

AEROSPACE INFORMATION REPORT	AIR1973™	REV. B
	Issued 1987-01 Reaffirmed 2013-01 Revised 2022-12	
Superseding AIR1973A		
(R) Trademarks, Hydraulic System Component Manufacturers, Index of		

RATIONALE

Revise document to incorporate additional current manufacturer, assembly plant identification, and part identification logos. New Table 1 lists companies in alphabetical order while Table 2 lists companies by their current CAGE code.

1. SCOPE

This index of trademarks of current and former manufacturers of aerospace fittings, couplings, hoses, and tube support devices is within the scope of activities of the SAE G-3 Committee and available at the time of publication. Supplier markings from previous publication are maintained for component traceability.

Suggestions for additional entries or corrections shall be sent to SAE in Warrendale, PA.

1.1 Purpose

This document provides users of hydraulic system components a means of identifying the manufacturer's identification logo used in part markings.

2. APPLICABLE DOCUMENTS

There are no referenced publications specified herein.

3. ENDORSEMENT

The listing of a manufacturer's CAGE code or identification letters or symbols specified in this report should not be construed as an endorsement or approval by the SAE or its members of either the listed manufacturer or their products. Some of the markings by different manufacturers as shown herein are, in fact, considered to be too similar and/or complex for reduction. Manufacturers, when choosing markings, are encouraged to utilize identification that is significant, distinctive, permanent, and easily identifiable. This document is intended to list only permanent markings used on actual components.

SAE Executive Standards Committee Rules provide that: "This report is published by SAE to advance the state of technical and engineering sciences. The use of this report is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."

SAE reviews each technical report at least every five years at which time it may be revised, reaffirmed, stabilized, or cancelled. SAE invites your written comments and suggestions.

4. MANUFACTURER'S IDENTIFICATION

4.1 Method

Marking method of components shall be as specified in the applicable product specification.

4.2 Location

Manufacturers' identification will be located as specified in the applicable product specification. If location is not specified, the identification will be marked in an area visible without disassembly of the device.

4.3 Manufacturer's Identification (CAGE Code)

Current CAGE codes, used for identification, are available from <http://cage.dla.mil>.

4.4 Manufacturer's Symbols

Symbols are not drawn to scale.
