SCC FOREWORD

National Standard of Canada

A National Standard of Canada is a standard developed by a Standards Council of Canada (SCC) accredited Standards Development Organization, in compliance with requirements and guidance set out by SCC. More information on National Standards of Canada can be found at www.scc.ca.

SCC is a Crown corporation within the portfolio of Innovation, Science and Economic Development (ISED) Canada. With the goal of enhancing Canada's economic competitiveness and social well-being, SCC leads and facilitates the development and use of national and international standards. SCC also coordinates Canadian participation in standards development, and identifies strategies to advance Canadian standardization efforts.

Accreditation services are provided by SCC to various customers, including product certifiers, testing laboratories, and standards development organizations. A list of SCC programs and accredited bodies is publicly available at www.scc.ca.

UL Standard for Safety for Evaluation for Repurposing Batteries, UL 1974

First Edition, Dated October 25, 2018

Summary of Topics

The First Edition of UL 1974 has been issued to reflect the latest ANSI and SCC approval dates, and to incorporate the proposals dated March 30, 2018 and August 17, 2018.

The new and revised requirements are substantially in accordance with Proposal(s) on this subject dated March 30, 2018 and August 17, 2018.

All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form by any means, electronic, mechanical photocopying, recording, or otherwise without prior permission of UL.

UL provides this Standard "as is" without warranty of any kind, either expressed or implied, including but not limited to, the implied warranties of merchantability or fitness for any purpose.

In no event will UL be liable for any special, incidental, consequential, indirect or similar damages, including loss of profits, lost savings, loss of data, or any other damages arising out of the use of or the inability to use this Standard, even if UL or an authorized UL representative has been advised of the possibility of such damage. In no event shall UL's liability for any damage ever exceed the price paid for this Standard, regardless of the form of the claim.

Users of the electronic versions of UL's Standards for Safety agree to defend, indemnify, and hold UL harmless from and against any loss, expense, liability, damage, claim, or judgment (including reasonable attorney's fees) resulting from any error or deviation introduced while purchaser is storing an electronic Standard on the purchaser's computer system.

UL 1974

Standard for Evaluation for Repurposing Batteries

First Edition

October 25, 2018

This ANSI/CAN/UL Safety Standard consists of the First Edition.

The most recent designation of ANSI/UL 1974 as an American National Standard (ANSI) occurred on October 25, 2018. ANSI approval for a standard does not include the Cover Page, Transmittal Pages, Title Page, Preface or SCC Foreword.

This standard has been designated as a National Standard of Canada (NSC) on October 25, 2018.

CONTENTS

Preface (UL)	5
--------------------	---

INTRODUCTION

1 Scope	8
2 Components	8
3 Units of Measurement	8
4 Undated References	8
5 Normative References	9
6 Glossary	10

CONSTRUCTION

7 General	13
8 Materials	13
9 Enclosures	14
10 Wiring and Connections	14
11 Electrical Spacings and Insulation Levels	14
12 Controls	15
13 Coolant and Other Critical Systems	15
14 Cells and Electrochemical Capacitors	15

QUALITY CONTROL AND SAFETY OF FACILITIES FOR REPURPOSING

15 Quality Control	16
16 Safety of Facilities for Repurposing	16

EXAMINATION OF INCOMING SAMPLES

17 General	17
18 Procedures for Examination and Sorting of Used Batteries and Their Components	17
18.1 General	17
18.2 Information gathering and review as part of the initial sorting procedures	17
18.3 Initial and subsequent rejection procedures	20
18.4 Visual inspection of incoming samples	20
18.5 Gathering and analysis of BMS data	20
18.6 Disassembly and examination	21
18.7 Storage condition tracking	22
18.8 Grading of batteries for repurposing	22

PERFORMANCE

19 Testing for the Sorting and Grading Process	23
19.1 General	23
19.2 Incoming open circuit voltage (OCV) measurements	24
19.3 Incoming high voltage isolation check	24
19.4 Capacity check	25
19.5 Internal resistance check	25
19.6 Check of BMS controls and protection components	26
19.7 Discharge/charge cycle test (monitoring of temperature, voltage and current of cells and
