jurisdiction.

**A.2.1.9 Simulation.** It is the intent of the committee that actual tasks be performed as required by the applicable standards [i.e., it is not acceptable merely to explain how to use a self-contained breathing apparatus (SCBA) in a smoke-filled environment]. The student should actually demonstrate the ability to use the SCBA in the smoke-filled environment. It is further the intent that simulation refers only to the environment in which the task is performed (e.g., a room filled with smoke produced by a smoke-generating device as opposed to task demonstration in a burning building).

**A.3.1.1** The accrediting body should have the ability to operate independently of political or economic influences either within or outside the organization that sponsors the accrediting activity. The accrediting body should not be obligated to, nor should its decisions on particular schools or programs be reviewed by, any other body having political or economic goals that could conflict with the educational goals of accreditation.

**A.3.1.5** The NFPA’s professional qualifications system is made up of NFPA 1000, *Standard for Fire Service Professional Qualifications Accreditation and Certification Systems*, and the following 10 standards, which set the job performance requirements for a number of fire and related emergency service professions:

- (1) NFPA 1001, *Standard for Fire Fighter Professional Qualifications*
- (2) NFPA 1002, *Standard for Fire Apparatus Driver/Operator Professional Qualifications*
- (3) NFPA 1003, *Standard for Airport Fire Fighter Professional Qualifications*
- (4) NFPA 1021, *Standard for Fire Officer Professional Qualifications*
- (5) NFPA 1031, *Standard for Professional Qualifications for Fire Inspector and Plan Examiner*
- (6) NFPA 1033, *Standard for Professional Qualifications for Fire Investigator*
- (7) NFPA 1035, *Standard for Professional Qualifications for Public Fire and Life Safety Educator*
- (8) NFPA 1041, *Standard for Fire Service Instructor Professional Qualifications*
- (9) NFPA 1051, *Standard for Wildland Fire Fighter Professional Qualifications*
- (10) NFPA 1061, *Standard for Professional Qualifications for Public Safety Telecommunicator*

The standards that comprise the system establish, in terms of job performance requirements, the minimum criteria necessary to perform the specific job function. The standards are not training outlines — they are the criteria for the evaluation of an individual’s ability to perform critical job functions. In many cases this evaluation is conducted as part of a certification process.

Other NFPA standards that a certifying entity can seek to certify include, but are not necessarily limited to, the following:

- (1) NFPA 472, *Standard for Professional Competence of Responders to Hazardous Materials Incidents*
- (2) NFPA 473, *Standard for Competencies for EMS Personnel Responding to Hazardous Materials Incidents*
- (3) NFPA 600, *Standard on Industrial Fire Brigades* (This standard might not be applicable, as it might not set criteria that can be used for certification.)
- (4) NFPA 1521, *Standard for Fire Department Safety Officer*

The committee recognizes that accrediting bodies can be called upon to accredit certification systems from national jurisdictions that utilize standards other than those of the NFPA. It is the committee’s strong opinion that accrediting bodies should take into account that the international community can, at their discretion, establish their own standards that can make it inappropriate to assess them by NFPA professional qualifications standards. It is the committee’s opinion that applicant certifying entities from the international community should, at the entities’ discretion, be evaluated based upon such national, provincial, or territorial standards as can exist in their own jurisdiction.

There is no nationally recognized standardized curriculum for fire-related, academic, degree-granting programs offered by institutions of higher education. Determination of curricula is the province of the institution awarding the degree(s). Consequently, a wide divergence is expected and should be taken into account by the accrediting body. It is the committee’s opinion that applicant institutions should be evaluated based upon their own self-defined curricula.

**A.3.1.6** The accrediting body should provide evidence that its policies, evaluative criteria, procedures, and evaluative decisions are accepted by the appropriate communities of interest, such as the fire service, educators, educational institutions, other accrediting bodies, practitioners, employers, and public agencies.

**A.3.2.4** The term of accreditation should be no longer than 5 years. This time frame is based on the revision cycle for NFPA standards and the time required for certifying entities to implement changes into their programs.

**A.3.2.6** Such policy statements should address possible changes in the scope of a certifying entity's activities. The policy, at a minimum, should make provision for the certification entity to withdraw voluntarily all or some of its programs from the accreditation system.

**A.3.3.1** See A.3.1.1.

**A.3.3.6** Such policy statements should address possible changes in the scope of a degree-granting entity's activities. The policy, at a minimum, should make provision for the degree-granting entity to withdraw voluntarily all or some of its programs from the accreditation system.

**A.3.3.7(1)** Such accreditation is usually provided by a regional accrediting organization (e.g., the North Central Association of Schools and Colleges or the Southern Association of Colleges and Schools).

**A.4.1.1** The documentation required by this section should be either of the following:

- (1) Legislative acts; resolutions; state/provincial and federal statutes; and administrative codes from a state/provincial/territorial or national government authorizing the entity to certify the professional competence of fire service personnel
- (2) Significant evidence of support for its accreditation as a certifying entity from within its constituency

The accrediting body should verify the certifying entity's empowerment, such as the existence of laws that designate the organization as a certifying entity or that are broad enough in scope to encompass certifying activities of the organization seeking accreditation or evidence of support from state/provincial fire service organizations and/or other interested or affected organizations that are served by the organization seeking accreditation.

**A.4.1.4.1** See A.3.1.5.

**A.4.1.5** Examples of funding sources that a certifying entity could use to support the certification process are as follows:

- (1) Governmental appropriation, such as federal, state, county, and local
- (2) Fee generation, such as fees charged for the certification process or membership in the system
- (3) Public or private grants
- (4) Fire service trust funds

**A.4.1.6.2** The record-keeping system required in Section 4.1 should provide for easy retrieval of information. It could be either a hard copy or electronic (computerized) filing system.

**A.4.1.7.2** This should not be construed as precluding the usage of non-fire service subject matter experts as evaluators.

**A.4.1.9.1** It is not the intent of this standard to mandate the delegation of an entity's authority.

**A.4.1.9.4** It is the intent of the committee that if certifying authority is to be delegated by an entity, that it not be delegated to organizations or entities that represent a broader geographical base or a broader constituency than the delegating entity.

**A.4.1.10** See 3.1.2.

**A.4.2.1** The certifying entity should address, at a minimum, the following:

- (1) Bylaws and operational policies
- (2) Compliance with state/provincial/territorial and federally mandated standards, such as Occupational Safety and Health Administration (OSHA), Environmental Protection Agency (EPA), Family Educational Right to Privacy Act (FERPA)
- (3) Equal Employment Opportunities Act
- (4) Affirmative action policies
- (5) Americans with Disabilities Act
- (6) Age Discrimination Employment Act

**A.4.2.3.1** The certifying entity is responsible for the safety of those individuals who participate in the examination process. To comply with this requirement of the standard, the entity should have a safety program that, at a minimum, meets the requirements of NFPA 1500, *Standard on Fire Department Occupational Safety and Health Program*. As required in Section 2.5 of NFPA 1500, an individual meeting the requirements of NFPA 1521, *Standard for Fire Department Safety Officer*, should be assigned to oversee this program.

**A.4.2.3.2** The protective clothing, apparatus, equipment, and facilities used in the evaluation of candidates should be in good repair and meet the requirements of the applicable NFPA standards.

**A.4.2.4.1** The committee recognizes that for certain levels of certification a manipulative skills examination might not be appropriate. However, it is the opinion of the committee that manipulative skills examinations are required for most levels of certification.

The committee recognizes that computer-based evaluation is becoming increasingly common. It is the opinion of the committee that computer-based evaluations are merely a different mechanism for evaluation rather than a different logical type and that, therefore, the requirements of 4.1.2 should apply thereto.

**A.4.2.4.7** It is not the committee's intention to require that a certification examination, whether cognitive or manipulative, examine each and every objective of the standard or level for which certification is being sought. The committee strongly believes that a randomized sample of objectives chosen from an exhaustive objective pool is adequate. The sampling can be weighted to conform to the relative importance of a particular subject area.

**A.4.2.4.8** Generally, objectivity can be increased if a manipulative skills testing checklist is used. The checklist should include each task that should be completed in order to address the stated objective successfully.

**A.4.2.4.9** The committee recognizes that all training and evaluation necessarily involves some element of simulation. The committee's intent is to require that evaluation be conducted in such manner that it approximates actual job performance conditions to the fullest possible extent. To the extent that it

is not possible to duplicate actual job performance conditions, simulation is appropriate. See also A.2.1.9.

**A.4.2.7** The certifying entity should address, at a minimum, the following:

- (1) Establishing a period of time for which a certification is valid
- (2) Establishing procedures that address lapsed certification
- (3) Identifying a continuing education process (i.e., progression to next level of completion)
- (4) If time-limited certification, establishing recertification requirements and criteria, procedures, and administrative responsibilities

**A.4.2.9** The appeal procedures should address, at a minimum, the following:

- (1) Method of notification/time period
- (2) Personnel or agencies notified (e.g., appellant, fire chiefs/departments)
- (3) Response period
- (4) Review process, such as hearing, communications, and so forth
- (5) Final ruling
- (6) Final notification of ruling

**A.5.1.3** The types of fire-related academic programs found are at the associate, baccalaureate, and master's levels, with emphasis in areas of study such as fire science and technology, fire administration, and engineering and technology. Besides providing information about career paths and prerequisites, additional information concerning admissions policies and procedures, program requirements, graduation requirements, and academic advising should be provided.

**A.5.1.4** Student-based outcomes should provide the student with an understanding of knowledge and skill levels acquired through the completion of the degree. It also provides this same information to potential employers. Advisory committees, potential employers, and nationally recognized standards and competencies can be utilized in developing these outcomes. Selected outcomes can require the successful completion of multiple courses prior to fulfillment of such outcomes.

**A.5.1.5** Examples of funding sources that a degree-granting entity could use to support the degree program(s) are as follows:

- (1) Governmental appropriation, such as federal, state, county, and local
- (2) Fee generation, such as fees charged for the degree program or membership in the system
- (3) Public or private grants
- (4) Internal or external scholarship funds
- (5) Fire service trust funds

**A.5.1.6.2** The record-keeping system required in Section 5.1 should provide for easy retrieval of information. It could be either a hard copy or electronic (computerized) filing system.

**A.5.1.7.1** Good, high-quality faculty members are critical to the success of any academic program. A combination of education and experience is the foundation of this quality. This education and experience should be recognized in the hiring, promotion, and tenure of faculty members. When determining staffing levels, the following should also be taken into consideration: teaching loads, academic advising, student recruitment, educational and experience background, professional certifications, research requirements, and public service activities.

**A.5.1.7.2** A variety of mechanisms exist to evaluate faculty, including formative and summative student evaluations, peer evaluations, and administrative evaluations.

**A.5.1.8** The learning environment will vary based on the delivery methods used in the academic program. Academic institutions should take this into consideration when determining the needs associated with traditional environments versus those of distant learning, along with support services found in laboratory classes and library/reference services.

**A.5.2.3.1** The degree-granting entity is responsible for the safety of those individuals who participate in the instructional/examination process. To comply with this requirement of the standard, the entity should have a safety program that at a minimum meets the requirements of NFPA 1500, *Standard on Fire Department Occupational Safety and Health Program*. As required in Section 2.5 of NFPA 1500, an individual meeting the requirements of NFPA 1521, *Standard for Fire Department Safety Officer*, should be assigned to oversee this program.

**A.5.2.3.2** The protective clothing, apparatus, equipment, and facilities used in the instruction/evaluation of students should be in good repair and meet the requirements of the applicable NFPA standards.

**A.5.2.4** Academic programs should utilize a variety of methods to evaluate student progress towards course and degree requirements, including traditional examinations, assignments, projects, and research papers.

**A.5.2.9** The appeal procedures should address, at a minimum, the following:

- (1) Method of notification
- (2) Time period for notification
- (3) Response period
- (4) Review process, including hearing, communications, and so forth
- (5) Final ruling
- (6) Final notification of ruling

## Appendix B Accreditation and the Fire Service

*This appendix is not a part of the requirements of this NFPA document but is included for informational purposes only.*

**B.1 Purpose.** The purpose of this appendix is to give an overview of the concept of accreditation for institutions and/or programs. The outline covers a brief description of the activity and the process. The outcomes of accreditation are intended to ensure quality for the learner, the educational institution or program, and, ultimately, the public. Accreditation by a recognized accrediting body serves as a significant indicator that an institution and/or program is meeting established standards and stated objectives.

### B.2 Role and Value of Accreditation.

**B.2.1** Accreditation is a status granted to an educational institution or a program that has been found to meet or exceed stated criteria of educational quality. For the most part, accreditation is voluntarily sought by institutions and programs and is conferred by nongovernmental bodies.

**B.2.2** Accreditation has two fundamental purposes: to ensure the quality of the institution or program and to assist in the improvement of the institution or program. Accreditation,

which applies to institutions or programs, is to be distinguished from certification, which applies to individuals.

**B.2.3** The bodies conducting institutional accreditation are national or regional in scope and comprise the institutions that have achieved and maintained accreditation. A specialized body conducting accreditation of a program preparing students for a profession or occupation is often closely associated with professional associations in the field.

**B.2.4** Both institutional and specialized bodies conduct the accreditation process using a common pattern. The pattern requires integral self-study of the institution or program followed by an on-site visit by an evaluation team and a subsequent review and decision by a central governing group. Within this general pattern, the various accrediting bodies have developed a variety of individual procedures adapted to their own circumstances. Increasingly, attention has been given to education outcomes as a basis for evaluation.

A recognized accrediting body can be regarded as qualified to conduct evaluations of institutions and/or programs seeking accreditation, and accreditation by such bodies is generally recognized and accepted. Institutional or specialized accreditation cannot, however, guarantee the quality of individual graduates or of individual courses within an institution or program, but it can give reasonable assurance of the context and quality of the education offered.

An institutional accrediting body considers the characteristics of whole institutions. For this reason, an institutional accrediting body gives attention not only to the educational offerings of the institutions it accredits but also to other institutional characteristics such as the student personnel services, financial conditions, and administrative strength.

The accreditation of an institution by an institutional accrediting body certifies to the general public that the institution is as follows:

- (1) Has appropriate purposes
- (2) Has the resources needed to accomplish its purposes
- (3) Can demonstrate that it is accomplishing its purposes
- (4) Gives reason to believe that it will continue to accomplish its purposes

Institutional improvement is encouraged by an accrediting body through the requirement that the accredited institution conducts periodic self-evaluations seeking to identify what the institution does well, determining the areas in which improvement is needed, and developing plans to address needed improvements. While the granting of accreditation indicates an acceptable level of quality, an institution, however excellent, is capable of improvement, which must come from its own clear identification and understanding of its strengths and weaknesses.

Improvement is also encouraged by the accrediting body through its publications and through the advice and counsel provided by the visiting team, which is comprised of experienced educators drawn primarily from accredited institutions.

The focus of an institutional accrediting body on an institution as a total operating unit provides assurance that the general characteristics of the institution have been examined and found to be satisfactory. Institutional accreditation, concerned with evaluating the institution as a whole, does not seek to deal with any particular program in great detail, although programs are reviewed as a part of the consideration of the entire institution. Occasionally there are institutions

offering a single program (free-standing schools) that might seek institutional and/or specialized accreditation.

**B.2.5** In fulfilling its two purposes, quality assurance and institutional and program improvement, accreditation provides service of value to several constituencies.

**B.2.5.1** To the **public**, the values of accreditation include the following:

- (1) An assurance of external evaluation of the institution or program and a finding that there is conformity to general expectations in postsecondary education or the professional field
- (2) An identification of institutions and programs that have voluntarily undertaken explicit activities directed toward improving the quality of the institution and its professional programs and are carrying them out successfully
- (3) An improvement in the professional services available to the public, as accredited programs modify their requirements to reflect changes in knowledge and practice generally accepted in the field
- (4) A decreased need for intervention by public agencies in the operations of educational institutions, since their institutions, through accreditation, are providing for the maintenance and enhancement of educational quality

**B.2.5.2** To the **learners**, accreditation provides the following:

- (1) An assurance that the educational activities of an accredited institution or program have been found to be satisfactory, and therefore meet the needs of students
- (2) Assistance in the transfer of credit or certification between institutions or in the admission of students to advanced programs through the general acceptance of credits among accredited institutions where the performance of the student has been satisfactory and the credits to be transferred are appropriate to the receiving institution

**B.2.5.3** To the **institution**, accreditation provides the following:

- (1) The stimulus for self-evaluation and self-directed institutional and program improvement
- (2) The strengthening of institutional and program self-evaluation by the review and counsel provided through the accrediting body
- (3) The application of criteria of accrediting bodies, which helps guard against external encroachments harmful to institutional or program quality by providing benchmarks independent of forces that might impinge on individual institutions
- (4) The enhancing of the reputation of an accredited institution or program because of public regard for accreditation
- (5) One means by which an institution can gain eligibility for certain programs of governmental aid; accreditation is also usually relied on by private foundations as a highly desirable indicator of institutional and/or program quality

**B.2.5.4** Accreditation serves the **profession** by contributing to the unity of the profession by bringing together practitioners, teachers, and learners in an activity directed at improving preparation and professional practice.

**B.3 Credits.** The material is sourced from the *COPA Handbook on Accreditation*. The handbook should be consulted for more detailed information on the accreditation process.
