Technical Specification for Photovoltaic (PV) Modules – Type Approval, Design And Safety Qualification – Retesting, UL 62915

First Edition, Dated March 23, 2022

Summary of Topics

First Edition of the UL IEC-Based Technical Specification for Photovoltaic (PV) Modules – Type Approval, Design and Safety Qualification – Retesting, UL 62915. UL 62915 is an adoption of IEC 62915 (First Edition, issued May 2018). Please note that the National Difference document incorporates all of the U.S. national differences for UL 62915.

The requirements are substantially in accordance with Proposal(s) on this subject dated August 20, 2021 and February 18, 2022.

All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form by any means, electronic, mechanical photocopying, recording, or otherwise without prior permission of UL.

UL provides this Standard "as is" without warranty of any kind, either expressed or implied, including but not limited to, the implied warranties of merchantability or fitness for any purpose.

In no event will UL be liable for any special, incidental, consequential, indirect or similar damages, including loss of profits, lost savings, loss of data, or any other damages arising out of the use of or the inability to use this Standard, even if UL or an authorized UL representative has been advised of the possibility of such damage. In no event shall UL's liability for any damage ever exceed the price paid for this Standard, regardless of the form of the claim.

Users of the electronic versions of UL's Standards for Safety agree to defend, indemnify, and hold UL harmless from and against any loss, expense, liability, damage, claim, or judgment (including reasonable attorney's fees) resulting from any error or deviation introduced while purchaser is storing an electronic Standard on the purchaser's computer system.

MARCH 23, 2022

ANSI/UL 62915-2022

1

UL 62915

**Technical Specification for Photovoltaic (PV) Modules – Type Approval,
Design And Safety Qualification – Retesting**

First Edition

March 23, 2022

This ANSI/UL Standard for Safety consists of the First Edition.

The most recent designation of ANSI/UL 62915 as an American National Standard (ANSI) occurred on March 23, 2022. ANSI approval for a standard does not include the Cover Page, Transmittal Pages, Title Page, or Preface. The National Difference Page and IEC Foreword are also excluded from the ANSI approval of IEC-based standards.

Comments or proposals for revisions on any part of the Standard may be submitted to UL at any time. Proposals should be submitted via a Proposal Request in UL's On-Line Collaborative Standards Development System (CSDS) at <https://csds.ul.com>.

UL's Standards for Safety are copyrighted by UL. Neither a printed nor electronic copy of a Standard should be altered in any way. All of UL's Standards and all copyrights, ownerships, and rights regarding those Standards shall remain the sole and exclusive property of UL.

NATIONAL DIFFERENCES 7

FOREWORD 9

1 Scope 11

2 Normative references 11

 2DV Addition of the following: 11

3 Terms and definitions 12

4 Retesting 12

 4.1 General 12

 4.1DV.1 Modification by replacing the 11th paragraph with the following: 13

 4.1DV.2 Modification throughout the entire standard: 13

 4.2 Test programs for crystalline silicon PV modules 13

 4.3 Test programs for thin-film PV modules 26

 5DV Modification by adding the following new Clauses 5.1DV and 5.2DV: 39

Annex A (informative)

A.1 Required retests for crystalline silicon PV modules, tabular overview 40

 Table A.1DV Modification by replacing the Table with the following table where the Insulation Thickness test (MST 04) and Ignitability test (MST 24) are deleted and the Fire Test (MST 23) is added 41

A.2 Required retests for thin-film PV modules, tabular overview 42

 Table A.2DV Modification by replacing the Table with the following table where the Insulation Thickness test (MST 04) and Ignitability test (MST 24) are deleted and the Fire Test (MST 23) is added 43

A.3 Combined test flow IEC 61215 and IEC 61730 (see [Figure A.1](#) and [Table A.3](#)) 44

 Figure A.1DV Modification by replacing the figure with the following figure where the Insulation Thickness test (MST 04) and Ignitability test (MST 24) are deleted 45

 Table A.3DV Modification by replacing the Table with the following table where the Ignitability test is deleted 46

A.4 Tests for new combinations of material in direct contact with each other 47

 A.4DV Modification by adding the following note: 47

 Table A.4DV Modification by replacing the Table with the following table where the Insulation Thickness test (MST 04) and Ignitability test (MST 24) are deleted and the Fire Test (MST 23) is added 49

PREFACE

This UL Standard is based on IEC Publication 62915: First edition Photovoltaic (PV) modules – Type approval, design and safety qualification – Retesting. IEC publication IEC 62915 is copyrighted by the IEC.

These materials are subject to copyright claims of IEC and UL. No part of this publication may be reproduced in any form, including an electronic retrieval system, without the prior written permission of UL. All requests pertaining to the Photovoltaic (PV) modules – Type approval, design and safety qualification – Retesting, 62915, Standard should be submitted to UL.

Note – Although the intended primary application of this Standard is stated in its Scope, it is important to note that it remains the responsibility of the users of the Standard to judge its suitability for their particular purpose.

NATIONAL DIFFERENCES

National Differences from the text of International Electrotechnical Commission (IEC) Publication 62915, copyright 2018, are indicated by notations (differences) and are presented in bold text.

There are five types of National Differences as noted below. The difference type is noted on the first line of the National Difference in the standard. The standard may not include all types of these National Differences.

DR – These are National Differences based on the **national regulatory requirements**.

D1 – These are National Differences which are based on **basic safety principles and requirements**, elimination of which would compromise safety for consumers and users of products.

D2 – These are National Differences from IEC requirements based on existing **safety practices**. These requirements reflect national safety practices, where empirical substantiation (for the IEC or national requirement) is not available or the text has not been included in the IEC standard.

DC – These are National Differences based on the **component standards** and will not be deleted until a particular component standard is harmonized with the IEC component standard.

DE – These are National Differences based on **editorial comments or corrections**.

Each national difference contains a description of what the national difference entails. Typically one of the following words is used to explain how the text of the national difference is to be applied to the base IEC text:

Addition / Add - An addition entails adding a complete new numbered clause, subclause, table, figure, or annex. Addition is not meant to include adding select words to the base IEC text.

Modification / Modify - A modification is an altering of the existing base IEC text such as the addition, replacement or deletion of certain words or the replacement of an entire clause, subclause, table, figure, or annex of the base IEC text.

Deletion / Delete - A deletion entails complete deletion of an entire numbered clause, subclause, table, figure, or annex without any replacement text.
