Identification of Truck, Trailer, and Bus Wheel Seals and Associated Packaging

RATIONALE

The Purpose of this document is “to provide users of truck, trailer, and bus wheel seals a means of identifying the suppliers of all such components by use of the symbology utilized by the suppliers on their components and packaging”, and a form is included for individual manufacturers to submit trademark or identification symbols to SAE. However, there has never been established a listing or registry of the identification symbols available to users of the products.

Because the purpose of SAE J2224 has not been accomplished, and the lack of a registry for identification by symbology has had no effect on the industry, it is appropriate to cancel the document.

CANCELLATION NOTICE

This Technical Report has been declared “CANCELLED” as of September 2015. By the action, this document will remain listed in the respective index, if applicable. Cancelled Technical Reports are available from SAE.

1. SCOPE

This SAE Information Report lists the symbols used by suppliers of truck, trailer, and bus wheel seals to identify their products.

These symbols appear on seals and packaging.

1.1 Purpose

The purpose of this document is to provide users of truck, trailer, and bus wheel seals a means of identifying the suppliers of all such components by use of the symbology utilized by the suppliers on their components and packaging.

2. REFERENCES

There are no referenced publications specified herein.

3. GENERAL

3.1 To be listed; the supplier should provide evidence that the symbol is used.

3.2 The following minimum identification is recommended.

3.2.1 Seal Identification

- a. Trademark or ID
- b. Date or date code
- c. Part number
- d. Side identification (examples: oilside, airside)
- e. Country of origin (country where molded)

3.2.2 Packaging Identification

- a. Trademark or ID
- b. Part number
- c. Country of origin (country where molded)

3.3 The method which suppliers use to mark their products and packaging such as metal impressions, etching, laser, molded in marking, and ink marking is the supplier's option.

3.4 The size of a manufacturer's symbol is also an option. However, the symbol should be legible with a maximum of four power magnification.

3.5 A request form for listing and changing symbols is shown in Figure 1.
